\$3.00 Per Year

FFA Princess and President from County

Lancaster County youths shine for FFA Week

DIETER KRIEG
UNIVERSITY PARK - The
in the head of the new
princess, Marcia Hess,
in more ways than
The pretty brunette
the Willow Street Vo-
School received that
quished and coveted
here Wednesday night
an evening ceremony
ighting FFA Week.
crown fit especially
because as a Lancaster
ty girl, Miss Hess
d off a series of out-
ing performances by
teams and individuals
the County. For the
12 months she will

reign over the state
organization of Future
Farmers of America which
boasts a record membership
of over 12,000 during this
Bicentennial Year. The

activities which took place
here on the Penn State
University campus this week
represented the best the
FFA has to offer. A total of
1870 FFA students and their
advisors competed in more
than 20 events.

Young Lancaster Coun-
tians harvested a number of
trophies as they tested their
knowledge and skills of
farming. Not far behind, and
often, in fact, in first place,
were individuals and teams
from neighboring areas.
Adding further glory to the
Lancaster County per-
formance was that a Solanco
youth, Randy Ranck, is the

new State FFA president. (A
special feature on Ranck,
written prior to his trip to
State College for FFA Week,
appears on page 65 of this
issue.)

In his acceptance speech,
Ranck in part repeated the
message given the night
before by National FFA

President Bobby Tucker.
That was to emphasize that
failures are often really
stepping stones to success.
As one who had experienced
defeat in FFA elections and
elsewhere, Ranck accepted
this high state office with
humility. He paid tribute for
this achievement to his

parents, Mr. and Mrs. Lester
H. Ranck, and his FFA
teachers - Mssrs. William
Fredd, Arba Henry, Ronald
Althoff and Charles Heim.

The Lancaster County
performance in the state-
wide contest was the talk of a
number of FFA officials

Ms. Porter invited to farm

RACUSE, N.Y. -
representing 7500 members
the states, delegates to
4th annual meeting of
ern Milk Producers
erative Association
ved that the Association
e Sylvia Porter, a
nnist, to a dairy farm
e Northeast.
via Porter, who earlier

this year wrote a series of
articles which did much to
give the dairy industry a bad
image, is a journalist whose
work is circulated
nationally. The series of
stories have since been
labeled inaccurate by
dairymen and dairy
organizations alike.

Among the allegations

made by Ms. Porter in her
stories were that: Dairy
cooperatives conspire to
keep prices high; the dairy
industry's political muscle
may inhibit reform; milk
prices keep soaring; and the
government pushes milk
prices beyond the reach of
the poor.

Canning supplies available

Several fruits are ripe

By JOANNE SPAHR

LANCASTER - Sweet
ries will be nearly gone;
r, or pie, cherries will
be available, but getting
and less abundant; and
berries will be plentiful,
icious, and moderatley
ed during this coming
ek.

The sweet, or Bing cherry
crop which produced only
about half of last year's
amount, should be pretty
well picked by this Saturday,
according to several orchard
owners here. What may
sometimes be a month of
picking time has been
trimmed down to one week

this year because of low
supply and high demand.

Sour, or pie cherries, on
the other hand, were not as
affected by the frost as the
sweet cherries and will be
open for picking in most
orchards today. Herr Fruit

Kerstetter airs opinions

By JUDY MITCHELL

Berks Co. Reporter
READING - Pennsylvania
Secretary of Agriculture
ymond J. Kerstetter
peared at the Berkshire
all on Tuesday evening
ong with Ed Osborne,
ector of Bureau of
arkets. The state officials
ere accompanied on a
alking tour of the exhibits

at the mall celebrating Dairy
Week by County Agent
James F. Haldeman; Donald
Duncan, president of the
Berks County Dairy
Association; Leon Kirkoff,
Pomona Grange master;
and William Myers,
president of the Berks
County Farmers
Association.

Asked for his thoughts on

the dairy picture, Ker-
sktetter commented that he
feels "it is important for
dairymen to get together and
promote their product. You
are going to have to do that
and sell the people," he said,
"because most people do not
know how much it costs (to
run a dairy operation)."

[Continued on Page 14]

Barley harvest begun

By DIETER KRIEG

The barley harvest has
gun, with yields varying
onsiderably across the
rea, but moisture content
eing satisfactory in most
ses. One report indicated
at a field of "barsoy" - an
arly variety of barley -
ielded 90 bushels per acre.
ost yields thus far, be-
wever, appear to be

between 45 and 50 bushels
per acre, with a number of
growers reporting a yield of
70 bushels.

Prior to the rain received
on Wednesday night, the
moisture content was
described as "good,"
ranging mostly between 13
and 14 per cent. It should be
noted that these reports
came from areas which were

not hit by the severe hail
storm on June 1. The fields in
the storm's path have been
pretty much devastated and
have been largely replaced
with late-season corn.

Some of the barley coming
in from the Eastern Shore of
Maryland is reportedly
testing close to 16 per cent
moisture, although that's

Marcia Hess - FFA Princess

Marcia Hess, daughter of Mr. and
Mrs. Herbert Hess, Quarryville, the
new Pennsylvania FFA Princess. She
received her crown Wednesday night
during ceremonies held at Penn
State's new University Auditorium.
More than 1800 FFA'ers from all over

Pennsylvania took part in the three-
day long activities. Miss Hess
represented the Willow Street Vo-
Tech School. Since this is a special
weekend, we'll put some words in her
mouth and have her wish everyone a
Happy Father's Day.

US No. 3 - 30-36 lbs. 99.50-108.50; 40-45 lbs. 92.50-97.00; 1 Lot 46 lbs. 76.00.

Local Grain

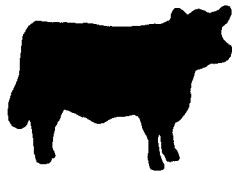

Thursday, June 17

These prices are made up of the average prices quoted by a number of participating area feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn and soybean meal which are per ton.

The average prices quoted Thursday, June 17, are as follows:

	Bid+	Offered+
Ear Corn	80.50	87.50
Shelled Corn	3.15	3.35
Barley	2.07	2.27
Oats		
Local	1.68	1.88
Western	2.10	2.28
Wheat		
Millers	3.25	3.38
Soybeans	6.05	
Soybean Meal		234.00

+Bid is the price the dealer will pay at the farm; offered is the price he will sell for at his mill.

New England Weekly Shell Egg Report

Tuesday, June 15, 1976

Prices paid per dozen Grade "A" brown eggs in cartons delivered to retail stores:
No market report available at press time.

NEST RUN EGGS

Prices are from Egg Clearinghouse, Inc., (ECI) Durham, N.H. and reflect trading prices for gradeable nest run eggs (GNR) on ECI, a nationwide trading center for producers, packers and marketers. GNR eggs are classified by weight in 30-dozen cases, and traded in lots of either 300 or 750 cases. Prices are FOB buyers dock, and are computed Tuesday and Thursday of each week. This week's prices for each classification were:

Classification	New Weight	Per Case	Tuesday	Thursday
Extra Large	51 lbs.	0	0	0
Class 1 - Large	48 lbs.	57	57	57
Class 3 - Medium	42 lbs.	48	48	48
Class 4 - Small	39 lbs.	39	39	39
Breaking Stock	48 lbs.	49	49	49
Checks	48 lbs.	41	42	42

Eastern Pa. & N.J. Poultry

Wednesday, June 16

Prices steady. Buying interest for light-type hens is good. Offerings are barely adequate to occasionally short. Clearances are surprisingly good in most instances. Heavy type hens adequate for a fair call. Prices paid at farm: Light Type Hens 9-13½, mostly 12½-13 in Pa., Mostly 11½-12½ in N.J. Heavy type hens TFEWR.

People once believed that centaurs fought in the Trojan army.

Philadelphia Eggs

Wednesday, June 16

Prices unchanged to higher. Cartoning demand fairly good overall. Supplies of Large adequate to occasionally short, mediums adequate. Undertone is cautious. Prices to retailers: Sales to volume buyers, consumer grades white eggs in cartons, Delivered: Store Door:

A Extra Large 62½-68, A Large 61-67, A Medium 54-58.

Baltimore Eggs

Wednesday, June 16

Prices unchanged to 2 cents higher. Feature activity mostly on mediums. Demand is fair but spotty. Supplies of large sizes ample, mediums adequate. Cartoned eggs: Prices to retailers, State graded (min one case sale)

White: Grade A Large 66-71, Grade A Medium 58-63.

Delmarva Poultry

Wednesday, June 16

RTC movement slow. Slaughter schedule reduced in most all plants with an occasional plant not operating. Today's ltl asking prices sharply lower on both plant and US Grade A. Live supplies ample and at mostly desirable weights. Undertone weak. Current broiler-fryer negotiated prices for immediate includes mostly multiple-drop shipments to New York City from Delmarva.

Range: US Grade A 43-44, Plant Grade 42-43, Premiums US Grade A 45-50, Premiums Plant Grade 44-48.

Wtd Avg: US Grade A 43.68, Plant Grade 42.67, Premiums US Grade A 47.86, Premiums Plant Grade 47.62.

X - includes special services, selected competitive brands, etc.

STAY ON TOP OF THINGS

WITH AN
ENSTROM

Get more things done around the farm — in less time — with your own reliable 3-place Enstrom helicopter. Spray insecticides; inspect crops; watch for erosion; check on cattle, pastures, fences, irrigation — quickly, efficiently. Invaluable for hospital trips, getting over deep snow, floods, veterinary uses. Great for hunting, other recreation, prestige personal transportation.

Costs no more than many single-engine fixed-wing aircraft. Needs no airport — just a small clearing. Easy to learn to fly. For more information, contact Helicopter Manager at (302) 834-5400.

Spark

GROWTH STIMULANT

AERIAL APPLICATION:

Apply 1 pint of SPARK in 5 gallons of water per acre.

GROUND APPLICATION:

Apply 1 pint of SPARK in 15 gallons of water per acre. This means keep the spray booms high.

Spark... proven in the field
and proven in seven years
of University Research

Here's how SPARK can help promote 5% to 10% grain yield increases:

- Enhanced corn growth
- Silks emerge about 2 days sooner
- Tassels emerge about 2 days sooner

JUNE 21 - 27, 1976

Summer is here!

Best time to catch hornpouts after dark now. Brigham Young murdered June 27, 1844. New moon June 27. Summer begins Monday, June 21. Average length of days for the week, 15 hours, 19 minutes. First Daylight Savings Time bill enacted June 27, 1917. US Forces ordered to Korea June 27, 1950. Trees stop their annual growth this week. Small deeds done are better than great deeds planned.

Ask the Old Farmer: My father used a phrase that has long troubled me, "run like a whitehead." What is a whitehead, and why did he run? V.B. Alexandria, Va.

The reference began when Oliver Cromwell took over in England and shaved the heads of dissenters.

Home Hints: If you are cutting a recipe in half and need to divide one egg in half, do it this way. Beat the whole egg until yolk and white are thoroughly combined, then measure and divide.

OLD FARMER'S WEATHER FORECASTS

New England: Seasonal to cool temperatures most of week, with rain in south and on coast latter part, weekend cloudy.

Greater New York-New Jersey: Week begins partly sunny, normal temperatures, then showers midweek and on weekend.

Middle Atlantic Coastal: Clear and hot at first, then thunderstorm midweek, clearing latter part, with showers at end of week.

Heifer care discussed

Dr. Jesse Stoner, New Oxford R2, spoke on "Care of the 4-H Heifer" at the May 10 meeting of the Central Dairy 4-H Club at the 4-H Center. He gave information on feeding, breeding, and vaccinating dairy heifers.

Pledges were led by Gary Welsh and Jeff Stambaugh. Talks on activities at 4-H State Achievement Days at Penn State in August were given by Cindy Rutter, Tim Eisenhart, and Tom Welsh.

Jill McGregor gave a demonstration on "Animal Analysis Association." Kevin Laughman demonstrated "How to 'Fill' Your Heifer for a Show."

Omaha Cattle

June 17, 1976
Weekly 51 - Cattle - compared with the previous weeks close closing prices on slaughter steers and heifers were mostly 1.00 lower, some late sales 1.50 off, as compared with the higher close of the previous week. Cows were weak to 50 cents lower and bulls weak to 1.00 lower. Four day receipts were 20,100 this week, 16,200 previous week and 17,400 a year ago. Marketings were rather liberal, but were well distributed over the trading period. The week in need of cattle for immediate requirements and were fairly aggressive for numbers. After the initial downturns, prices followed a stable pattern despite only limited support form the carcass trade.

STEERS: A few loads choice predominantly 3 1058-1150 lbs. 41.15-41.50 during week. A moderate volume choice and prime 3-4 1121-1300 lbs. 40.00-40.75, occasionally to 41.00. Choice 2-4 predominantly 3 1000-1225 lbs. 39.50-41.00, Choice 3-4 1225-1400 lbs. 38.50-40.00, and several loads choice some with end Prime 3-5 1275-1437 lbs. 36.00-38.00, load 4-5 1500 lbs. 33.00 late. Mixed good and choice 2-3 975-1250 lbs. 38.50-40.00, Good 2-3 37.00-39.00. Standard and low-good 2-3 36.00-37.25.

Average of 15-214, detailed quotations, for Choice 900-1100 lb. steers this week 40.40, Choice 1100-1300 lbs.

St. Louis Cattle

June 17
Cattle Review:
Receipts this week 7100: week ago 7800: year ago 8300. as compared to the previous weeks close, slaughter steers and heifers mostly 1.00, instances 1.50 higher. Cows fully 50-1.00 lower. Bulls weak to 1.00, instances 2.00 lower supply mainly choice 2-4 1000-1150 lb. steers, around 30 percent heifers, 10 percent cows. Slaughter steers: Mixed Choice and Prime 2-4 1050-1200 lbs. 40.50. Load 4-5 1300 lbs. at 37.00. Choice 2-4 950-1250 lbs. 39.00-40.50. Package 3-5 1290 lbs. at 37.50. Mixed Good and Choice 2-3 900-1200 lbs. 37.50-39.50. Good 2-3 36.50-38.50. Standard and Good Holsteins 2-3 1000-1250 lbs. 36.00-37.75.

39.75. Average weight of steers this week 1147 lbs. as compared 1130 lbs. previous week. Average weight of heifers this week 971 lbs. as compared 995 lbs. previous week.

Heifers: a moderate volume choice and prime 3-4 972-1091 lbs. 40.65-41.00. Choice 2-4 875-1100 lbs. 39.00-40.75. Mixed Good and Choice 2-3 800-1000 lbs. 38.00-39.50. Good 2-3 36.00-38.00. Small lots standard and good 2-3 34.50-36.00.

Cows: Utility and Commercial 2-3 24.50-27.00, Few 27.50-28.00. Canner and Cutter 21.00-24.50, Mixed Cutter and Utility 24.75-25.50. Bulls: 1-2 1400-1800 lbs. 32.00-36.00, Few 1,36.50-37.00.

Slaughter Heifers: Mixed Choice and Prime 2-4 925-1025 lbs. 39.00. Part load 39.50. Choice 2-4 800-1075 lbs. 37.50-39.00. Mixed Good and Choice 2-3 700-950 lbs. 34.50-38.00. Good 2-3 33.50-35.50. Cows: Utility and Commercial 1-3 26.50-28.50, Few High Yielding Holsteins 1-2 29.00, Few 29.50. Cutter 24.00-27.00. Canner and Low Cutter 22.00-24.00. Shelly Canner 18.00-22.00.

Bulls: YG 1-2 1050-1700 lbs. 30.00-35.00, late week sales mostly 30.00-33.00. 950-1050 lbs. 27.00-30.00.

Feeders: including around 1200 at Thursday auction. Feeder Steers uneven, generally steady to 1.00 higher, advance mainly on fleshy Choice weighing over 800 lbs. Feeder Heifers steady. Supply largely Good and Choice 400-850 lb. steers and 400-650 lb. heifers.

Steers: Choice 325-600 lbs. 42.50-46.00, 600-800 lbs. 39.00-43.50. Fleshy 800-980 lbs. 38.50-41.50. Mixed Good and Choice 400-700 lbs. 39.50-42.00. Good 400-600 lbs. 36.00-39.25, Few Lots Standard 325-620 lbs. 32.00-34.50.

Heifers: Choice 500-800 lbs. 34.00-36.25, Lot 587 lbs. 37.00. Mixed Good and Choice 400-650 lbs. 31.00-33.50, 350-600 lbs. 28.25-32.00.

Peoria Auction

June 17
Receipts this week 5800; last week 6300; last year 5900.

Compared with last weeks close, slaughter steers and heifers steady to 50 lower. Cows mostly 1.00 lower. Bulls weak. Receipts about 75 Percent slaughter steers, 20 percent slaughter heifers.

Slaughter steers: Choice and Prime 3-4, 1100-1250 lbs. 39.90-40.50; late 39.00-39.50; Three loads 1225-1250 lbs. 40.50-40.75; same Grade Yield Grade 4-5, 1300-1400 lbs. 37.50. Happy Father's Day

LIFE on the farm

By Dieter Krieg, Editor

Daylight was over an hour away when my brother, Ingo, and I closed the kitchen door behind us. As we rounded the turn of the sidewalk next to the house, and passed beneath the huge maple tree outside Mom and Dad's bedroom window, we wondered how much of the milking we might get done before Dad got up. We both knew he was awake — after thousands of days of getting up early in the morning to milk the cows, his biological clock wouldn't let him oversleep no matter what.

Still, Ingo and I liked the idea of giving him an opportunity to rest a little longer than usual. Not one to pass responsibilities to others, it always took some persuasion on our part to convince him he could take it a little easier on Father's Day. Except for his birthday, when we made similar arrangements, this was the only day of the year he could "sleep in."

Eager to do as much as possible, and wanting to prove to him and ourselves we could do it well, Ingo and I tackled the work with special satisfaction and a bit of excitement.

Our goal was always to get as much of the work done as possible before he showed up in the barn. And we wanted to have more milk in the tank than what we'd have ordinarily. But that was no easy task and provided a real challenge for us.

Dad had a long history of being a top dairyman — both in Germany and in the United States. What's more, he has always been religiously faithful to the kind of schedule he kept — even when it meant getting up at 2:30 a.m. to milk 106 cows by himself.

He has worked 18 hours a day for years, never taking a day off, never missing a milking.

And he's the type of man who shows up in the barn on Father's Day morning when he doesn't need to —

simply because he doesn't know any better.

A father myself now, I can more fully appreciate the joys and trials of being a father. So far it's been nothing but pleasure. My children — both of them boys — are aged three and two and think of the cutest things.

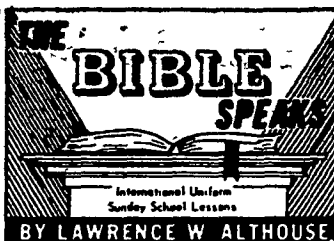

The other day our three-year old, Paul, was in the sandbox playing. When his mother came out to chat with him he happily announced that he had made a cake. With rooster eggs!

Although we do not live on a farm now, we try to stay close to that most wonderful way of life and visit farms frequently. Paul and Karl have taken a real interest in cows, cats, dogs, chickens, and farm equipment. So much, in fact, that they'll say hello to tractors and even yell out "Hey tractor, watcha doin'?"

Recently my wife, Lisa, caught Paul licking his little brother and announcing to her that he was a cow. And the list of pleasurable moments goes on and on. The boys amaze us with their witty and healthy imaginations. They're a source of the greatest joy a parent can ask for.

But it's not just our children who are like that. I suppose most all of them think of unusual things to do at one time or another — if not every day. One enterprising young man in our neighborhood, for example, was pulling his little red wagon around one day with a bit of hay in it. "Hay rides, ten cents!" he called out as he wandered down the street with not a care in the world.

I remember being a kid — and it was great. Now I'm a father (and still a kid at heart) and it's just as great, maybe even better, especially since I have a son who can bake a cake with rooster eggs.

WITHSTANDING GOD

Lesson for June 20, 1976

Background Scripture: Acts 11:11-18; 15: 1-35; 19:23-27; Galatians 2:11-16.

Devotional Reading: Ephesians 6:10-20.

I have often noted in my study of history that revolutionary movements often tend in time to become very much like the very forces they have overthrown. I think of reform movements that, having grasped power, have become corrupt and decadent themselves. I think of religious groups who came to America to find freedom of religion and, then, having found that freedom, went on to deny it to others. I think of children who have vowed not to be like their parents and then have incarnated the very characteristics they have decried.

Justification by faith

Christianity came into being as a revolutionary or reform movement. If we examine the gospels closely, we find that there is one characteristic of Judaism as Jesus found it that was the most recurring negative theme in the mission and message of Jesus: legalism! No group was as subject to his condemnation as the scribes and Pharisees who were the chief proponents of a legalistic Judaism.

The problem, Jesus made it clear, was not with religious laws — he acknowledged the need for these — but with what the legalists did with these laws. These rules and regulations became a substitute for the living God.

So primitive Christianity came into being with a bias against the legalistic approach to religion. Yet, despite that fact, no temptation was more pervasive to the early church than the lure of legalism. Most of the conflicts and tensions in the early church can be attributed to the struggle over this question: what is basic is the Christian faith — rules and regulations or the grace of God offered in Jesus Christ?

Even the Gentiles

Well, of course everyone knew that, as Paul puts it, "a man is not justified by works of the law but through faith in Jesus Christ" (Galatians 2:16). Yet, although they knew it, many of the early Christians continued to act as if the rules and regulations were primary. Many Jewish Christians still continued to act in a manner that was reflective of the legalism of the Pharisees.

NOW IS THE TIME...

The farm pond becomes a very popular place during the hot summer months for both young and old; we have hundreds of these ponds in this part of the state providing both summer and winter recreation. A word of caution is in order at this time to prevent serious accidents and drownings. Every pond owner should provide rescue equipment at the pond side to be used in case of emergency; this might include a boat, raft, wooden ladder or plank, a rope, or other equipment that can be used quickly to help a person in deep water. Swimmers should not be permitted to swim alone and this equipment should be at the pond — not in the barn or garage. Good pond safety might save the life of a friend or loved one this summer.

releases from Penn State reveals the research was done by injecting a solution of Benomyl into a tree is encouraging for trees slightly infected or as preventative measure. However, trees that are partly dead carrying heavy infection have not responded as well. We urge elm tree owners to evaluate the condition of their tree and secure professional help getting the tree treated. Materials and equipment needed require considerable knowledge and caution making the treatment. Treatment works best when the infection is early and the attack on the tree.

Statistics Lie?

A life insurance agent was naturally quite surprised to see an elderly gentleman, 95 in the office wanting to take out a policy. The agent told the senior citizen the chances were slim his application would be approved. Annoyed, the white-haired man commented, "You're making a mistake. If you look at the statistics you'll find that mighty few men live after the age of 95."

RURAL ROUTE

So when Peter found himself criticized for eating with gentile Christians, "he drew back and separated himself, fearing the circumcision party" (2:12). Of course he knew better than that, but his fear dominated his actions until Paul boldly confronted him and condemned his actions as contrary to the spirit of Christ.

On another occasion, it took a vision to persuade Peter to go to Simon the tanner, (a Gentile) so that he and his family might repent and receive the Holy Spirit. It took impassioned reasoning by Peter to convince the church at Jerusalem to set aside their legalistic reservations and accept the idea of gentile converts. It is still a problem for Christians today: almost two thousand years later and we still tend to make our religion one of legalism instead of God's grace. The danger now as then is that in doing so we may still be withstanding God himself.

Harvestore® Announces a Special Early Summer Super Savings Plan on Harvestore Grain and Forage Structures.

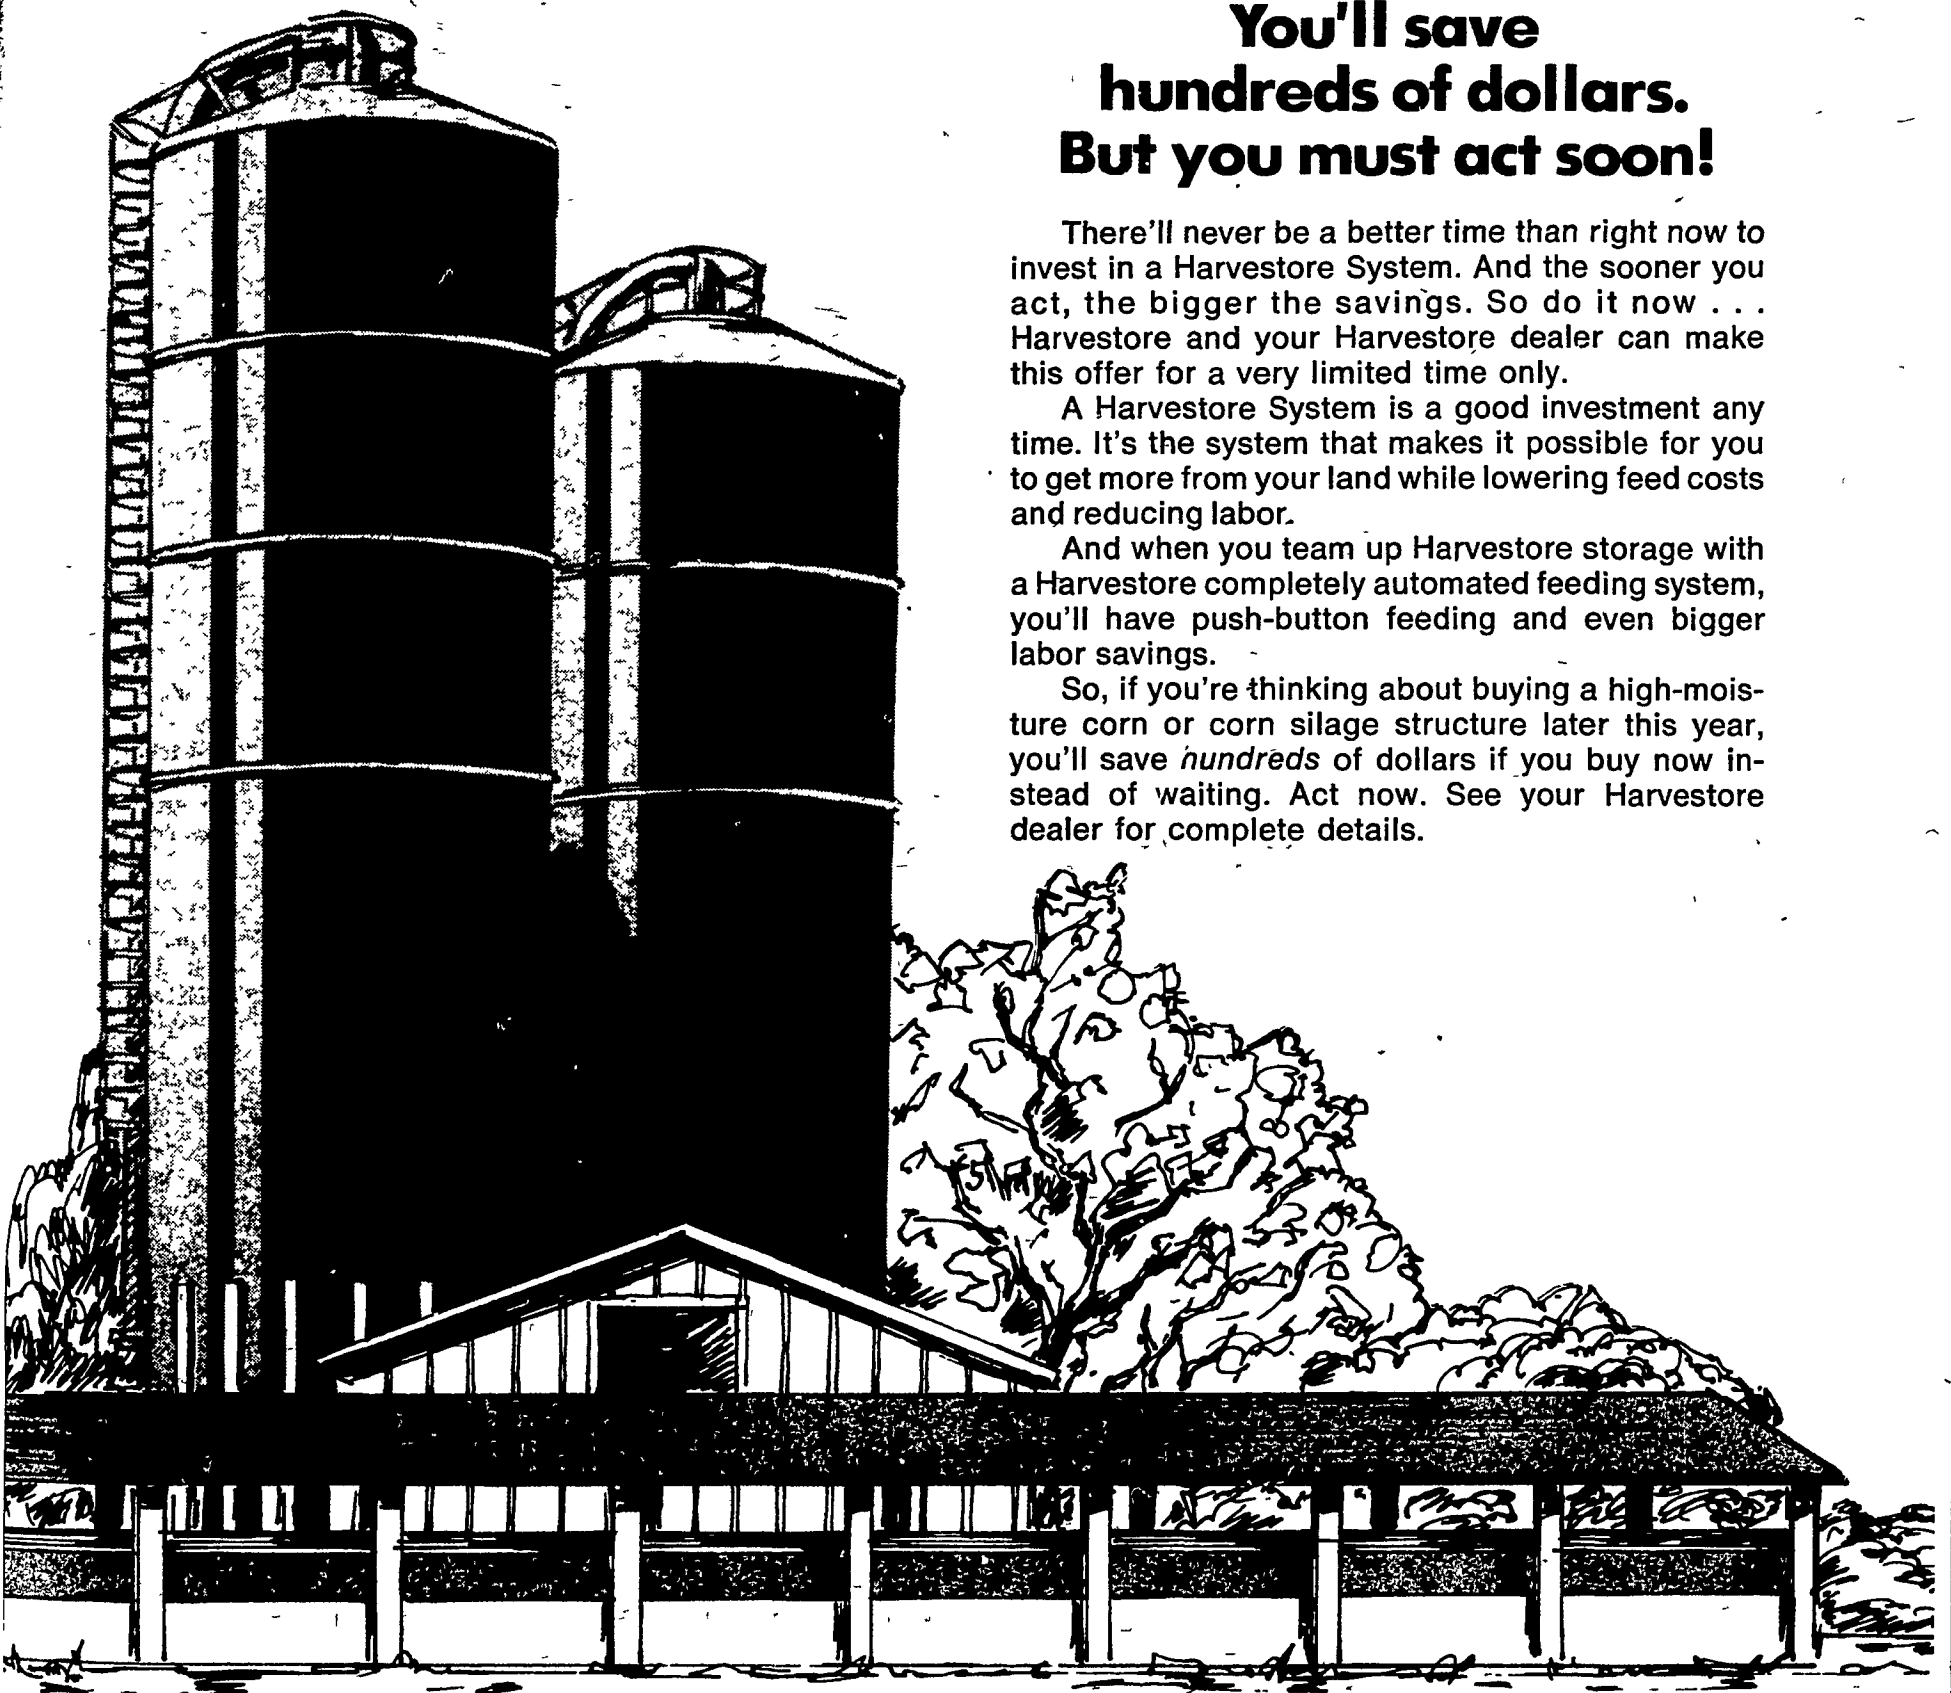

**You'll save
hundreds of dollars.
But you must act soon!**

There'll never be a better time than right now to invest in a Harvestore System. And the sooner you act, the bigger the savings. So do it now . . . Harvestore and your Harvestore dealer can make this offer for a very limited time only.

A Harvestore System is a good investment any time. It's the system that makes it possible for you to get more from your land while lowering feed costs and reducing labor.

And when you team up Harvestore storage with a Harvestore completely automated feeding system, you'll have push-button feeding and even bigger labor savings.

So, if you're thinking about buying a high-moisture corn or corn silage structure later this year, you'll save *hundreds* of dollars if you buy now instead of waiting. Act now. See your Harvestore dealer for complete details.

The new York County Poultry Princess is Sandra Markey, second from left. Shown with her are the

other three girls who competed for the title — Amy Warner, Ginger Wolf, and Cindy Watersdorff.

York poultry queen chosen

YORK - A full house of York County poultry producers met here at Avalong's Restaurant last Tuesday for dinner and to see their new Queen. Four well qualified girls competed for the title, which was eventually won by 17-year old Sandra D. Markey of York R8.

A 1976 graduate of Dallastown High School, Sandra has been active in school, her community, and on her parents' 60 acre farm. The Markeys raise fruits and vegetables, and keep between 2500 and 3000 layers. While involved with various phases of the farming operation as the need arises, the new Queen says her main job has been to sell them at the Central and Eastern

markets in town. "I like this part of the business best because I'm dealing with the public and like working with people," she explained.

Runner-up in the pageant, which was emceed by York County Agent, John Smith, was Ginger Wolf, who was Prom Queen of her graduating class this year. The vivacious brunette from Stewartstown R2 will represent York County egg producers at various functions when Sandra is unable to do so. She is the 18-year old daughter of George and Hazel Wolf and a sister to James Wolf, former president of the York County Poultry Association.

Amy Warner, Stewartstown R2, and Cindy

Waltersdorff of York completed the slate of contestants. Amy is the daughter of Mr. and Mrs. C. Elmer Warner and a recipient of the York County 4-H Poultry Award as well as a distinguished honor student. Cindy, daughter of Mr. and Mrs. Robert E. Waltersdorff, cited work on her parents' poultry farm as a main interest and was also an honor student at Dallastown High School.

Sandra, the daughter of Mr. and Mrs. Ronald E. Markey, is 5-feet, 3-inches tall, has light-brown hair and blue eyes. She is very much interested in singing and hopes to be working as a secretary this Fall.

AGWAY

FLY CONTROLS

**Agway offers 3 ways to fight flies...
on the animal...on the wall...
in the air. For good fly control
management, you'll need all three.**

**Use these products
for controlling flies
directly on the animal.**

AGWAY DUAL STOCK SPRAY
Agway's best value for control of face flies, horn flies, heel flies, house flies or stable flies in barn or pasture. 2 gal. 30 gal.

AGWAY DUAL STOCK SPRAY CONCENTRATE
Two quarts, mixed with water, makes 6 gallons of spray. 1 qt.

AGWAY DAIRY DUSTER
Contains 1% Coral for effective and economical control of lice in the winter and flies in the summer. 25 lb. bag

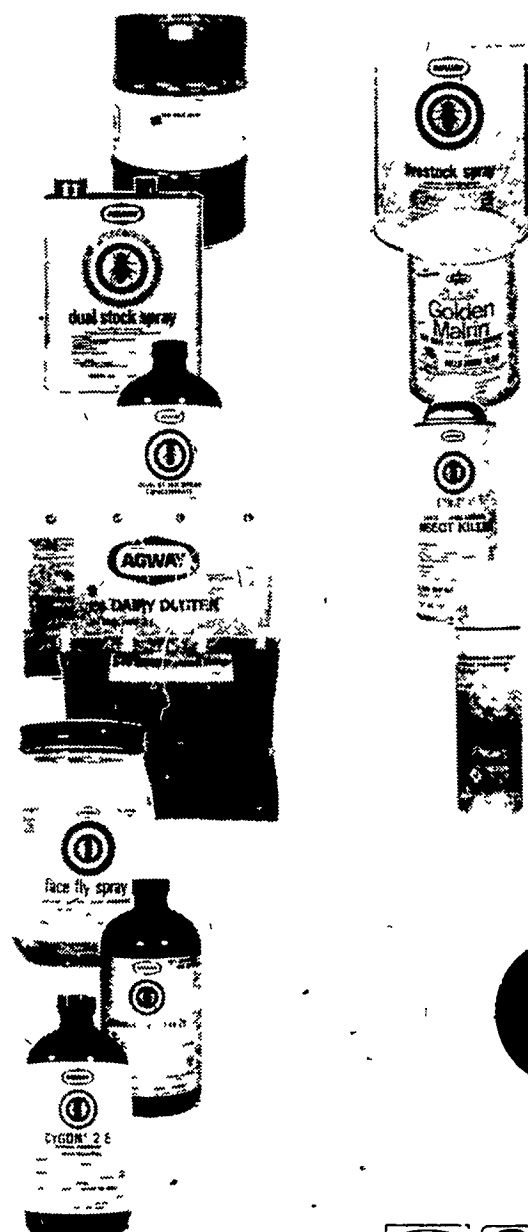

PFIZER DUST BAG
Refillable, hanging bag for control of horn flies, face flies, and lice. 12½ lb. refillable bag

AGWAY FACE FLY SPRAY
Kills face flies on dairy and other livestock. Easy spray or brush application. 473 gm. btl.

**Use these residual
products for fly
control on the wall.**

AGWAY RESIDUAL FLY SPRAY 2E
Agway's first recommendation in wall sprays. Effective for several weeks. 1 qt. 1 gal.

AGWAY CYGON 2E
Gives good residual control in dairy barns, hog pens, poultry houses and other farm buildings. 1 qt. 1 gal.

**Use these products
for fly control
in the air.**

AGWAY LIVESTOCK SPRAY
Agway's first recommendation for fogging. Can also be used directly on the animal. 1 gal. 5 gal. 30 gal.

GOLDEN MALRIN SUPER STRENGTH BAIT
With Vapona and Korlan, plus Muscamome, a fly attractant to lure and kill even more flies. Specially formulated and packaged for maximum potency. Safe in farm buildings. 1 lb. 5 lb.

AGWAY VIRMIST
Commercial strength aerosol combines pyrethrins and a synergist. Safe in all food-handling areas. May be used manually or in an Agway Virmist dispenser. 20 oz. can

SPRAYRITE DAIRY AEROSOL
Commercial strength (0.5% pyrethrins) aerosol. Approved for milkhouse, eggroom and food handling areas. 2½ lb.

**THOUGHT
FOR THE WEEK**

*We are God's
display windows.*

Pennsylvania Secretary of Agriculture Raymond J. Kerstetter (center) speaks with Leon Kirkoff (left), Pomona Grange master, and Donald Duncan (right), president of the Berks County Dairy Association, at the Berkshire Mall.

Kerstetter

(Continued from Page 1)

Speaking to farmers at the Reading Fair Banquet later that same evening (see separate article), Kerstetter mentioned his visit to the dairy week exhibit stating, "I was impressed with the dairy exhibits and the people who were looking at them. It just goes to show, we have to promote our products."

During a brief press conference at the mall, Kerstetter congratulated Berks County farmers saying, "I have seen nicer

corn on the drive down here (travelling on Rt. 183 in the Bernville area) than I have seen anywhere else."

Asked to comment on the progress of State Bill 219, the secretary recalled that it had come up at a legislative review earlier in the day. He regretted, however, that due to the numbers of bills considered, he was unable to report on the exact status of Bill 219, but furthered the opinion, "I am sure it will be passed."

On the matter of the

disposition of state hospital farms, Kerstetter emphatically expressed his opposition to proposals which would "piecemeal it out." He has debated the issue before the House, and is opposing a bill which has already been advanced which would "pick up just the Harrisburg land."

He added, "We should not turn out the land... we should keep it in agriculture. Once we lose it, it will be gone and you will just see more townhouses. We can make more washing machines and tractors," he emphasized, "but not more land."

Kerstetter did advance two possible solutions to the state hospital farm problem.

"Unless you inherit land from your father," he pointed out, "you cannot start a farm today because the cost is too high. The farms could be used on a lease basis to give young farmers a start." He further proposed that "when you have land close to an institution, you should use it for agricultural research."

Kerstetter spoke briefly about the Farm Show complex in Harrisburg, mentioning that plans have been made to refurbish it. In addition to a number of general repairs, particularly to the electrical wiring system, improvements will include a new dairy barn.

Asked about his plans for the future, Kerstetter, who assumed the position as secretary of agriculture approximately six months ago after serving as deputy secretary of agriculture for six years, replied, "I told the governor I would stay only a year."

Although suggesting that he may stay on longer than the promised year, he added, "There are still a lot of things I would like to do, and I don't need to draw a paycheck to do them."

Kerstetter concluded the session by saying, "I was born and raised on a farm, and I have never left," adding, "I have worked a lot of places, in Washington and all over, but I always kept a residence on the farm."

Angus show slated

Members of the Western Pennsylvania Junior Angus Club have scheduled their annual field day and show for Saturday, July 17, reports Dale Rains, president. The event will be held at the Mercer County 4-H Park located one mile north of Mercer on Route 19.

Activities will get underway at 10:00 a.m. with registration followed by a

fitting and demonstration and show for junior Angus heifers and steers.

Exhibitors and spectators are asked to bring a bachelorette lunch and beverage will be furnished by the junior organization.

For further details, contact Dale Rains, Mercer County, Pennsylvania, 16137.

WHITE WASHING with DAIRY WHITE

- DRIES WHITE
- DOES NOT RUB OFF EASILY
- NO WET FLOORS
- IS COMPATIBLE WITH DISINFECTANT AND FLY SPRAYS
- WASHES OFF WINDOWS & PIPELINES EASILY

Also Barn Cleaning Service Available With Compressed Air

To have your barn cleaned with air it will clean off dust, cob webs & lot of the old lime. This will keep your barn looking cleaner & whiter longer. We white washed 600 barns last year, so if your barn needs white washing for better service have it done early.

High-Pressure Washing In Dairy Barns.

Spraying Since 1961

NOW is the time to PLAN, Budget and Select YOUR STORAGE, DRYING and HANDLING SYSTEM.

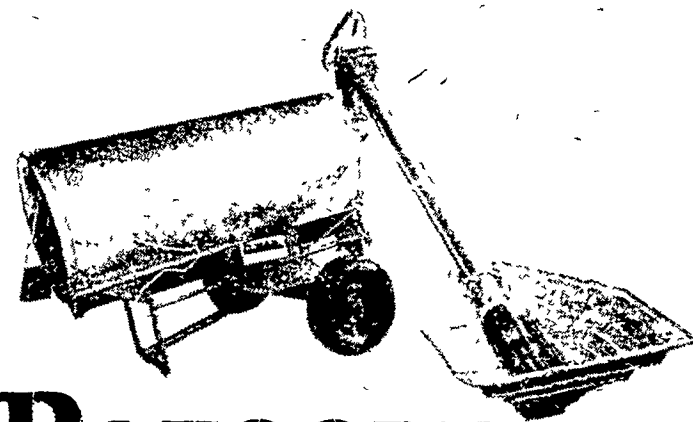

BAZOOKA Feed/Grain Movers

give you a
long lasting,
smooth running
storage system.

Bazooka augers offer a wide range of capacity, choice of drives and accessories for automated grain and feed handling. These matched components make a system that can be expanded. You can be sure the system we design and install will move your grain or feed smoothly, safely... and for a long, long time.

In addition to Bazooka Portable augers, we can furnish high-capacity 10" unloading systems for bins to 48 ft. diameter and the new Model GC 101 GRAINCLEAN'R (scalper with cleaner and built-in fines collector). Call for literature and prices.

GRAINCLEAN'RTM

BAZOOKA[®] Model GC101

- Scalps and cleans corn, milo, soybeans, wheat or rice to improve grade and storability
- Fully enclosed to prevent flying chaff, help control dust and give weather protection
- 56 sq. ft. of screen can remove 80% of fines in dry corn at 500 bu/hr. up to 2000 bu/hr capacity
- Can be equipped with trailer undercarrige, tow bar and 6" or 8" fill auger which swivels beyond 180° and rides on top of cleaner during transport

Record broiler output in 1975

WASHINGTON, D.C. — Broiler and turkey meat output this summer will continue well above a year ago while egg output may be slightly larger. Broiler and turkey markets may see a small seasonal price increase, but prices are not expected to match those of a year earlier. Prospects are for egg prices to increase

seasonally during the second half of 1976 and average near a year ago, according to USDA.

This year's egg production was up about one per cent through April. The increase reflects the extra day in February (due to leap year) and a higher rate of lay; layers numbers were down one per cent. On May 1 layer

numbers were still one per cent below May 1, 1975.

The size of the laying flock likely will increase relative to 1975 after midyear as more replacement pullets become available. Egg-type chicks hatched during January-April for laying flock replacements this summer and early fall were up six per cent from 1975. In addition, large numbers of old layers were again force molted this spring. The second half rate of lay also will likely continue to run above a year earlier. Thus, egg production during the second half of 1976 is expected to average one to two per cent above the reduced levels of last year.

Wholesale egg prices dropped as expected after Easter but less than normal. Prices strengthened unexpectedly in late April and early May as market egg supplies tightened. The lag in egg supplies likely resulted from a large number of old layers being force molted immediately after Easter, an increase in breaking activity, and the destruction by fire in late April of an entire egg production complex of over a

million layers in South Carolina. Wholesale prices for Grade A large eggs at New York advanced to 63 cents a dozen by May 11, before turning down again to average 52 cents a dozen on May 25. Egg prices likely will increase seasonally this summer and may average, near or slightly below year-earlier levels during the second half of 1976.

Broiler meat output in federally inspected plants during January-March rose 15 per cent above 1975 to record levels. Broilers marketed were up 14 per cent and the average liveweight gained one per cent. Weekly slaughter and chick placement reports indicate that April-June output will be up around 12 per cent. And the number of eggs currently being placed in incubators indicates producers plan to maintain production well above 1975 through the remainder of 1976. However, the increase over 1975 likely will narrow some after midyear.

Wholesale broiler prices in nine cities during January-May averaged about 42 cents a pound but the weekly price ranged from a low of 39 cents

to a high of nearly 45 cents. Prices likely will show a small seasonally increase during the summer but may still only average in the low to mid-40's. Price rises will be limited by large broiler supplies and larger than year-earlier supplies of competing meats.

Price prospects for broiler producers, likely will be a little less favorable next fall if total supplies of competing pork and beef become more plentiful at the time consumer demand for broiler meat weakens seasonally. Historical relationships and expected prices of competing meats indicate wholesale broiler prices of 38 to 40 cents if broiler output is increased around eight percent (as now seems probable). The same relationship would indicate that if per capita broiler meat consumption were to hold at the same level as in October-December 1975, the nine-city price for broilers would be expected to

average 42 to 44 cents a pound, compared with the 45 cents of a year earlier.

Turkey output in federally inspected plants through March was up 24 per cent, a 19-percent advance in numbers and a five per cent gain in average weights. Output will continue well above a year ago but the percentage increase will drop sharply after mid-year.

New York wholesale prices for 8 to 16 pound young hen turkeys during January-March averaged 49.5 cents a pound, nearly one cent above a year earlier. Prices weakened in April but have strengthened in recent weeks and should average near the first quarter in April-June. Prices likely will strengthen in coming months and average in the low to mid-50-cent-range during the summer and fall. Larger turkey production and large supplies of competing meats will hold turkey prices below year-earlier levels during the balance of 1976.

LANCASTER FARMING FOR FULL MARKET REPORTS

After you look all around, you'll want a John Deere Riding Mower.

Look at the hood. It's made of rust resistant fiberglass to keep your rider looking showroom new. It lifts for easy access to the engine and the one-gallon (U.S.) gas tank.

Start looking in back. The engine is fully enclosed on a John Deere to reduce sound for a quiet ride.

Sit on the padded contour seat. Touch the clustered controls. Stretch your legs on the roomy deck.

Notice the mower. The 30-inch mower has a tough steel blade and a deep tunnel for strong lift and discharge.

Put it in gear. The shift-on-the-go transmission offers a neutral start for safety. A reverse gear. And 5 forward speeds—1.4 to 5.3 mph on the 68 1.5 to 5.7 mph on the 68.

See the handsome styling with sleek contours and enclosed design. Optional wheel covers add a finished touch to your machine.

John Deere Riding Mowers are available in two gas-powered models. The 6-hp rider comes with 30-inch mower. The 8-hp model is available with 30- or 34-inch mower and has a synchro-balanced engine to reduce vibration. An optional rear-mounted

bagging attachment for the 30-inch mower lets you trim close to shrubs and buildings. The hamper removes easily for quick dumping. For super-quiet mowing, an electric riding mower with 34-inch cut is also available.

Electric Weed Eater* Trimmer

This electric-powered trimmer cuts with rapidly-spinning nylon line. It gets into those hard-to-reach spots better than conventional trimmers.

These three boys from the O. J. Roberts School in Chester County have the distinction of being the top team in dairy cattle judging. They are Ed Kulp, center, and the Nolan brothers. High individual was Dave Nolan, left.

FFA Week

[Continued from Page 1]

present at the award ceremonies on Thursday morning at the University Auditorium. The outcome was reportedly better than ever before for at least one school - Ephrata, one of the strongest schools represented. While Lancaster County schools did

indeed dominate the competition, a quick glance at the officials' list of winners shows that there was a very wide distribution of schools among first, second, and third places. But Lancaster County schools won on depth. The land judging contest was where Lancaster County dominance was most

noticeable. Solanco's Richard Drumm and Tom Jackson took first and second places, respectively, in the gold category. They were followed, in order, by Dan Hollinger and Jay Oberholtzer of Ephrata and David Keller of Manheim Central. In sixth place - still in the "gold standings" in a contest which saw 163 competitors - was another Solanco youth, Dan Hersberger. A Centre County, Kim Rossi from the

Little Lions FFA Chapter, State College, broke the string of Lancaster County winners as he took seventh place. He was followed, in order, by Larry Martin of Garden Spot; Les Hershey, Solanco; and Larry Hershey, Manheim Central. Another Little Lion FFA'er, Ben Hough, then broke the field in 11th place, followed by Karmon Franklin of Waynesboro. Finishing the list of "gold" winners were two Grassland Chapter FFA'ers from New Holland, Duane Weber and Tony Boudier.

In the "silver" winners list among land judges were, in consecutive order: Jay Neff, Penn Manor; Duane Hernley, Elizabethtown; Tom Innerst, Red Lion; Mike Milburn, Solanco; Donald Landis, Ephrata; and Jere Rutt, Elizabethtown. They were followed, in order, by Marty Clouse, Central Cove; David Stroble, Montoursville; Richard Harr, Southern Fulton; and Bruce Weaver, Roy Strohecker, and George Kissinger - all of Upper Dauphin. Rounding out the list were Deb Deeter from Tri-Valley and Ken

Musser from Redbank Valley. The three highest students in the contest will go to the National Land Judging Contest in Oklahoma and receive special plaques.

A second contest which was strongly dominated by FFA'ers from the Garden Spot was the one in floriculture, which had 70

entrants. The top ten winners - all of them recent "gold" certificates - were Brenda Albright and Shreiner of the Brown County Vo-Tech School; Whitman of Upper Merion County Vo-Tech; Long, Brownstown; Goodhart and James West, Jr., both from

NORTHCO HOG SYSTEMS

Properly managed Northco systems produce top quality hogs profitably with a minimum of labor. All components of a Northco confinement system are designed to deliver maximum returns on the investment you put into swine production.

Farrowing

Northco Farrowing systems provide complete control over sow and litter. All crates are ruggedly constructed to deliver years of service. Special pig brooders target "zone heat" into the little pig area.

Finishing

Feed delivery is automatic yet the amount for each pen can be regulated separately. Pen partitions are sturdy and designed to aid in cleanliness. Northco's ventilation system draws fresh air from sidewall intakes, while exhausting warm humid air through roof exhaust ventilation units.

INDIVIDUAL COMPONENTS

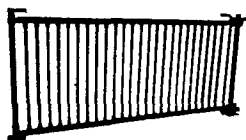

Superior design and engineering quality can be found in each Northco equipment component. Available separately.

FFA Week

[Continued from Page 16]

Mount Joy Vo-Tech School; Debbie Beshwor, Western Montgomery County AVTS; Kathy Swartley, Upper Bucks; Mary Lou Zuck, Mt. Joy; and Susan Humphreys, Western Montgomery AVTS. The top winners in the contest will go to the National FFA Convention this Fall; third and fourth place winners have a trip

earned to the Eastern States Exposition competition.

In the chapter procedures contest, the Cloister FFA Chapter team from Ephrata won first place. Members were: Donna Bender, Ron Zimmerman, Larry Burkholder, Kerry Boyd, Dennis Martin, Jay Foltz, Cliff Martin, and Bob Fox. Placing second was a team from Northern Lebanon

High School, followed by Kennard-Dale High School, York County. As champions, the Cloister Chapter received \$400 for a trip of its choice.

Ephrata youths continued their winning ways as they took first and second places in the dairy foods contest. Leading the pack of 39 contestants were Hans and Lamar Groff, followed in third place by Danny Brooks of Oxford. "Silver medal"

winners in the contest were Jeri Brown, State College; Wayne Heimbach, Selinsgrove Area; and Tony Eberly, Ephrata. The two Groff boys and Brooks will go on to national contests as a part of their reward for their achievements here.

The poultry contest was also overshadowed by Lancaster County FFA'ers, as only five of the first 14

GO BIG RED

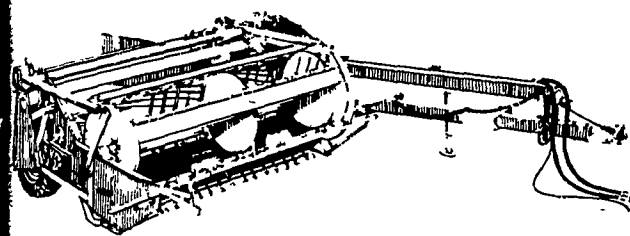

HEY . . . HAY . . . HAY . . . HEY . . . HAY . . . HAY

USE  TO SQUARE BALE IT!!!

USE  TO ROUND BALE IT!!!

USE  TO CUT AND CONDITION IT!!!

Save all of the
quality that's in
your hay crop

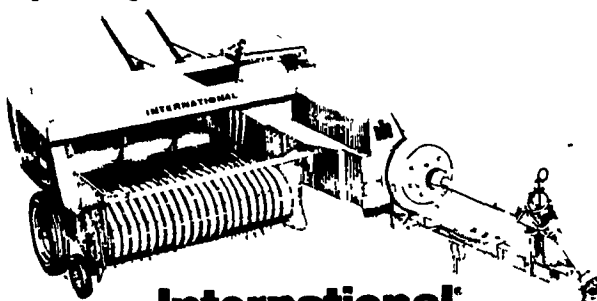

International 990 Mower-Conditioner

Get in and out of the field fast, and do a better job to boot. With the 990 you get clean cutting, and complete conditioning, whether your crop is heavy and tall, or thin and short. No machine you can buy offers you more in the way of quality construction, or ability to handle your needs.

- Choice of 7 or 9-foot widths, IH balanced head knife drive runs smooth, even at high speeds
- Big 44-inch reel runs at lower RPM to save leaves, treat crop gentler
- Controlled flotation platform cuts clean over uneven ground to save more crop
- Conditioner rolls adjust automatically to crop volume for uniform drying, open hydraulically to clear slugs
- Windrow placer attachment lets you put windrows in close-together pairs

Check out the
balers with the
capacity reputation!

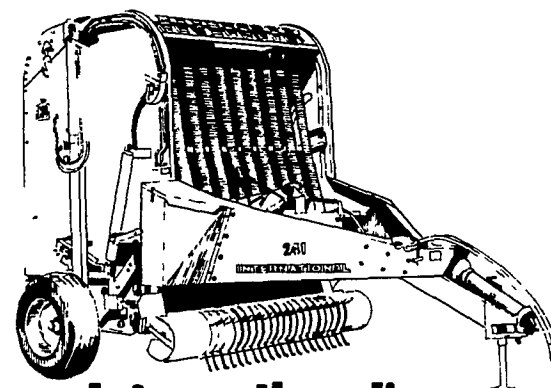

International 430/440 Balers

Even if you're not a big producer, it pays to have plenty of baling capacity. But there's a lot more than capacity in IH balers—there's gentle handling, durability and simple servicing as well. Find out why they're first choice.

- 430 — Bales up to 17 tons per hour, twine or wire-tie, 65-in pickup
- 440 — Bales up to 19 tons per hour, twine or wire-tie, 65-in pickup
- Floating auger feed accommodates heavy or light hay flow automatically
- Big power trains assure high-capacity baling, durability, all-welded plunger runs at 75 SPM to produce easy-to-feed hay charges
- Custom pickups available with extra teeth to handle difficult crops
- Extra-rugged frames keep all parts in alignment, even over roughest fields

Bigger savings with big
round bales start here

International 241 Bigroll Baler

The many superior features of IH Bigroll Balers give you extra time, labor and quality-saving benefits. Included is the ability to make full 6-ft diameter bales with loose cores that permit "breathing," yet have extra-tight surfaces for maximum resistance to weathering. And you also get dump-and-go convenience, which means you don't have to back up to eject in order to get all of the windrow when starting a new bale.

- Exclusive lower belt tracking system lets belt float to tolerate loads, reduce wear
- Exclusive individually replaceable upper belts
- Exclusive twine guide positioning indicator for more convenient and twine-saving wrapping performance
- Exclusive vertical hitch adjustment to maintain level baler operation

Nostalgia is at the Farmfest

Editor's Note: The following is re-printed with permission from Ciba-Geigy's AGRI-NEWS publication. More than one million people are expected to attend Farmfest 76 activities to be held near Lake Crystal, Minn. from September 13 through 19.

Organizers of this

bicentennial agricultural event are in final stages of planning that will lead to a wide variety of exhibitions, sporting event, entertainment, equipment and product displays and historical glimpses of agricultural practices and rural life.

One of the many highlights of Farmfest will be an ex-

tensive "living history" exposition, whereby visitors will have the opportunity to walk through periods of agriculture's past.

Among points of interest will be a recreated 1500 Indian farming village complete with earthen lodges. Several varieties of corn and squash common to that era will be grown on the village grounds.

Also, Future Farmer of America members from every state will operate a 1900 farm that will include a homestead, two barns, additional outbuildings and appropriate machinery. The FFAers will be dressed in turn-of-the-century clothing.

Farmfest officials are enthusiastic about its collection of antique, working agricultural equipment. "It's the largest collection of its kind, and persons from all over the U.S. are bringing in this rare equipment, some of which is one-of-a-kind. Many of the machines will be operating in fields right along with the modern equipment," says Farmfest Advertising and

Promotions Manager Duane Leach.

Other nostalgia features will be an assemblage of vintage store fronts; at least 20 exhibits showing skills of early American agricultural craftsmen, such as wheelwrights and harness makers; and a special area devoted to threshing machine demonstrations.

The main ag sports attraction is the 20th World Championship Tractor Pull with a purse of \$40,000. Farmfest officials are predicting that it will be the largest pull ever conducted.

In addition, there will be the World Championship Horse Pulling Contest with a \$10,000 purse, the National Horse Plowing Contest, a bicentennial invitational horseshoe pitching meet and other similar events.

For entertainment in its large outdoor amphitheatre, Leach says that several top stars have been contacted, and an announcement about celebrities will be made in the near future.

Leach reports that between 700 and 800 exhibitors

will be showing their products and equipment and demonstrating their services at Farmfest.

Lake Crystal is 70 miles southwest of Minneapolis and St. Paul and 12 miles southwest of Mankato. The Farmfest site is three miles

west of Lake Crystal on state highway 60 and covers 1,200 acres.

For general information including advice on accommodations - contact Farmfest headquarters at P.O. Box 76, Lake Crystal, Minn. 56055.

What's New

TEMPERATURE SENTINEL

Sierra Environmental Products offers its Model 3551, a combination frost alarm and degree day counter.

The Model 3551 can be used in the winter and spring to warn of impending frosts, and in the summer and fall to total the number of hours the crop is exposed to temperatures above a selected set point.

The Frost Alarm and the Degree Day settings are adjustable over the full range of the instrument. If the frost set point is 35 degrees Fahrenheit, each time the temperature drops below 35 degrees Fahrenheit, an alarm is sounded and a counter is started and will continue to count until the temperature goes above 35 degrees Fahrenheit, thereby indicating the length of time the temperature was below the set point. The audible alarm can be switched out of the circuit at any time by the

operator. Similarly for crop selection and growth studies the temperature set point can be set at 50 degrees Fahrenheit and in a similar manner the number of hours the outside temperature is over the set point will be computed on the Running Time Meter. The meter is resettable, has five digits and can record up to 9,999.9 hours.

The temperature range for this instrument is 20 degrees Fahrenheit to 110 degrees Fahrenheit. Other ranges can be furnished. The instrument probe is supplied with 50 feet of cable. Additional wire, up to one mile, can be provided. Power requirements are 110V AC, or 12V DC.

O.J. Roberts wins

In what is by far the largest contest every year - dairy judging - more than 200 students competed for top honors. When the scores were all added up, the winner was David Nolan of the Owen J. Roberts School in Chester County. His brother, Robert, placed fifth. Second place belonged to Ephrata's John Weiler. Third place went to a Bedford County boy, Steve Ritchey, while Norlebo's Gary Lentz checked in fourth. The first 18 finishers were designated as "gold medal" winners. Finishing the list then, in order, beginning with sixth place, were: Kevin Holtzinger, Bermudian; Eric McMillan, West Perry; Leonard Greek, Red Lion; Nedra Yoder, Hamburg; Dale Bechtel, Central Cove; Ed Geidner, Wilmington; Edward Kulp, O.J. Roberts; Dennis Kulp, Manheim; Jim Breneman, Penn Manor; Claude Hoffman, Cowanesque; Kora Pettit, Gen. McLane; Tim Beardslee, Troy; and Glenn Crowl, Red Lion. The "silver medalists" in

dairy judging were, ranked in order according to point scores: Ron Clark, Solanco; Patrick Arnold, Eastern Lebanon; Leon Crowl, Red Lion; Ron Learn, Purchase Line; Michael Sanders, Mifflinburg; Curtis Martin, Ephrata; Bruce Kreider, Solanco; Allen Hostetter, Annville; Marshall Trimble, Solanco; Mike Martin, Pequea Valley; Robert Witmer, Lampeter; Bill Ocker, Shippensburg; Ed Breckbill, Oxford; Michele Gladney, Kutztown; Joel Rose, United; Chuck Groff, Lampeter; David Dunika, Derry; Tim Weaver, Garden Spot; John Kolesar, Athens; Roger Graybill, Juniata; Elvin Mast, Octorara; and Harold Hawn, Juniata Valley.

In team competition, the dairy judges from the O.J. Roberts Chapter scored a total of 1001 points to beat the second-place finishers from Red Lion who had accumulated 956 points. Ephrata's team placed third - just a point ahead of fourth place Solanco. Next, in order, were teams from Lampeter-Strasburg, West Perry, Shippensburg,

AGRI-KING

KEY TO PROFIT

YOU MAY THINK YOU HAVE A SUPER HERD NOW . . .

Do your calves have problems?

Do your calves have scours?

Did you realize that most cases of scours are due to malnutrition?

Did you realize that most milk replacers on the market today are deficient in vitamins and minerals.

BUT! THIS COULD BE YOUR FUTURE HERD

Add "SUPER CALF" to your milk replacer to make it the best on the market. "Super-Calf" . . . It's a small price to help raise a healthy, high producing future herd!!!

MIGHTY 12 VOLT SUPER POWERED BATTERY OPERATED ELECTRIC FENCER

Here is the fencer you've been waiting for to do those tough jobs on your longest stretch of fence, over extremely dry ground. Modern as the newest 12-volt powered automobiles, tractors and other farm equipment.

THE PARMAK FIELDMASTER is the SUPER FENCER in every way. Super powered by 12-volt battery power — produces nearly double the shock of an ordinary fencer — Super effective, gives SUPER holding power through even the most drought blistered soil — Super efficient, charging longest lengths of fence possible — Super economy in both original cost and longer battery life.

Built and fully guaranteed by the maker of the world's largest selling electric fencer — the oldest name in electric fencing.

Carries the famed Parmak brand — the fencer preferred across the land. Remember Parmak Fieldmaster packs the greatest wallop of them all.

Cowtown Rodeo results tallied

Wyatt Crotta of Bethany, Conn., beat Kaye Kirby of Woodstown, N.J., in what would have been a triple, triple! Kirby has won all the Cowtown Rodeo Riding events two weeks in a row and would have made a repeat performance, but the judges ruled Crotta made a better show. He won the Saddle Bronc Riding event by 6 points, with a mark of 65 for \$119.56.

Kirby went on to win the other two riding events. Marked a 70 in Bare Back Riding for \$150.92 and on a Brahma bull named Red Spot, he stayed with it for a high 76 for \$245.00, making a total of \$395.92, still keeping the lead for top money won.

Penns Grove resident, Joe Merola, made a time of 14.8 for \$272.44 in the calf roping.

Want to earn over \$23.00 a second? Try steer wrestling. Butch Dase threw his steer in 10.5 seconds for \$248.92.

Lorraine Alexander tied her last week's time exactly at 17.94 seconds in the barrel race. Lorraine has been top winner for three consecutive weeks.

Total purse for the evening

was \$3,106.60 which was distributed between the winners from among 104 contestants.

Bare Back Bronc Riding \$377.30

1. Kaye Kirby, Woodstown, N.J., 70, Tumble Weed \$150.92; 2. Jimmie Lee Walker, Cowtown, N.J., 64, Step & 1/2, \$113.19; 3. Jack Meli, Farmingdale, N.J., 63, Cochise, \$75.46; 4. Stanley Thomas, Woodstown, N.J., 62, Sargent, \$37.73.

Saddle Bronc Riding

1. Wyatt Crotta, Bethany, Conn., 65, Faraway, \$119.56; 2. Grant Harris, Cowtown, N.J., 59, Black Mt., \$89.67; 3. R. L. Tolbert, Miraloma, Ca., 43, Shiloh, \$29.89; 4. Ground Split Tom Swenson, Spark Bewley, Frank Burns, Willie Ed. Walker Steve Coheen, Kaye Kirby \$4.99.

Bull Riding

1. Kaye Kirby, Woodstown, N.J., 76, Red Spot, \$245.00; 2. Abe Morris, Woodstown, N.J., 71, 19c9, \$183.75; 3. Chris Risoli, Madison, Fla., 65, Luigi, \$122.50; 4. Wyatt Crotta,

Bethany, Conn., 57, Cat Power, \$61.25.

Calf Roping \$681.10

1. Joe Merola, Penns Grove, N.J., 14.8, \$272.44; 2. Bob Roberto, Haskerl, N.J., 17.0, \$204.33; 3. George Alala, Haskell, N.J., 17.2, \$136.22; 4. Andy Jackson, Peachbottom, Pa., 17.8, \$68.11.

Steer Wrestling \$622.30

1. Butch Dase, Staten Island, N.Y., 10.5, \$248.92; 2. Marty Fink, Eagle Cliff, N.J., 14.1, \$186.69; 3. Sher-

man Shidner, Woodstown, N.J., 20.6, \$124.46; 4. Charles Buetti, Staten Island, N.Y., 21.4, \$62.23.

Girl's Barrel Race \$514.50

1. Lorraine Alexander, Newton, N.J., 17.94, \$149.20; 2. Joann Troast, Lebanon, Pa., 18.12, \$123.48; 3. Dale Bibbo, Spring Valley, N.Y., 18.14, \$97.76; 4. Kathy Troast, Lebanon, Pa., 18.31, \$72.03; 5. Helen Karecky, Freehold, N.J., 18.51, \$46.30; 6. Pat Yearsley, 18.58, \$25.73.

What's New

Hubbard Issues New Edition Of Breeder Management Guide

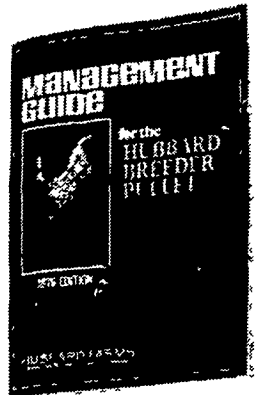

A new 1976 edition of the popular Hubbard Breeder Pullet Management Guide has just been released by the Research and Development Division of Hubbard Farms, Walpole, NH.

Several changes have been made from the editions of previous years, reports Dr. J. H. Smith, division head, particularly in feeding and weight control recommendations.

The new 1976 edition contains a completely revamped center fold chart

to reflect new feeding recommendations and performance goals. This 16-page booklet, sometimes referred to as the "blue book," covers in detail such topics as lighting programs for optimum laying performance, body weight control, feeding recommendations, nutrient levels, housing and equipment requirements.

Copies of the 1976 Hubbard Breeder Pullet Management Guide may be obtained by writing Hubbard Farms, Walpole, NH 03608.

P. L. ROHRER & BRO., INC.

SMOKETOWN, PA

PH. 717-299-2571

This cattleman chose to cut middleman

By DIETER KRIEG
STEWARTSTOWN - John Marsteller, a York County cattleman who last year fed 380 steers, believes there are a lot of consumers "out there" who would prefer buying their meat right at the farm instead of in the supermarket. He has been trying the retail route for a couple of years and is now so sold on the idea that he'd like to put up his own butcher shop.

One of the major reasons for Marsteller's unorthodox method of marketing is that beef prices have not been at the level they should be. One yardstick he uses to illustrate the fact is that land in this part of York County was selling for \$250 per acre in the 1960's and now it's up to \$1100 per acre. Beef prices, in comparison, haven't quite doubled.

Marsteller, like many of his fellow cattlemen, says he should be getting around 50 cents per pound for his better animals. If prices don't improve, he predicts more cattlemen will try direct marketing.

Located a half hour's drive south of York, and an hour's drive north of Baltimore, the York County cattleman has no real population centers close to him. In spite of this, he managed to sell 80 head directly to customers last

year. His primary method of advertising has been through the customers themselves. "People say it's the best beef they ever had," claimed Marsteller, adding that they always come back and tell others about them. Aside from this word-of-mouth advertising, he places a small ad in the York paper. Business is expected to grow and Marsteller and his wife are preparing themselves for it.

A recipient of the American Farmer Degree in 1954, and an Outstanding Young Farmer Award winner 10 years ago, Marsteller sees no clear-cut disadvantage to being in a rather remote area. For one thing, small towns are all around him and developments are sprouting right next to his farm. Secondly, he's within reach of workers who commute back and forth to either Baltimore or York. In fact, he even has customers in Washington and Philadelphia.

Retail customers prefer a different kind of animal than buyers at the stockyards, Marsteller found out. For this reason he keeps a herd of Charolais cattle on hand since they lose less than 25 per cent of their weight when dressed and the cuts contain less fat. Fatter animals go to stock yards in Lancaster

County, Marsteller explained.

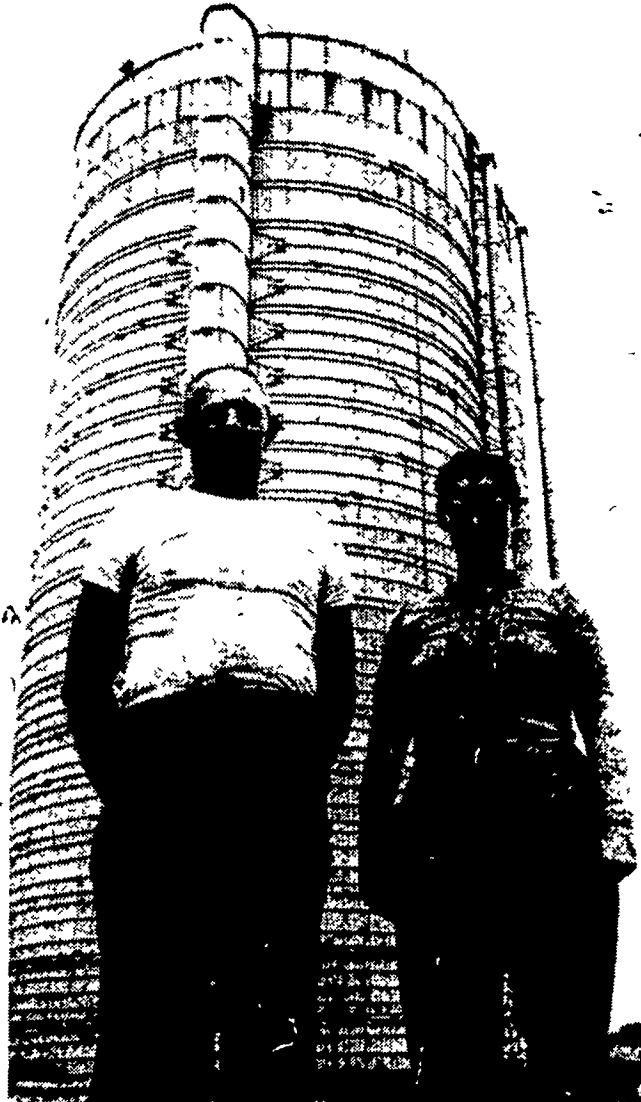

Buying nearly all of his feeders from Virginia, Marsteller raises them on corn silage and high moisture corn. He grows his feed on 375 tillable acres of

his own and an additional 125 acres of rented ground. Cattle come in at a weight of 600 to 700 pounds, and go out at approximately 1000 to 1100 pounds. The farm couple is especially proud of one of their Charolais which

dressed out at 833 pounds. Marsteller has cut out the middleman in more ways than one in that he also sells a number of his cattle directly to dealers in Maryland. "I'm omitting the commission," he explained simply.

Asked for his thoughts on the fluctuating beef market,

Marsteller offered definite answers. In his opinion he shared is cattle predictions especially those put out by the government - tend to "mess up the market." That's another reason why he's decided to take more of the meat producing business into his own hands.

Mr. and Mrs. John Marsteller, York County, are very happy with the results they've had in selling their beef animals directly to customers.

What's New

Heavy Duty, Quick Attach Loader

A heavy duty, quick attach loader for MF tractors has been introduced by Massey-Ferguson. The MF 246 Quick Attach Loader is designed for use with MF tractors of 80 to 120 PTO hp and will feature a lift capacity of 4,500 lbs. Combination buckets will be available in 60-, 72- or 84-in. sizes.

The new MF 246 loader utilizes the same design

principles and mounting procedures as the small MF 236 QA loader.

After permanent mounting brackets have been installed on a tractor, the MF 246 can be attached or removed in less than five minutes by using tractor hydraulics and movement. The loader locks firmly into the mounting brackets with two over-center wedges under spring pressure. No tools are required.

MEYERS FORAGE WAGONS

Ernest Sipel, well known cattle dealer of Columbia, N.J. is shown standing beside a new Meyers Forage Wagon he recently purchased from Seiple's. This is the second Meyers Forage Wagon he has purchased from Seiple's in the past several years. The first Meyers was so satisfactory, that he decided that he would like to have another one.

In Mr. Sipel's opinion, the Meyers Forage Wagon is as good as any and better than most.

Clawson of Derry Area; Jean Forcey of Clearfield Area; and Tammy Shires from East Lycoming High. The best Southeastern Pennsylvanians were both from Oxford - Angela King and Renee McCardell, who placed first and second, respectively, in the silver medal category.

The W.B. Saul School from Philadelphia captured first and second places in meats judging. Joseph Gerofsky took high individual honors, with fellow student, Gerald

(Continued on Page 26)

MUELLER FRE-HEATER™

**EXPLANATION OF THE REVOLUTIONARY
NEW MUELLER "FRE-HEATER™"
FOR THE DAIRY FARM**

Bulk milk coolers on modern dairy farms remove heat from the milk promptly after it is produced. To accomplish this requires refrigeration machines and they are generally of the air-cooled type. Air-cooled condensing units literally "throw away" this valuable heat.

On these same farms, large amounts of hot water are needed for "prepping" the cows, washing the milk cooler, the pipeline milker, other equipment, and the milking parlor itself. It is also advantageous to heat the cows' drinking water in winter.

The Mueller Fre-Heater conserves energy and provides "free" hot water by capturing the heat now wasted!

HERE'S HOW IT WORKS:

Rather than using noisy, dust-creating fans with fragile, dirt collecting air-cooled condensers, the refrigerant is routed to a specially designed condenser/heat exchanger and its heat is transferred to the water.

A thermostatically controlled valve delivers 145° F water to the storage tank.

In addition to the thermostatic valve, a mixing valve is provided to permit "prepping" temperature water.

Thus, the Fre-Heater delivers two temperatures of water — prepping and washing.

Tests indicate the Fre-Heater consumes 10% less power than an air-cooled system . . . and you get Free Hot Water!

ELIMINATES REFRIGERATION SERVICE PROBLEMS!

The most common causes of slow cooling in bulk milk cooling systems are related to the air-cooled condenser.

Three things which frequently reduce the efficiency are

1. Poor air circulation and recirculation
2. Fan motor failures
3. Dirty or clogged condenser fins

Air-cooled condensing units are generally installed out of doors in order to assure adequate air supply to the condenser. This exposes the compressor to extreme ambient temperatures. Starting problems and compressor failures have resulted and air-cooled condenser units are always noisy.

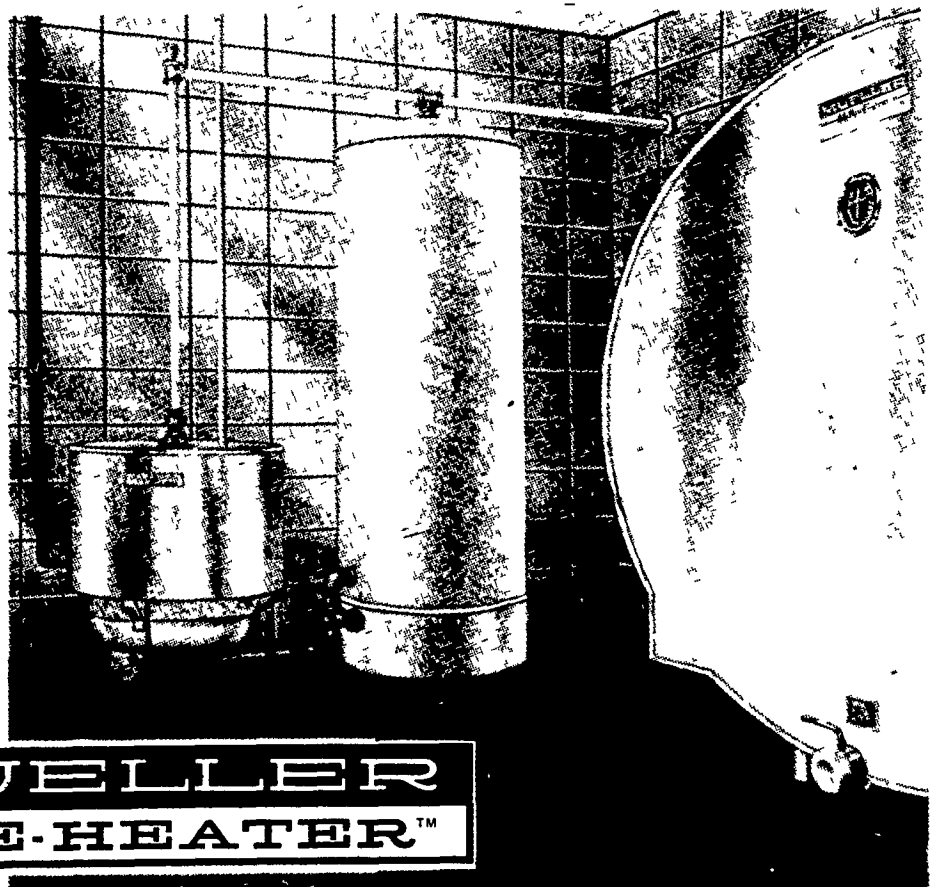

The Fre-Heater eliminates these problems because:

- There is no air-cooled condenser.
- The Fre-Heater is installed indoors.
- There are no fans to generate noise.
- The head pressure is very stable — assuring longer compressor life.
- There are no cold weather starting problems, plus . . . the Fre-Heater conserves energy and produces Free Hot Water!

Ms. Porter

[Continued from Page 1]

Eastern invited Ms. Porter to a dairy farm in the Northeast to have her observe its operations, problems and achievements.

Other resolutions concerning the well-being of dairy farmers were presented and acted upon.

They called for the Association to sponsor environmental legislation and regulations which are in the best interests of dairy farmers, and to encourage support of legislation which would increase the present estate tax exemption for dairy farmers.

The 200 member policy-making body also resolved to encourage dairy farmers to adhere to prescribed instructions for use of antibiotics in treating dairy cows and withhold all milk from these cows for the period of time required by law.

Eastern's delegates urged all states in which its membership resides to appropriate funds for providing calfshead vac-

cination for brucellosis prevention.

Willard H. Blanchard, dairy division marketing specialist of the United States Department of Agriculture was the main speaker at the annual meeting held here in Syracuse on June 9.

Blanchard told Eastern's delegates and guests that the USDA is reviewing milk prices, taking into consideration both production costs and consumer demands. He noted that Federal Milk Marketing Orders could be improved.

The Justice Department and Federal Trade Commission lack understanding of the dairy situation, he said, and producers must present their side of the story.

USDA decisions are now being made in the framework of participation with various government departments and consumer advocates, he commented.

Sandwiched around

Blanchard's talk on June 9, were the presidential address by Arden Tewksbury of Meshoppen, Pa. and the general manager's report by John C. York. Both called for a new milking pricing formula which could not be manipulated.

Tewksbury also urged use of "a proper supply-management program." He said this could be the answer to the problem of milk production to fit the needs of the market in order for dairy farmers to realize the kind of income necessary to meet their costs of production and receive a reasonable profit.

He said marketing conditions must be improved so that cooperative organizations "can exist and remain viable to serve dairy farmers in the most efficient way possible."

York also said that "some problems affecting the industry must be watched carefully in the future." These include, he said:

Trade barrier - there should be no barrier to the movement and distribution of milk.

Securities regulation - The Securities Exchange Commission will be carefully looking upon agricultural cooperatives for financial integrity in the future.

Anti-trust action - this is a problem, but Eastern has not been involved in any investigations in this area, he said.

The two-day convention concluded with a bicentennial salute to America during the cooperative's annual banquet. Plaques of appreciation were presented to three retiring directors from Eastern's Board. They were Donald Jones, Homer,

N.Y. who was succeeded by Robert K. Hill, Elbridge; Robert Wilson, Franklinville, N.Y. succeeded by William Raybuck, Fairmount City, Pa. and Kenneth Theobald, Canton, N.Y. succeeded by Lewis Brander, Lisbon.

J. Wilbur Burkholder of Chambersburg, Pa. was the recipient of the 1976 Eastern Member of the Year Award for his accomplishments in the field of dairying.

For outstanding reporting of agricultural news, Eastern's 1976 News Media Award went to the Roe Jan Independent of Copake, N.Y., a weekly newspaper.

Charlene Maust, the Pennsylvania State Dairy Princess from Berlin, Pa., well-received by the overflow crowd of 800 people, was presented Eastern's Certificate of Appreciation following her speech on milk and the dairy industry.

Distinguished Service Plaques were awarded to the following employees: Richard Franklin, Grover, Pa.; Richard Dye, Fort

Plain, N.Y.; Marvin Hewitt, Greensboro, Md.; Harris Lyon, Ligonier, Pa. and J. Paul Walizer, Bellefonte, Pa. The banquet closed with a

chorus of civic-minded citizens supporting Jack Gardner of Syracuse with a heart-stopping number of patriotic songs.

WHO'S MINDING THE MILK?

If you depend upon your milk check for a living, who's minding your milk?

The least expensive, one-shot insurance you can get is the Sentinel — the 10-inch recorder which charts temperature of your milk-cooling or holding tank. Here's what it provides:

- Permanent proof that proper temperature was maintained.
- Record of cooling equipment efficiency.
- Cleaning temperature recording on the same chart.

The Sentinel is also available with provision for actuating an alarm or warning light if pre-set temperature is exceeded.

Remember — if it prevents the loss of only one tank of product, the Sentinel has paid for itself. It minds your milk.

ATTENTION DAIRY FARMERS

MOST DAIRY EQUIPMENT INSPECTORS RECOMMEND WATER CONDITIONING...

- Helps prevent milkstone — the culture center for bacteria.
- Helps prevent water heater scale formation which reduces heat transmission, wastes energy and shortens water heater life.
- Helps prevent inefficiency and malfunctions in dairy equipment and pipe lines caused by hard water scale build up.
- Provides more efficient use of dairy detergents.

PROTECT YOUR FARM DAIRY EQUIPMENT AND PIPE LINE SYSTEM FOR LESS THAN 1% OF YOUR TOTAL INVESTMENT!

FFA Week

[Continued from Page 23]

Lewis, right behind. In third place was Rick Falk from Penn Manor, followed by Bryan Grove of Red Lion. Chalmers Crawford, also from W.B. Saul, checked in next, with Jeff Klahold from Eastern behind him. Completing the top winner's list were two Lancaster Countians, Rick Sweigart from Ephrata and Lewis Witmer from Penn Manor.

Donna Lansberry, a pleasure horse enthusiast from Cedar Crest High School, won first place in her specialty - horse judging. Elizabethtown's Mary Seward checked in second, followed in order by: Kim Krem, Linesville; Wendy Brown, Central Columbia; Diane Miller, W.B. Saul; Margaret Fye, Admiral Perry AVTS; Glenn Camp, Blackhawk; and Carol Geiger, Blue Mountain.

The Lebanon Vo-Tech boys really fixed things in the small engines contest as they pistoned their way to the top in both team and individual categories. Bruce Rambler and Joe Early were the champs. Rick Gross and Glen Hoffman, both from Halifax Area High School in Dauphin County placed third and fourth, respectively. Next in the competition were two Manheim Central Youths, Jay Gainer and Darryl Wenger.

In the agronomy contest, Adams Countians were most visible. Ben Bishop heads the list with a first place,

followed by fellow Gettysburgian Tim Baker, who checked in fourth. Fruther down the list were Russell Reading, Gettysburg; Brian McCleary, Biglerville; and Tim Ebersole, Bermudian Springs. A Lower Dauphin youth, Dennis Teets, was sixth and Joe Mayer from Mifflinburg was third. In second place was Clifford Wallace from Mohawk High School in Lawrence County.

Penn Manor's Craig Harnish took a fourth place "gold" in the agricultural mechanics contest, which was won by a Clarion County boy, Jeff Wilson. Harvey Bitler from Twin Valley received a "gold" in the same contest by placing sixth. He was followed by Doug Thomas from Biglerville.

In the agricultural salesmanship contest, Mark Mummert from Dover outsold his 35 competitors to place first. Jean Walter from Columbia County placed second, followed by Ronald Schiller of Philadelphia. Next was Becky Walmer from Cedar Crest.

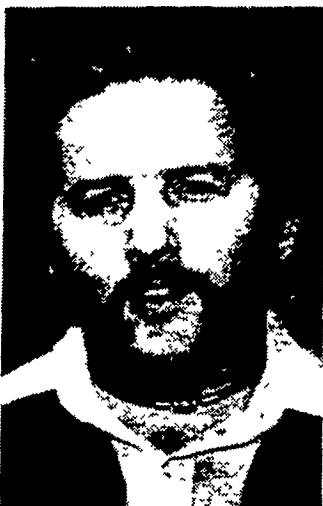

Brian Dize of the Western Montgomery County Vo-Tech School was the best nursery landscaping competitor, placing at the top in a field of 46 which was strongly dominated by vo-tech schools. Lebanon County AVTS's Kathy Defoe placed second, followed by Suzan Suits of Montgomery County.

Barley

[Continued from Page 1]

expected to drop by this weekend and millers in this area express overall satisfaction with what they're getting so far. The quality of the barley is good and the average weight per bushel is around 47 pounds, reported one handler.

Lancaster County barley growers ordered combines into some of their fields early this week, and it's estimated that a fifth of the crop may be off by the weekend. Rain interrupted the schedule, of course, bringing back memories of the rain delayed wheat harvest of 1975.

Ron Hershey

Training completed

CEDAR RAPIDS, Iowa - Ron Hershey of Gap, field manager with Vigortone Products Company, recently received a diploma from the Vigortone Sales Management Institute held here.

He completed an intensive one-week course of study involving livestock nutrition, product knowledge, territory management and sales techniques. He was presented his diploma by Vigortone's president, Art Swarzenruber.

Barley prices remained relatively unchanged from a week ago, with dealers quoting paying prices ranging from \$2.00 to \$2.20. In other small grains, however, there have been some changes since last week, when prices were reaching for the sky and feed companies were becoming just a bit concerned about buyer resistance.

While barley yields have been described as being spotty, there's no explanation which would seem to cover all situations. One reason suggested by a Lancaster County grain handler is that some fields may have been hurt by cold weather. He noted that he had heard of some fields in Berks County yielding only to the plow due to poor stands.

Nevertheless, the same

dealer remarked that "it is surprising how the barley headed up," although the straw is described as being short most everywhere.

The wheat harvest on the Eastern Shore of Maryland reportedly started this past Wednesday. It's expected to get underway here by the end of this month.

Although there are probably a variety of

reasons as to why prices showed such dramatic increase in recent weeks (they've since then dropped slightly) the major reasons cited are 1. weather patterns in the Midwest (drought), 2. export demands were sharp, 3. strong demand for protein, and 4. low fish meal production. Grain prices are expected to remain strong for another four to six weeks.

READ LANCASTER FARMING FOR FULL MARKET REPORTS

ATTENTION: Cattlemen For better herd health and a good calf crop

Feed Bovotone 20-R

Fortifying brood cow rations is just as important and every bit as complex as fortifying feed lot cattle rations. That's why Vigortone developed Bovotone 20-R. This proven pre-mix assists the cow-calf man in providing the proper levels of nutrition so important to achieving an excellent calf crop and good herd health.

Bovotone 20-R for poor quality roughages

Bovotone 20-R has been specifically formulated to meet the needs of beef cattle consuming poor quality roughages such as weathered range grasses, corn stalk fields or other harvested field aftermath. Since these kinds of roughages make up the bulk of the brood cow's diet

during the winter season, it's more important than ever to fortify them properly.

In addition to high levels of vitamins and minerals, Bovotone 20-R also contains live cell yeast culture. For year-around feeding, you can't beat 20-R.

Bovotone No. 70

During those periods of the year when grass tetany is a problem, feed Vigortone's Bovotone No. 70. This pre-mix contains a high level of magnesium. Unlike other products containing abundant magnesium, Bovotone No. 70 is highly palatable and easier to feed.

See your Vigortone serviceman soon for all the details on why more cow-cattlemen are feeding Vigortone pre-mixes—especially now.

Kerstetter speaks at Reading Fair banquet

JUDY MITCHELL
Berks Co. Reporter
READING - Speaking at the Reading Fair Award Banquet held at the Lincoln Hotel on June 15, the Pennsylvania Secretary of Agriculture Raymond J. Kerstetter expressed his appreciation for being part of the fair held in honor of the Outstanding Grange Family, the Outstanding FFA girl and FFA boy and the Outstanding 4-H boy and girl.
American farmers were the source of strength in our past," he told the audience which included 17 previously honored families, "just as today they are the source of strength of our nation's future."
"We have always admired the spirit of our county and its farmers," Kerstetter went on. "It is through our efforts that the town people learn what our farmers are doing. The Reading Fair has always been a highlight of the season," which, he said, is a tribute to the fair and its directors.
Wayne Readinger, vice president of the fair association, was master of ceremonies at the banquet. He is one of the major organizers of the fair on June 19.

family," he said, "and there is no other fair in the entire state that is and has been doing this for the past 20 years."

Readinger, who is also the fair's agricultural director, introduced the other directors of the fair, pointing out that "most of them are farmers," and "all are involved in agriculture except for one, who is a banker." He humorously concluded, "We are glad to have him." Readinger also introduced the fair association president Linda Vicari who presented the awards.

Mae Blieler, assistant home economist with the Berks County Cooperative Extension Service, introduced the Outstanding 4-H girl, Mary L. Schuler, daughter of Mr. and Mrs. Harold W. Schuler of Fleetwood R3.

Charles Suloff, associate county agent for the Extension Service, presented the Outstanding 4-H boy, John L. Keim, son of Mr. and Mrs. John L. Keim of Kutztown R2.

Mrs. Phyllis Hechinger, home economist instructor at the Kutztown Area High School, introduced the Outstanding FHA and FFA members honored. They were: Linda Rothenel, daughter of Mr. and Mrs. Paul Rothenel of Kempton

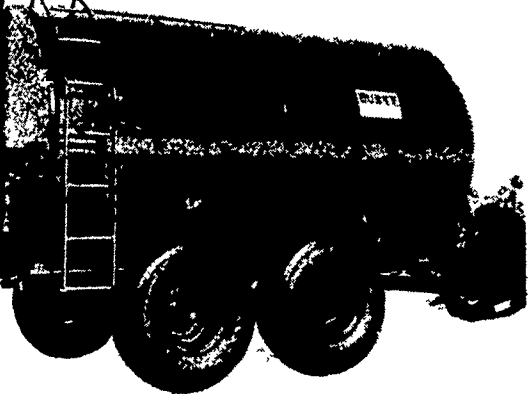

Pennsylvania Secretary of Agriculture Raymond J. Kerstetter spoke at the Reading Fair banquet honoring outstanding people in the field of agriculture. Here Kerstetter (seated) is shown with the youths who were honored. Counterclockwise from left they are: Linda Rothenel, daughter of Mr. and Mrs. Paul Rothenel of Kempton R2, outstanding FHA member; Dale G.

Siegfried, son of Mr. and Mrs. Paul J. Siegfried of Mertztown R2, outstanding FFA member; John Keim, son of Mr. and Mrs. John L. Keim of Kutztown R2, outstanding 4-H Club Boy; and Mary L. Schuler, daughter of Mr. and Mrs. Harold W. Schuler of Fleetwood R3, outstanding 4-H Club Girl.

Mr. and Mrs. Robert Kieffer and family were chosen Outstanding Grange Farm Family at the Reading Fair Banquet held recently. Seated left to right are Janice, Mrs. Gladys Kieffer, and Lisa;

standing left to right are Kenny, Ronald, Robert Kieffer, Richard, Randy Moyer, son-in-law, and Leona Moyer.

Milk promotion is booming

WASHINGTON — Continued expansion in milk production is probable for the rest of 1976 since milk-feed price relationships are expected to remain favorable to heavier concentrate feeding. Although pressures for greater herd culling are building, the declines from a year earlier in milk cow numbers likely will remain modest. Total 1976 milk output could exceed 1975's 115.5 billion pounds by around 2 billion pounds. The gain could be larger or smaller, depending on cull cow prices, milk prices, feed costs, or developments in the general economy.

Widespread increases in March milk production brought first quarter output to 29.0 billion pounds, up almost two percent from 1975 on a daily average basis and the largest production in four years. Milk cow numbers in March were down only one percent from last year and unchanged from February. Although the decline from a year earlier was slightly faster than in early 1975, it remained slow compared with earlier years.

Milk production per cow was up more than three percent in March, the sharpest year-to-year gain since September 1974. Increases in output per cow have been induced by heavier grain feeding this year. Farmers reported feeding five percent more grain and other concentrates on April 1 than a year ago.

Farmers received an average \$9.48 per hundred pounds of milk in April, 82 cents below the December peak but \$1.34 above last April. The average milk price was buttressed by a counter-seasonal rise in manufacturing milk prices since February, reflecting

higher wholesale prices for butter and cheese.

Farm milk prices likely will decline in the face of strong flush season milk production but will average 10-15 percent above a year earlier during the flush. Milk prices could post a fairly strong seasonal rise during the second half of 1976, but increases are not likely to match 1975's rapid rise.

Cash receipts from dairying were up almost a fourth during January - March due to much higher prices and larger marketings. Last year, dairy income was almost \$9.9 billion, up five percent from 1974.

Wholesale butter and cheese prices have been rather unsettled since the first of the year. After strengthening counter-seasonally from February, butter and cheese prices were above support purchase prices in early May. Nonfat dry milk prices were close to support levels and small net purchases have been made.

Prices of milk and dairy products at retail declined slightly in March, as declines in the prices of manufactured products offset slight increases in the fluid products. However, March retail prices were up eight percent from a year ago and the average for all of 1976 likely will be 6 to 8 percent above 1975.

Cheese production continued to pull milk away from butter-powder operations in recent months, as well as absorbing most of the increase in milk supplies available for manufacturing. American cheese output was up about 17 percent from a year ago in the first three months of 1976, while butter production was down about five percent and nonfat dry

milk output was down almost a fifth. Cheese production probably will continue to attract more milk in coming months.

First quarter sales of dairy products were up almost three percent from a year earlier due to strong cheese sales and small gains in fluid milk sales. Fluid milk and butter sales may slip below year - earlier levels in coming months but cheese sales likely will remain strong.

Commercial dairy stocks have recovered somewhat from last winter's low levels but the strong sales have kept commercial holdings rather tight. The 4.2 billion pounds milk equivalent in commercial hands on April 1 was down 16 percent from 1975, with butter and American cheese stocks down a fifth.

U.S. trade in dairy products was minor in January - March with both imports and exports at

moderate levels. However, USDA recently announced that 300 million pounds of nonfat dry milk has been programmed for donation under the Food for Peace program (PL 480) during the 18 months ending September 30, 1977. Elsewhere in the world, milk production was up in most major producing countries in early 1976 and could considerably exceed the earlier forecast for a one-percent rise from a year ago during 1976.

R2 in FHA; and Dale G. Siegfried, son of Mr. and Mrs. Paul J. Siegfried of Mertztown R2 in FFA.

The young people each received a \$100 savings bond and a framed certificate from the fair association.

The 1976 Berks County Outstanding Grange Farm Family, introduced by Mrs. Ruth Mease, are Mr. and Mrs. Robert Kieffer of Hamburg R2, and their six children: Lisa, Janice, Leona (Mrs. Randy Moyer), Ronald, Kenneth and Richard.

Mr. Vicari presented the

family with a \$600 ment bond and a certificate; and thanked association on behalf of a speaker. If I was milking a cow, I would more at home."

Before concluding celebration, Reading thanked all who participated in the banquet, and a gift of a large Bienen decorator tin of Red Check juice, both products of Berks County, presented to Secretary Kerstetter.

Bees are remarkable insects

NEWARK, Del. - "Bees have always been my hobby," says Dr. Charles Mason, an assistant professor in the Department of Entomology and Applied Ecology at the University of Delaware. Since his arrival here in July, 1975 from Arizona, Mason has increased the number of university hives from three to 21. His hobby has now become part of his job.

Mason is teaching students about the science of bees (apology) and bee culture (apiculture). His course, offered for the first time this year, has proven very popular.

"It's basically a lecture course, but I give students a chance to actually work with bees," he explains. "Bees are remarkable insects. They have their own type of communication. For instance, when a bee comes back to the hive with a load of honey, she performs a kind of dance that tells other worker bees how to reach the same food source. If she positions her body at an angle 45 degrees to the left of vertical (the basic position in relation to gravity), for example, she's telling other workers where to fly from the hive in reference to the location of the sun. While in this position, she also rotates her body back and forth. The number of rotations per minute tells how far away the food supply is. So that the other bees will recognize this food source when they get there, she also brings back odors from the flowers she's been feeding on."

The entomologist divides his course into essentially two parts. After students learn about bee biology and communication, they're given a chance to study a colony for five weeks. The class gives them a new understanding of the honeybee, a remarkable insect which man first domesticated sometime around 5,000 B.C.

"Before I took this course," says senior Debra Nelson, "I didn't really know what bees were all about. I never realized they had personalities. Now I think of them as more than just insects that may come after you and sting."

Creatures from outerspace? No, these strangely dressed women are students in a beekeeping class at the

University of Delaware. Smoke gun quiets bees while they work.

Brenda Sandidge, a junior who's also in the class, feels her experience in working with bee colonies has been very beneficial. "The first time I entered a hive I was scared. I'm still a little frightened, but I want to get over being afraid. Now I think I can explain bees to other people who are afraid of them. I think I appreciate bees more now. I know they don't attack unless they feel threatened."

Brenda says she's learned

that certain things like jerky movements or perfume can arouse bees. Debra says she's seen the bees aggravated on hot days or when they've been smoked too much.

Smoke is used to quiet bees when working on a hive. It makes them start to fill up on honey and get ready to evacuate the hive if necessary. This is a behavior pattern that evolved a long time ago, when in the natural state bees lived in hollow trees in the forest. In case of fire, the scent of smoke became the signal to load up on honey to be carried to a new home. This behavior evolved genetically because

the bees that practiced it survived and reproduced, while those that didn't perished in the fire.

Talking about getting stung, Mason explains, "The reason someone gets stung more than once is because after a bee stings, an odor remains which smells like bananas. The other bees smell it and - especially if they're upset - may become more aggressive." He hopes eventually to have colonies of more even-tempered bees than the present ones. Lack of time kept him from developing gentler colonies this year. By choosing

Knebel overviews poultry situation

By JOANNE SPAHR

LANCASTER - Speaking to a noon luncheon gathering at the 1976 Pennsylvania Poultry Conference held at the Host Corral on Thursday, Under Secretary of Agriculture John A. Knebel cited scientific developments, agricultural market orientation policies, and the Egg Research and Promotion Order as holding the keys to strengthening and improving the poultry industry.

The Egg Research and Promotion Order will be put into effect on August 1. It will enable egg producers to establish, finance, and carry out a coordinated program of research, education, and promotion for producers and consumers, improving markets for eggs, egg products, and laying hens which are no longer productive.

According to Knebel, it will be entirely financed by

producers through an assessment which by law cannot exceed five cents per 30 dozen commercial eggs at the market. The program will be operated by an 18-member board composed of producers nominated by the industry and appointed by the Secretary of Agriculture.

Hendrik Wentink of Lancaster is a member of the board, as is W. Robert Park of Valencia, Pa. Wentink, also chairman of Public Affairs for NEPPCO, spoke earlier in the day.

During his speech, Knebel said the order should serve to unify producers and improve consumers' awareness of poultry products.

He also noted that the developing farm policy of the last few years has given all farmers more freedom of choice in the marketplace.

"The American farmer is being freed again to produce to capacity," said the Under

Secretary. "And taxpayers are no longer burdened with \$4 billion in subsidies to keep the farmers from growing crops."

According to Knebel, the economy is returning to a basic supply and demand market because of the lifting of these restrictions.

Knebel also said that genetic developments, technological advancements in housing, and improvements in poultry rations have made the chicken a more efficient protein converter.

"In 1950 it took 3.3 lbs. of

feed to produce a lb. of broiler. Today, the feed conversion ratio is down to 2.2 lbs. of feed for each lb. of liveweight chicken."

Knebel then went on to praise the farmer for utilizing research, science, and technological advances. He reemphasized the well-known, but key, fact that in the early 1900's each farmer produced only enough food for himself and six others. At that time, 40 percent of the population fed the remaining 60 percent. Today, only 5 percent of the population is made up of farmers and is

responsible for feeding the rest of the population. To do this, each farmer has to apply the newest techniques.

One of these new procedures he mentioned for poultry farmers is an alternating lights-on and lights-off system, rather than having the lights on all night.

The Under Secretary also said the United States industry and government have been working well together

to develop foreign markets and gains are attributable to the fact that America has the most efficient poultry industry in the world with many new products being developed to fit consumer desires.

"There is no reason to doubt continued growth in the poultry industry in view of these factors that are working," said Mr. Knebel.

Under Secretary of Agriculture John A. Knebel speaks with an interested individual after his luncheon address at the Pennsylvania Poultry Conference Thursday.

Bees

(Continued from Page 29)

queens from even-tempered genetic stock, he can screen out the bad-tempered ones in the hives.

One thing that people don't understand is that bees which are swarming are the least apt to sting. "Although no one is sure just why, my theory is that the reason is basically physical," the entomologist says. When bees swarm they are carrying honey from their previous hive. They need this to sustain them while they build the comb for their new nest. "With a stomach full of honey, I think the bees are just too distended to bend themselves into the position required for stinging."

Mason tells his students that the trick to avoid getting stung while they work around the hives is to be gentle with the bees and stay well covered. "Students wear their own clothes, (long sleeves and long pants) and we provide each with a veil,

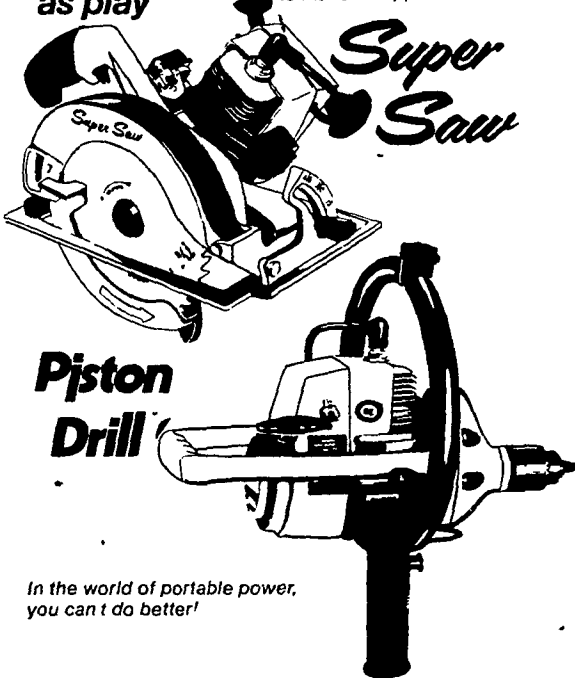

and gloves if they want them. As long as you're completely covered, there's little chance of being stung."

The course is designed so that those who complete it will know enough afterward to keep hives of their own. With this experience under their belts, they can proceed in several directions. Some may want to take up beekeeping as a hobby. Others may go into beekeeping on a part-time professional basis, either producing honey or offering a pollination service to farmers (who rent hives for certain crops). A student could even become a full-time professional beekeeper with a pollination service or honey production.

This year the course was offered on a special problem basis. Because of its success, it is being considered as an addition to the regular curriculum of the University's College of Agricultural Sciences for next year.

FFA Winners

The best FFA Chapter Procedures team in the state is this one from Ephrata. The team won

first place during FFA Week, held at the Penn State campus recently.

Brenda Albright, left, and Cindy Shreiner, both from the Brownstown Vo-Tech School, captured first and second place, respectively in floriculture during FFA Week at Penn State.

Solanco High School had the top land judges in the state. High individual was Richard Drumm, left,

followed by classmate Tom Jackson, center. In third place was Ephrata's Dan Hollinger.

The three top FFA poultry judges during state-wide FFA competition held at Penn State this week were,

left to right, Ken Fox, Garden Spot; Dennis Moose, Mercer Area; and Harry Boley, Garden Spot.

The three top FFA horse judges are left to right, Donna Lansberry, Cedar Crest; Mary Seward, Elizabethtown; and Kim Krem, Linesville. They

captured first, second, and third places, respectively, during FFA Week at Penn State this week.

Red Lion High School's dairy cattle judging team placed second in the

state. Team members were Leon Crowl, Jay Caudill and Glenn Crowl.

Fruits

(Continued from Page 1)

Farms, Lancaster R2, reports that they have a turnout of about 60 percent of last year's crop. These cherries are of "excellent, large quality," and are priced only about a penny higher than last year. Herr's operate a free pitter for customers, and prices with the pitter are 25 cents a lb. for up to fifty lbs.; 24 cents a lb. for 50 - 100 lbs.; and 23 cents a lb. for over 100 lbs.

Paul Brubaker of Brubaker's Orchards near Morgantown reports that his crop, although small, is in very good condition with plump, juicy cherries. He does anticipate that they will last only a few days, however, and that most will be gone by the end of this week.

Raspberries, on the other hand, are plentiful, and like the cherries, are large, juicy, and delicious. Herr's reports an excellent, abundant, quality crop this year with 17 crates already picked last week and plenty more to go. The price is the same as last year's at 75 cents a lb., pick your own. Another grower, S. Levi Ober, Elizabethtown R1, also says that his crop is flourishing but due to weeding out of older patches, this year's amount will be smaller than usual. His price is 75 cents a qt., pick your own.

Strawberries will still be available, also, this week at some fruit farms, although more walking will be involved.

If you are planning to can all these fruits, the outlook for this year's canning supplies is much more optimistic than last year.

Most of the larger stores in the area report that they have been able to secure a sufficient supply of glass equipment and lids. J. C. Penny Co., reports that they have even a larger selection of equipment than last year. The only item which they can't keep in stock is the single, wide-mouth jar lid. One the whole, their prices stayed the same as last year, with a few items going even lower than before.

Weis Markets also has a good supply of nearly all canning materials except the standard wide-mouth jar lid. They have found that most wholesalers have taken off the limits imposed last year when the lid supply was so low. These prices are also the same as last year.

Who Needs It?

To increase circulation, one newspaper advertised an accident policy free to all new subscribers. A few days later, this advertisement appeared in the paper: "Ben Bell subscribed to our paper and was given a free accident policy. On his way home from work that same day, he fell down a flight of stairs and broke an arm, a jaw and both legs. The accident policy paid him \$1,000. Subscribe to this paper, receive your free accident policy—and maybe tomorrow you'll be the lucky one."

WAYNE Sweet 18% Krunch...

the economical, convenient dairy feed

Wayne Sweet 18% Krunch was designed to properly balance roughage feeding of corn silage at high intake levels.

And, Sweet 18%'s high fiber balances the low fiber level found in corn silage.

Wayne Sweet 18% Krunch... economical, convenient and designed with your corn silage in mind. Ask your Wayne Feeds dealer about it today.

The low energy of Wayne Sweet 18% Krunch compensates for the high energy in excellent quality corn silage.

GUARANTEED ANALYSIS

Crude Protein.....	(Min.) 18.0%

Mabel Rishel: 46 down and more to go

By JOANNE SPAHR

Mrs. Mabel Rishel has the distinction of being the oldest living past president of the Society of Farm Women in Pennsylvania, and this perplexes her.

"I can't figure out if it's a compliment or a nasty remark," she quips with a wit that she has undeniably mastered as her own.

Her title is rather baffling, and it certainly seems highly inappropriate for this lively lady. She may be somewhere in her early 80's, but she is hardly a relic of the past.

Mrs. Mabel Rishel models a Bicentennial dress she will be wearing to some of the functions she'll attend this year. The dress was hand-made for her by her granddaughters.

Busier now than many women half her age, she is likely to pop up anywhere there is a gathering of agriculturally oriented women.

This year she'll be hostessing for the National Holstein Convention in Philadelphia. This will be the 30th convention she's attended.

"That's the 30th consecutive," she says with a tap of her forefinger. "I haven't missed one yet."

She hostessed in 1955 when it was also held in Philadelphia.

"I thought for sure they were going to let the old lady take a rest," she says grinning with her eyes, "but, they asked me again."

She is called on frequently to do many things because she is so dynamic.

It all started back in 1930 when she organized the first Society of Farm Women in York County.

Those who bring sunshine

To the lives of others

Cannot keep it

For themselves

"I remember thinking how courageous and outgoing those women were. In those days you just didn't do the things you do now," she recalls, speaking of the first Farm Women's meeting she attended in the Senate Caucus room in Harrisburg during the 1930 Farm Show.

The way she tells it, she had heard about the meeting and more-or-less walked in for something to do while her husband was busy elsewhere. Then, listening to the "daring and courageous" women she became inspired, and out of enthusiasm, mentioned to one of the women that York County should have a society. That was her nemesis. Before she knew it, she was off and running on a busy, fun-filled career as a leader of Farm Women that took her all the way to the top — state president from 1934-37.

In the 46 years she has been affiliated with Farm Women, she has been responsible for organizing at least four other societies in the county and been an inspiration for nearly every one. She is asked to attend many meetings now that there are 33 societies, and is frequently asked to speak.

Homestead Notes

Just last March, Group 1 held its 46th anniversary in the place where it all began — Mrs. Rishel's farm on Woodland View Road, York.

"It was such a thrill," she says with wide eyes and an animated face. "Little did I think when I held the first meeting here in 1930 that I'd be holding the 46th one in the same place."

There are probably many other events in her life which she never envisioned when she sauntered into the Senate Caucus room that January.

Mrs. Rishel examines one of the many plants that decorate her home. This particular plant is an African Violet. Behind her in her China closet are bone dishes she brought from England.

One of the things she probably never counted on was having a cookbook dedicated to her. In 1971 the "Society of Farm Women of Pennsylvania Cookbook," prepared by the women of the York County societies, came out as a dedication to her. Mrs. Rishel's contribution to the book was "Grandmother's Noodles," a recipe she derived from 50 years ago.

"I want you to know," she says with delight, "the recipe got its name from a composition my grandchild wrote for school, and he got an 'A'."

Mrs. Rishel also got an "A" of sorts when a film from Hollywood, working on location, liked her recipe so much that they took the cookbook back with them to California.

"I've never been to Hollywood," she says, "but the recipes made it."

Maybe she never made it to Hollywood, but she's been practically everywhere else. In tours with a Farm Women association, she's been to Russia, Europe, South America, Puerto Rico, and Hawaii. On the trip to England, she sailed over on the Queen Elizabeth and back on the Queen Mary.

What she seems to enjoy most about her travel and affiliation with Farm Women is the lasting friendships she's made and the personal growth she's enjoyed.

"That's the greatest part — finding out that everybody has something equally interesting," she observes.

One thing is for certain, "everybody" has a lot to learn up with to be as interesting as Mrs. Rishel.

My Thoughts and Welcome to Them

(With apologies to James Thurber)

By JOANNE SPAHR

When I was out covering dairy princess pageants and ag meetings this week, I couldn't keep from noticing the farm women I was running into. (You'll always know if I've attended your meeting if the women are scattered over the floor with tread marks on their faces.)

Seriously, in my observer's role, it suddenly came to me that the farm women I was meeting were really attractive. They were vital, energetic, and involved, and their appearances were nothing to sneeze at, either. (Besides being unhealthy, that's downright rude.)

Most were tanned (maybe a little more overdone on one side than on another in some cases), well dressed, healthy and firm, and that's more than you can say for a lot of women nowadays. That's more than you can say about me!

Then, I got to thinking, "These women are probably about as popular with some women as Earl Butz is with

the Pope." Really. Just empathize for a minute. Think of those women who are stuck in an office from 9-5 or in city tenements with no grass and nowhere to go but a front stoop or a hot roof.

On their days off, these women lie out in the sun and practically die of heat exhaustion and an overdose of diet soda just trying to look like a farm woman does naturally, it seems.

Of course, we all know (although we'd never tell) that those tans are the products of many hours of slaving in the field or garden trying to get a good crop or a full freezer.

Then, too, farm women add insult to injury with their clothes, which are tailored to fit, and usually hand-made at half the price of retail. No ratty hems, tucked sleeves, or frayed seams for a farm woman!

And farm wives' husbands (commonly referred to as farmers, in case you didn't know) are another source of aggravation. You talk about tanned, strong, and at-

tractive people — no man looks better in the summer than a farmer.

So, try to have a little empathy for the next non-farm woman you meet. When she compliments you on your lovely tan, tell her it's really just the dirt you can wash off when you come in from the field. And, if she asks anything about your outfit, don't tell her you have coordinating pieces to go with it. Also, whatever you please hold yourself back from offering to let her see your seams out and to take her darts in!

Of course, you know how to answer when she makes jealous remarks about your handsome husband. Just tell her that whenever you go to the beach for a day, the children always star and point and say, "Momma, look at that funny two-colored man," referring to your husband's bronzed torso and his lily white legs.

But, don't say any of these things too seriously. You're proud of what you've got going for you, because you have every reason to be.

Remove hard-water rings from your stainless steel pans, cloth with rubbing alcohol and apply it to the area.

Home On The Range

This week we are featuring casseroles. The zucchini and tomato casseroles will be a delicious way to utilize your garden produce this summer.

Don't forget the picnic food feature we will be running during the month of July. We will first specialize in sandwiches, then salads, next finger foods, and last, desserts. So, don't forget to send in your favorite picnic recipes. The deadline for the first two categories is June 30, and July 14 for the last two.

Zucchini Casserole
3 cups sliced squash
1 1/2 cups cracker crumbs
3 eggs beaten
1/2 cup butter (melted)
1/2 teaspoon salt
4 oz. pimento (diced)
1 cup milk
2 cups shredded cheddar cheese
Mix all ingredients. Pour into greased two quart

casserole. Bake uncovered in slow oven at 300 for 30-40 minutes or until golden brown.

Helen Shertzer
Route 1
Millersville, Pa. 17551

Versatile Meat-Vegetable Casserole
2 large onions, chopped (about 2 cups)
2 tablespoons butter or margarine
1 can (10-1/2 oz.) beef or chicken gravy
2 cups diced cooked beef, lamb, chicken, or turkey
Salt and pepper to taste
2 cups cooked vegetables (any kind)
2 cups mashed potatoes
2 tablespoons Seasoned Crumbs or fine dry bread crumbs
Brown onions well in skillet in one tablespoon butter. Stir in gravy and meat and season with salt and pepper. Spread in 10 x 6

x 2 inch baking dish. Top with vegetables, then potatoes. Dot with remaining 1 tablespoon butter and sprinkle with crumbs. Bake in preheated 425 oven for 20 to 25 minutes or until top is nicely browned and gravy bubbles. Makes 4 servings.
The Collector's Cookbook

Cheese-Topped Macaroni-Meat Casserole
4 cups cooked elbow macaroni (about 2 cups uncooked)
1-1/2 to 2 cups diced cooked beef, ham, tongue, chicken or turkey
1/4 cup butter or margarine
1/4 cup flour
1 teaspoon dry mustard
1/2 teaspoon salt
1/4 teaspoon pepper
2-1/2 cups milk
1 cup coarsely shredded Cheddar, Muenster or Swiss cheese
2 tablespoons dry bread crumbs
Combine macaroni with meat in greased 12 x 8 x 2 inch baking dish. Melt butter in saucepan and blend in flour, mustard, salt and pepper. Add milk and cook and stir until thickened and

smooth; pour over macaroni-meat mixture. Sprinkle with cheese, then crumbs. Bake in 375 oven 30 minutes or until lightly browned and bubbly. Make 4 to 6 servings.

Collector's Cookbook

Ham, Potato and Cheese Casserole
3 cups cooked cubed ham
3 cups cooked cubed potatoes
1 medium onion
3 tablespoons green pepper (optional)
1/2 stick margarine
2 1/2 tablespoons flour
2 cups milk
3/4 cups shredded cheese
salt and pepper to taste
Cook onion and pepper in butter for five minutes. Add flour and stir. Add milk and cook until thickened, season and add potatoes and ham. Put in two quart casserole and top with shredded cheese and bake at 350 for 25 to 30 minutes. This recipe is also good when made with weiners.

Ida's Notebook

Ida Risser

What a world of sounds we live in! Early in the morning I am awakened by noisy geese under my bedroom window. When I shut-out their noise, I'm aware of many lovely bird songs. An airplane hums in the distance and a bullfrog croaks loudly at the water's edge.

This past weekend my husband and I traveled by train to visit our married daughter in Indianapolis. Such an experience in new noises. We spent a night on the train - trying to sleep. Not only did the train lurch constantly but as the tracks are in a bad state of disrepair, we had to listen to such a clacking and clanging as you've never heard.

However, we had a nice tour of the city when we arrived "early" the next morning. We saw the "500" Hall of Fame at the Indianapolis Motor Speedway where for \$20,000 a year you can rent a motel suite overlooking the speedway

and invite your friends to sit on the balcony with you and watch the races. Regular tickets are \$15 to \$100 each.

We also visited the Indiana State Museum where the exploits of George Rogers Clark were extolled. As a 25-year-old, he led 150 frontiersmen down the Ohio River, across Illinois to the Mississippi and surprised the British supply posts into surrendering. He also led his small band across 240 miles of flooded lands in the "depth of winter" and obtained the surrender of British Gov. Hamilton which paved the way for westward expansion to the Mississippi River. His feats are unbelievable.

We also viewed the city from a 36th floor observation deck and ate in an unusual restaurant which used a covered bridge as an entrance and a country store atmosphere as a dining room.

The farm looked "good" to us when we got home.

Junior Cooking Edition

The junior cooks are still sending in those great dessert recipes that make my mouth water just typing them! I can't help thinking that if they make these great foods now, what will they be like in ten years?? I also noticed that all the recipes were printed or written in excellent, legible penmanship.

For the month of July, the "Home on the Range" column will feature picnic foods such as sandwiches, salads, and desserts. The "Junior Cooking Edition" column will also be included in this. So, junior cooks, if you know any good recipes that fit the description of picnic foods, send them in! Let's see who can have the better picnic recipe column.

Brown Mountain Cake

1 cup soft butter
2 cups sugar
3 eggs
3 cups sifted flour
1 teaspoon baking soda
½ teaspoon salt
3 tablespoons cocoa
1 cup buttermilk or sour milk
1 teaspoon vanilla
½ cup warm water

Cream butter and sugar until light and fluffy. Beat in eggs, one at a time. Sift together flour, baking soda, salt, and cocoa; add alternately with buttermilk or sour milk to the creamed mixture. Stir in vanilla and warm water. Pour batter into a lightly greased and floured 13 x 9 x 2 inch baking pan. Bake at 350 about 45 minutes, or until the cake is done. Frost with Butter frosting.

Butter Frosting

Cream together ¼ cup soft butter and 2 cups sifted confectioners sugar. Blend in ¼ teaspoon vanilla and 2-½ tablespoons milk. Mix well.

Becky Brougher
York, Pa.
Age 12

Walnut Glory Cake

¾ cup sifted flour
2 teaspoon cinnamon
1 teaspoon salt
9 eggs separated
1-½ cups sugar
2 teaspoons vanilla
2 cups fine English walnuts

Sift flour with salt and cinnamon. Beat egg whites in large mixing bowl until soft peaks form. Gradually add ¾ cups sugar. Continue beating until very stiff. Combine egg yoke, ¾ cup sugar, and vanilla. Beat until thick. Stir in dry ingredients. Fold batter gently into egg whites. Fold in nuts. Bake in a tube pan at 350 degrees for 55 to 60 minutes.

Annie Glick
Quarryville, Pa.
Age 11

Quick Mix Sponge Cake

1-½ cup sifted cake flour
1 cup sugar
½ teaspoon salt
½ teaspoon baking powder
¾ cup egg white (6 medium)
1 teaspoon cream of tartar
½ cup sugar

½ cup egg yolks
½ cup cold water
1 teaspoon vanilla and lemon extract

Sift flour, sugar, salt, baking powder. Beat egg white. Add cream of tartar and ½ cup sugar slowly. Beat until very stiff. Blend egg yolk, water, and flavoring. Add to dry ingredients. Fold into egg whites. Bake at 325 degrees for 45-50 minutes.

Chester M. Zook
RD3 Box 193
Quarryville, Pa.
Age 8

Presbyterian Cake

2 cups brown sugar
½ cup shortening
1 egg
1-½ cups buttermilk
2-½ cups flour
1 teaspoon cinnamon
1 teaspoon salt
1 teaspoon soda
Crumbs for topping:
½ cup brown sugar
½ cup flour
¼ cup butter or margarine

Cream sugar and shortening. Add egg. Combine dry ingredients and add, alternating with buttermilk. Use a greased and floured 9 x 12 inch pan and add topping. Bake at 350 degrees about 45 minutes. Individual cakes can be made by using liners in a cupcake pan.

Kathryn H. Martin
RD1
New Holland, Pa. 17557

Magic Chocolate Swirl Cake

1 cup butter or margarine
2 cups sugar
3 eggs
2 teaspoons vanilla
2-¾ cups all-purpose flour
1 teaspoon baking soda
½ teaspoon salt
1 cup buttermilk or sour milk
1 cup canned chocolate flavored syrup
¼ teaspoon baking soda

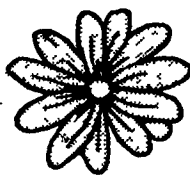

1 cup flaked coconut (optional)

Cream butter or margarine and sugar until light and fluffy. Blend in eggs and vanilla. Combine flour, one teaspoon baking soda, and salt. Add alternately with buttermilk or sour milk to creamed mixture. (To sour milk use 1 tablespoon vinegar plus milk to equal a cup.) Combine chocolate syrup and ¼ teaspoon baking soda; blend into two cups batter. Add coconut to remaining batter and pour into a greased and floured 12-cup bundt pan or 10-inch tube pan. Pour chocolate batter over vanilla batter in pan. Do not mix. Bake at 350 degrees about one hour and 10 minutes. Cool for 15 minutes. Remove from pan when cool. Drizzle with Satiny Chocolate Chip Glaze; top with toasted slivered almonds if desired.

Satiny Chocolate Chip Glaze

½ cup semi-sweet chocolate chips
3 tablespoons butter
1 tablespoon light corn syrup
¼ teaspoon vanilla

Combine chocolate chips, butter and corn syrup in small saucepan. Heat over low heat, stirring constantly, until chocolate chips are melted and mixture is smooth. Add vanilla. Spread warm glaze over top of cake. Allow glaze to drizzle down sides. Makes about ¾ cup.

Kitchen Tested Recipes

drinks are so versatile they can be used any time of the day, morning, noon or night. Can you think of a better way to spend the Dairy Month than to make one of these delightful drinks? Hardly. And it would be hard put to find a beverage more nutritious because these drinks are rich in calcium and protein, vitamin B₁₂, riboflavin and thiamin. A morning drink would give you a natural food buff, and a buttermilk, orange and honey. Try it on a morning for a real treat, says Melinda D. Wright, Extension Agent.

The Luncheon Freeze is cool, a very pleasant treat for a hot busy lunch.

Made in a blender or mixer, or even hand-mixed, this frosty fill-up is great served in glasses which have had their rims dipped in lemon juice, then sugar.

Rather than having dessert with dinner, why not take a Dessert Mocha Shake into your living room and sip it slowly and casually? Cold milk, chocolate ice cream, chocolate milk mix and coffee, are all happily mixed together, then topped with a fluff of cinnamon spiked whipped cream. There you have luscious dessert and coffee all in one!

Take it from me, your Dauphin County Dairy Princess, Marjie Hoffer, and try the following milk drinks.

Orange Breakfast Bracer
1 cup cold buttermilk
3 tablespoons frozen orange juice concentrate
1 teaspoon honey
Orange slice

Combine buttermilk, orange juice concentrate and honey. Blend well in a blender or with a mixer. Garnish with orange slice. This recipe yields about 1-1/4 cups.

Lime Luncheon Freeze
2 cups cold milk
1 pint lime sherbet
3/4 cup (one 6 oz. can) cold pineapple juice
Lemon juice
Sugar
Fresh mint

Combine milk, sherbet and juice. Blend well in blender or with a mixer. Serve on lemon-frosted glasses. Dip rim of glasses in lemon juice, then in sugar;

chill. Garnish with fresh mint. This recipe yields about 4 cups.

Dessert Mocha Shake
2 cups cold milk
1 pint chocolate ice cream
1/4 cup chocolate-flavored quick milk mix
2 teaspoons instant coffee
Cinnamon Whipped Cream
Cinnamon stick

Combine milk, ice cream, chocolate mix and coffee. Blend well in blender or with a mixer. Garnish with Cinnamon Whipped Cream and cinnamon stick. This recipe yields about 4 cups.

Cinnamon Whipped Cream: Whip together 1/2 cup whipping cream, 1 tablespoon sugar and 1/2 teaspoon cinnamon in a chilled bowl with chilled beaters, until stiff peaks form, scraping bowl occasionally.

Farm Women Societies

Society 1

The Society of Farm Women 1 met recently at the home of Mrs. George C. Zahn, West Chester, Pa. Twenty-eight members and guests were in attendance. Plans were finalized for a Bicentennial bus trip to Philadelphia on Thursday, June 17.

The society voted to give \$25 to the county project, which is to help the St. Joseph's Hospital Mobile Unit. They also voted to give \$30 to Ralene Harbold from Elizabethtown who will represent Lancaster County as an IFYE student.

The next meeting will be a covered dish picnic supper on June 26, at 6:30 p.m. at the Middle Creek Church Pavilion. The program will feature an old-fashioned spelling bee.

The next meeting will be held at the home of Emily Reath, White Rock, on July 15, at 1 p.m.

Society 22

Donegal Mills plantation was the location for the June meeting of Farm Women Society 22.

The morning was spent touring the mansion, bake house, Miller's house, and the old grist mill.

Mrs. Lester Landis presided over the business meeting.

The society donated \$500 to the St. Joseph Mobile Unit, the county project. Ten dollars each was given to LARC and Mental Health.

The next meeting will be the county picnic to be held Wednesday, August 4, at the Brethren Home Pavilion at Neffsville.

Society 15

Approximately 100 attended the Bicentennial meeting of Farm Women Society 15 on June 10 at Black Rock Retreat. Societies 2, 20, and county officers were guests. Many women attended the gathering in Bicentennial dresses.

The meeting began at 12:30 p.m. with a colonial style buffet. Hostesses for the day were Janet Frantz, Kathryn Anderson, Annie Lefever, Catharine Irvin, Mary Howett, and Ruth Crawford.

Following a short business session, the program chairman began the entertainment which consisted of Bicentennial games.

Berks Co. Society 1

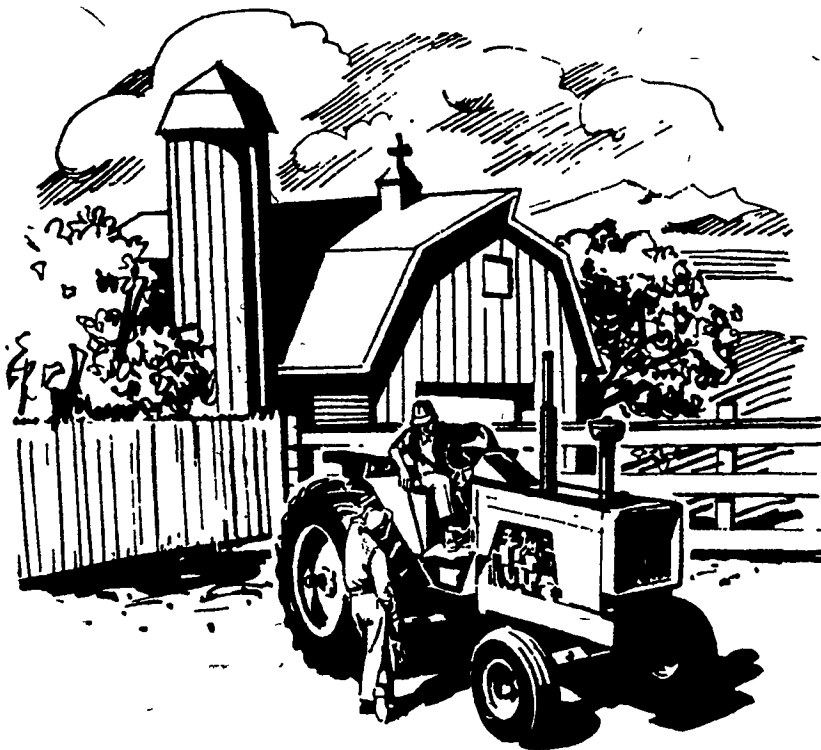

The June meeting of the Berks Co. Society of Farm Women 1 was held at the home of Esther Berndt. The surprise entertainment was a Chinese meal. Mrs. Julie Elston of Reading, who was born and raised in Taiwan, gave a cooking demonstration on two Chinese foods, chicken and cashews served on rice and egg rolls.

Nineteen members answered roll call by telling their favorite milk food.

The group will hold a family picnic on August 15.

The next meeting will be a family hot dog roast held at the home of Lena Eylich.

Farmers Who Need Money To Grow On Come To FARM CREDIT.

Before you buy any farm loader, see a Bobcat in action!

It's no accident that Melroe's Bobcat is the world's most popular farm loader. For almost 20 years these powerful little loaders have been taking the backbreaking, time-consuming labor out of dozens of farm jobs. Four Bobcat models, all with 4-wheel drive, pivot turning ability and a big assortment of special job attachments give farmers a wide range of applications and power options. Fitted with the exclusive Bob-Tach, Bobcat becomes a quick-change specialist in scores of indoor-outdoor year-round jobs. Almost anyone can learn to operate a Bobcat in 15 minutes. And it's economical to maintain. We'd like to show you, right on your farm, how great a compact loader can be. Give us a call. While we're demonstrating, we'll show you how it's easier than ever to own or lease a Bobcat.

Potato Dishes for Lazy Summer Cooking

Eating out-of-doors has great appeal for most of us. It may be in your own back yard, at a favorite cook-out, or in a camper traveling down a Bicentennial trail. Wherever you are, the secret is quick and easy dishes with the accent on flavor.

A hearty potato salad, served warm, can be made without peeling a potato. Take a package of frozen crinkle-cut French fries from your freezer. Brown as package directs. Make up your favorite sweet-sour sauce for hot potato salad. Combine with browned French fries. Delicious served with hot dogs, cold cuts, or baked ham.

For early morning breakfasts or later brunch picnicks, wrap packages of frozen shredded hash browns in aluminum foil as you head for the hills or beach. They

will stay frozen for quite some time. If they thaw a bit, don't worry. Fry them over the fire in a skillet with a little oil. They'll taste good topped with fried or scrambled eggs and sausages.

For a light but satisfying supper, brown Tater Tots as package directs. Substitute for French bread pieces and serve with Cheese Fondue (a package cheese fondue is easy and good).

No matter the hour or the place, frozen potatoes add a deliciously lazy accent to summer meals.

Home Canned Foods Are Nutritious - Keep Them That Way

The nutritional quality of many home canned foods is often higher than foods eaten fresh from the garden or bought at a market. That is because nutritional quality and freshness of vegetables and fruits go hand in hand.

How fruits and vegetables are harvested, selected, handled, canned and stored determines the nutritional quality.

Fruits and vegetables, the main sources of vitamin A and C in our diets, when canned under ideal conditions, retain from 60 to 70 percent of vitamin C and about one-half vitamin B1. Vitamin A is only destroyed when foods are heated in the presence of air or as in home canning - raw packed and then heat sterilized.

Storage conditions also affect nutrient quality of home canned foods. Ideally, storage conditions should be cool, dry, dark and clean. Research has shown that if foods are stored at 45 degrees in a cool, dry, dark place, the nutrient losses are insignificant over a year's storage time. But if the temperature is 85 degrees for a year, nutrient losses are about 30 percent greater for vitamin C and thiamin.

In addition, you can retain more nutrients in the foods you can if you store opened jars of canned foods in the refrigerator, heat foods rapidly in a small amount of liquid, use liquids in cooking and preparing other foods, and serve foods in an attractive way to stimulate family appetites.

Berks Co. Society 9

The June meeting of the Berks County Society of Farm Women 9 was held at the home of Mrs. Jean Frey with ten members present.

A demonstration of Oldenworld products was presented by Mrs. Nancy Gross, a member of the group.

The quilt and other prizes made by the group will be auctioned off at the annual picnic to be held on August 4, at Camp Harner.

Nine members of the group will attend the play

"Sleuth" at the Penn State Center on June 30.

The group will send children from the Hamburg State School to Camp Swatara.

The meeting ended with a discussion of the preparation and weaving of the flax and wool in colonial times led by Mrs. Marcia Keim, a former employee of Hopewell Village, Birdsboro, Pa. Each lady was then able to try to drop-spindle method of preparing yarn.

Co-op publication printed

WASHINGTON, D.C. - Background and references for those in a position to advise individuals or groups wanting to form a cooperative are provided in a publication issued jointly by Farmer Cooperative Service and Extension Service, U.S. Department of Agriculture.

This publication does not duplicate material or references available in other forms. It does describe organizations and their bulletins, books, visuals, and periodicals that tell about developing, organizing, financing, and operating cooperatives.

Cooperatives other than agricultural marketing, purchasing, and service associations exist. The publication briefly describes credit, housing, crafts, health, fishing, forestry, consumer, buying, and many other types of cooperatives.

When a group wants to form a cooperative, questions about their needs must be answered. Examples of questions to be raised are given in the publication. Steps to take as these questions are answered are outlined.

A list of organizations serving cooperatives and their addresses is included.

A free copy of Program Aid 1147, "Advising About Cooperatives," can be obtained from Farmer Cooperative Service, U.S. Department of Agriculture, Washington, D.C. 20250.

At Last, A Fly Control Block For Lactating Dairy Cows

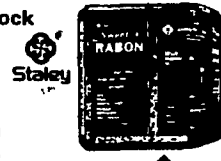

Staley's new Sweetlix® Rabon® Block* offers you two big advantages: 1. It has EPA approval as a fly control agent for lactating dairy cows. 2. It is the only fly control agent that can now be fed to the complete dairy herd.

Rabon prevents the development of the most common flies around your dairy barn - horn flies, face flies, house and stable flies.

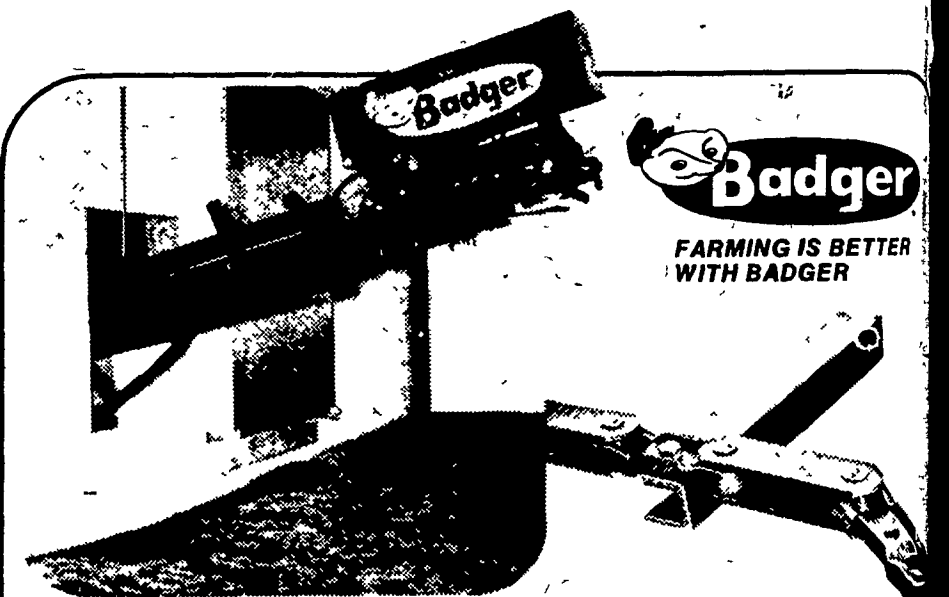

Staley's patented molasses-salt formula helps assure you that your cattle will voluntarily consume the right amount of Rabon oral larvicide plus additional highly available dicalcium phosphate.

Tips on freezing from Berks extension service

By JUDY MITCHELL
Berks Co. Reporter
LEESPORT - Quality and economy were the keynotes of the Berks County Extension Service "Preparing Food for Your Freezer" meeting held at the Agricultural Center on June 10. More than 50 persons attended the workshop designed for the experienced as well as the beginner in the practice of home freezing. Berks County Extension Service Economist Fay B. Trickler's presentation included the latest information on product selection and freezing processes and actual demonstrations of proper freezing techniques. The quality of frozen food, she pointed out, depends first of all on the product's

suitability for the freezing process and can be further enhanced by selecting the particular variety of that product recommended as ideal for freezing. Ripeness, not to be confused with maturity, is likewise important. Maturity, she cautioned, may determine when a crop is ready to harvest, but a product is ripe when it is ready to be eaten out of hand.

Economy is not always the route to a quality frozen product, and according to the economist, those margarine, cottage cheese and milk containers are not recommended for long-term freezing. Neither are sandwich bags or ordinary plastic wraps. Containers used to freeze products for the coming winter should be

"moisture and vapor proof," and only those which are specifically labelled for freezer use are recommended.

That layer of ice crystals on your frozen produce may be due in part to improper containers, or perhaps to a too-slow freezing rate which can be remedied by storing no more than two to three pounds of unfrozen food per cubic foot of freezer space in a 24-hour period. And if possible, the Berks home economist continued, stagger them on the shelf stacking them only when solid, so that the air can circulate around the packages.

The importance of a freezer temperature of 0 degrees or less was illustrated by a chart which

indicated that for every 10 degree rise in temperature, the rate of quality loss is accelerated five times. Translation: the time you can expect a container of green beans to maintain initial quality drops from one year at 0 degrees, to three months at 10 degrees, and to three weeks at 20 degrees.

Additional points worth noting are: if blanching water takes longer than one minute to come back to a rolling boil after adding vegetables, then you have added too many; water for chilling after blanching should be iced; terry towels are good for draining to further reduce crystal formation; and it is a good practice to store packages in your refrigerator until you have a tray ready to add to the freezer.

Publications distributed at the clinic, "Preparation of Food for Your Freezer," which gives detailed instructions for freezing all types of food plus appropriate methods and blanching times for produce, and "Vegetable Guide for Home Gardeners," which deals with product and variety suitability for home freezing, are available to residents of Berks County and may be obtained by writing the Extension Center Homemakers Division, Leesport, Pa. 19533.

Sara Bell, Home Economist from Metropolitan Edison Company, dealt with the question in many homemakers' minds today: "Will a home freezer save money?" According to the energy specialist, if you have a garden or someone in the family who hunts or fishes, the answer is probably yes. On the other hand, she

pointed out, "if you are buying food at the supermarket, you should think of your freezer as a convenience, rather than a money saver."

Emphasizing that it only pays to freeze if you keep the appliance working for you, the Met Ed representative suggested that the homemaker should first consider how a freezer operates. It does not manufacture cold air as many believe it does, she informed the group, but merely removes the heat and moisture from the air. Consequently, the first step to using a freezer wisely is to keep it at least three-quarters full to reduce the amount of warm air entering the freezer every time it is opened. Additional advice included: locating the freezer in a relatively cool spot away from direct sunlight, heating systems or heat producing appliances, allowing space around it for circulation of air; vacuuming behind and under it frequently; and limiting the number of times the door is opened daily.

For efficient operation of a freezer, the economist emphasized the importance of following the directions previously outlined for the proper processing and packaging of frozen foods, adding that labeling and

using color codes or mesh bags to group like foods can help cut down hunting time which increases energy costs. Another economy measure is to freeze during off-peak hours - in the early morning, late at night or on weekends.

According to the home economist, it is important to consider the size and cost of operation when buying a new freezer. A rule of thumb used to determine the size of a freezer is five to six cubic feet of freezer space for each member of the family, and residents in Met Ed service areas may call the home economist at the appropriate Met Ed office and supply the manufacturer's name and model number of a specific appliance for information on its efficiency. Several booklets providing information on energy use are also available to Met Ed customers upon request.

"The cost per kilowatt-hour for electricity," Mrs. Bell told the gathering, "is less now than in 1946," and the increase in the average family's bill is primarily due to an increase in the amount of energy being used.

"We have been spoiled," she added, "but the time has now come for us to change our habits a little and think energy if it is going to be worth it to us dollar wise."

Dauphin Co., Society 1

The Dauphin County Society of Farm Women, Group 1 met on June 8, at 6:30 p.m. at the Sand Hill Lions Club Building. Sand Hill Farm Women Group 5 entertained.

Live entertainment was provided by two gentlemen

playing guitars and singing. Group 1 had a short informal business meeting conducted by Mrs. Bertha Kennedy, Group 1 president. The next meeting of the Dauphin County Society of Farm Women, Group 1 will be held on July 13, at the home of Dorothy Rutt. This will be the group's family picnic.

USDA has new beef grades

The U. S. Department of Agriculture's meat grading program serves meat producers, packers, retailers, and consumers by providing a nationally uniform language for buying and selling meat. Although grading is voluntary, many meat packers use the service and a large proportion of the beef available at the retail level is federally graded.

The USDA beef grading system includes two separate kinds of evaluations. One is for quality, indicating the tenderness, juiciness, and flavor of the lean, and the other is for yield of retail cuts in a carcass. In meat packing plants throughout the country, USDA graders evaluate beef carcasses for important quality and yield characteristics and stamp each carcass with the appropriate, shield-shaped quality and yield grade marks.

Beef Quality Grades - What They Mean

Each USDA beef grade is a measure of a distinct level of quality. Because beef can vary so much in quality, it takes eight grades to span the range - USDA Prime, Choice, Good, Standard, Commercial, Utility, Cutter, and Canner.

The grade most widely sold in retail food stores is USDA Choice. The Choice grade is produced in the greatest volume and many retailers have found that this level of quality pleases most of their customers. Some stores, however, offer two grades - Prime and Choice, or Choice and Good, for example - so that their customers have a selection of quality and price.

Different ratings

USDA Prime beef is the most tender, juicy, and flavorful. It has abundant marbling - flecks of fat within the lean - which enhances both flavor and juiciness.

USDA Choice grade beef is quite tender, juicy, and flavorful. It has slightly less marbling than prime, but is still of very high quality.

USDA Good grade beef often pleases thrifty shoppers because it is leaner than the two higher grades. It is relatively tender, but because it has less marbling, it lacks some of the juiciness and flavor of the higher grades. Some stores may sell this quality of beef under a brand name rather than under the USDA grade name.

USDA Standard beef has a high proportion of lean meat and little fat. Because it comes from young animals (the top four grades are restricted to beef from young animals) beef of this grade is fairly tender. But because it lacks marbling, it is very mild in flavor and most cuts will be somewhat dry unless prepared with moist heat.

USDA Commercial grade beef is produced from mature animals and it requires long, slow cooking with moist heat to make it tender, even though it has as much marbling as Choice or Prime beef. However, Commercial grade beef has the rich, full flavor of mature beef and when properly prepared, provides delicious economical meals.

The lower three grades - USDA Utility, Cutter, and Canner - are seldom, if ever, sold as retail cuts. They go

mostly into ground beef or into processed meat products.

Yield grades - What Are They?

Yield grades indicate beef carcass cutability or the amount of useable meat a carcass will yield after the waste fat has been trimmed off. The numbers one through five are used to identify the yield grades, with Yield Grade one representing the highest yield of retail cuts and Yield Grade Five, the lowest. The two types of grades - quality and yield - are independent of each other. Carcasses in

the same quality grade - choice, for example - can vary from Yield Grade One to Yield Grade Five.

The yield grades are designed primarily for use by wholesale beef purchasers as guides to carcass value based on differences in yields of retail cuts. Because yield grades are relatively unimportant to consumers who buy trimmed cuts in retail stores, the yield grade will usually not be evident on retail cuts nor will it be included on retail beef labels. However, consumers who buy beef carcasses or cuts for their freezer can use the

yield grades to estimate the amount of boneless, closely trimmed retail cuts they will get.

The quality grade and the yield grade together indicate the total value of a beef carcass, giving a measurement of both quality and quantity of lean meat.

Changing The Standards

The U.S. standards which define the requirements for each grade have been changed several times since beef grading was first offered by USDA on a fee basis in 1928. Technical specialists continually review the

standards to determine and when they may be revised.

Revisions in the standards which became effective February, 1976, improve the accuracy of the standards for measuring characteristics associated with carcass value.

The changes, in effect, were: all federally graded beef carcasses are identified for both quality and yield. Before revision, they could be graded for either

Dairy princess named

by DIETER KRIEG

GLERVILLE - Mary Klinger, 17-year old daughter of Mr. and Mrs. F. Klinger, New Oxford R2, is the 1976 Adams County Dairy Princess. She was crowned Saturday night at a well attended pageant held here at the high school. Miss Klinger was one of seven contestants to compete for the title. Other contestants were: Elaine Clowney, daughter of Mr. and Mrs. Thomas Murren, Gettysburg R1; Lita McGough, daughter of Mr. and Mrs. Roger Sprague, New Oxford R3; Carol Zepp, daughter of Mr. and Mrs. Lita McGough, New Oxford R6. Miss McGough was chosen as runner-up to represent Adams County's dairymen in Miss Klinger's absence.

she would be most proud and happy to be able to continue her life on the farm. She is also happy about being the new dairy princess and wasted no time in preparing messages to promote milk. She was crowned Saturday night . . . recorded messages the following day, and had them broadcasted over her local radio stations on Monday. In the meantime she has also been busy with the usual farm chores and 4-H activities. Currently she's serving as a camp instructor for younger 4-H members.

The new dairy princess does not work away from home. Aside from being in the barn for both milkings and to take care of calves, she is also very experienced with field work. Running a haybine, for example, is routine for her. She has milked the cows all by herself on many occasions while her father was busy in the field. Starting her working life at an early age, both Mary Ann and her sister have been capable of operating the farm by themselves for the past four or five years even while their parents are on vacation.

Mary Ann confesses to be very fond of farm life and indicated at the pageant that

The Klingers have 90 head of Holsteins, 40 of which are of milking age. With no boys in the family, Mary Ann and Elaine have learned to do every chore associated with dairy farming.

A 1976 graduate of New Oxford Junior-Senior High School, Miss Klinger was very active in school and community activities and 4-H work. She was vice president of her class, a member of the yearbook staff, varsity hockey and volleyball teams, varsity club, and girl's leaders club. She was also a member of the school's chorus and the recipient of the Daughters of American Revolution Award.

Mary Ann has been a 4-H member for nine years and is the current president of the 4-H Senate as well as her local club. In addition, she serves as treasurer of the Adams County Dairy Club and is active in the recreation and clothing clubs. Her hobbies include sewing.

Mary Ann Klinger, center is the 1976 Adams County Dairy Princess. She succeeds Karen Slagle, right, the 1975 princess. Runner-up in the pageant was 16-year old Lita McGough, left.

MARKET REPORTS

NEVER FORGET THE INDIVIDUAL NEEDS OF THE LAYING HEN

The Purina Laying Chow Bio-Rating gives the relative fortification of amino acid, vitamins and minerals. Bio Layena 100 is the base product. For example, Bio Layena 114 contains 7 percent more fortification than Bio Layena 107 and 14 percent more than Bio Layena 100. Each of the above feed intake ranges represent approximately 7 percent less feed consumption than the previous range. Thus a drop of 7 percent in feed intake (approximately 1½ pounds per 100 hens per day) is compensated for by an increase of 7 percent in ration fortification. In this way daily intake of amino acids, vitamins and minerals remain constant. The correct level of fortification is exactly matched to the hen's feed intakes. If during stress conditions a more highly fortified ration is desired, just choose the amount of extra fortification by checking the Bio-Rating of each Purina Laying Chow.

PURINA BIO-RATED LAYING CHOWS

Product	Feed Intake Range Fed Lbs./100 Hens/Day
Bio Layena 100	Over 25.0
Bio Layena 107	23.4 to 25.0
Bio Layena 114	21.7 to 23.3
Bio Layena 121	20.0 to 21.6
Bio Layena 128	Under 20.0

The Purina studies have not relied just on chemical analyses of feedstuffs to determine their nutrient content. Rather with the Bio-4 Laying Chows an extensive new approach has been taken to determine biological availability of such nutrients. The Bio-4 Chows rely upon specific biological tests to be sure the amino acids, energy, vitamins and minerals in a feedstuff are available for use by the hen or chick. This type of formulation gives use to rations that are highly efficient yet maximize shell quality, egg size, egg production and feed efficiency.

USDA

(Continued from Page 56)

both; adjustments have been made in the marbling requirements for each of the grades of beef from young cattle; Conformation - the shape of the carcass - is no longer one of the factors used to determine quality grade; Requirements for the Good grade are now much more restrictive making Good grade beef more consistent in eating quality.

Effects Of The Revisions

Under the current standards, all beef graded is identified for both quality and yield grade. This requirement is expected to have a significant long range effect - a reduction in the amount of excess fat that is present on beef as now produced. This is fat left on the dinner plate or trimmed from cuts before they are packaged for sale. Such a reduction should lead to substantial savings to producers and consumers since the cost of producing, shipping, and trimming excess fat on beef now runs to over \$2 billion annually. Much of this cost can eventually be avoided through increased production of thickly muscled, meat-type cattle which have the ability to produce high quality lean with little excess fat.

Genetic improvement of beef cattle along these lines will take time but should be hastened when superior meat-type cattle receive the recognition and market prices they merit. This recognition will be facilitated by the quality-yield grading requirement.

As a result of the changes in the grade standards, there is also slightly leaner beef in the Prime and Choice grades and more uniform eating quality in Choice and Good grade beef.

Slightly leaner beef in the top grades is a result of changes in the marbling-maturity relationships for beef from young cattle under about 30 months of age.

Marbling and maturity are the two major factors used to evaluate the quality or palatability of beef. Generally, marbling (flecks of fat within the lean) enhances beef eating quality and increasing age has the opposite effect. Therefore, in the previous standards, in each of the grades, an increase in marbling was required with increases in maturity. However, recent research has shown that for beef from young animals - those under about 30 months of age - advancing maturity has no significant effect on eating quality.

Therefore, to qualify for a particular grade, the revised standards permit all such young beef to have the same degree of marbling. This reduced the marbling requirements for Prime and Choice grade beef - but only to the level that had been required for the youngest beef in these grades - beef from cattle about 9 months of age. Since most Choice and Prime beef is produced from cattle about 18 to 24 months in age, consumers are now getting slightly leaner beef in these grades than they were under the previous standards.

Research conducted at a

number of State universities indicates that for beef from young animals, there is no measurable difference in eating quality associated with such reductions in marbling. Hence, a U.S. Choice sirloin steak graded under the current standards should be just as tender as a U.S. Choice sirloin steak graded under the previous standards.

Elimination of Conformation

The elimination of conformation or carcass shape as a factor in quality grading increases the uniformity and consistency in eating quality within the Choice and Good grades of beef. Variations in conformation have no effect on the eating quality of beef. Under the earlier standards it was necessary to arrive at a "compromise grade" when quality and conformation differed. For example, a carcass with Prime quality meat, but only Good conformation, had to be graded Choice even though it had none of the characteristics of a Choice grade carcass. Dropping conformation as a factor in grading has eliminated this type of compromise grading so that each grade now includes only beef of that quality.

Marbling Minimum Increased

Uniformity of quality in the Good grade was also increased by another change. The minimum marbling requirement for Good grade beef was increased slightly, making the range of quality within the Good grade narrower than it was previously. The result is a very uniform quality grade

Spider mite is problem

The spider mite or red spider often infests flowers, shrubs, and trees during July, says Louis M. Vasvary, extension specialist in entomology at Cook College, Rutgers University.

Common victims of the spider mite are azaleas, boxwood, maples, elms, roses, juniper, spruce and other ornamental plants.

Spider mites are tiny, oval, soft-bodied creatures. Large numbers of them build up under favorable conditions. In fact, a complete life cycle can be passed in about 10 days.

Mites injure plants by

attacking the foliage and sucking the plant juices. Light infestations appear as a stippled pattern on the plant leaves.

As the infestation gets heavier, the individual spots run together causing the leaves to turn yellow and eventually drop off.

Diazinon sprays will give fairly good control of small infestations in home plantings.

To control heavy mite infestations use a miticide such as dicofol (Kelthane) or an all-purpose garden spray, advises Dr. Vasvary.

Sewing winners named

NEW YORK, N.Y. — Mrs. Pauline Battaglia, Schnectady, N.Y., and Mildred Kirner, Berwyn, Pa., were named winners in the National Grange Sewing Contest, the largest general sewing event in the nation, it was announced here recently.

Mrs. Battaglia won 3rd place in Class C, and Miss Kirner took honorable mention in that category.

Entries judged on the national level were first place state winners from 38 states. Over 35,000 garments were judged during the past month at local and state levels prior to the final national judging.

of beef which should appeal to consumers who want beef with less fat than they get in the Choice grade and it should usually sell at a lower price.

Cooking Beef

Best results come from selecting the proper cooking method for the quality and the cut of beef that you purchase. There is no need to change your cooking practices because of the recent changes in the beef grade standards - the same methods will still apply.

THE POWER YOU NEED... WHEN YOU NEED IT!

The last thing you need during your busy season is a tractor down for repairs. It really is costly when the unit is a new one that you were depending on.

When you purchase a new Case, you're protected by our Assured Availability Plan. If for any reason your Case has a breakdown during the warranty period, and it's in one of your peak production seasons (tillage, planting, harvesting) and we can't repair it in 48 hours, we'll supply you with a free loaner tractor until yours is ready to go.

Simple as that. No lost time or missed schedules that can keep your yield down.

Stop in today for complete details.

New from HESSTON

Hesston 1010 Mower-Conditioner gives you a 10' header with center-pivot maneuverability.

Conditioner Width 110 in.

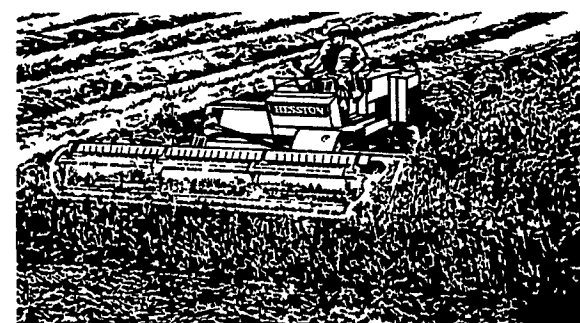

It's almost like operating a self-propelled! But the 1010 Hydro Swing® has all the economies of a pull-type. And its 10' header insures an easy fit into any size field.

Key to its maneuverability is center-pivot design that allows the header to work on either side of the tractor and anywhere in between. Famous Hesston conditioning system delivers quality hay. Swathing shield or windrow forming and fluffing shield lets you follow your own hay curing management plan exactly.

Hydrostatic header drive and hydraulic header control allow on-the-go positioning for added convenience.

Ask your Hesston dealer about the 1010 today!

Hydro Swing is a registered trademark of the Hesston Corporation.

Get multi-crop flexibility at an economical price! Hesston 6200 Regular Duty Windrower

Interchangeable headers adapt this machine to almost any crop you'd want to windrow. Big 16' and 20' draper headers handle huge grain acreages. Standard auger headers in 10', 12' and 14' sizes handle alfalfa, native hay and sorghum sudans. Special auger headers let the 6200 work in grass seed, peas and mint.

Whatever your crop you'll get reliable performance from proven Hesston features. Simple belt transmission for easy maintenance. Effortless Trim Steering to allow all but extreme and reverse steering with the right hand lever only. Vari Drive for independent ground and engine speeds.

A Hesston 6200 gives you big self propelled power with a minimum investment. Find out more about putting one to work on your place today.

Amy Jo Peters: a complicated young woman

One of the many facets of Jo's personality is her love for horses.

LEBANON - Amy Jo Peters is like a game of dominoes with a few pieces out of line - just when you think you have her figured out and the dominoes are falling like they should, she knocks one out of alignment and everything comes to a stand still. After a little reflection, the pieces start to

fit together and the dominoes start falling again, only to run into another fascinating snag later on as you get to know her better.

A tall, slim, and leggy girl with the proverbial long, thick, and wavy blonde hair and blue eyes, Amy Jo makes a very striking first impression. Relaxed and

informal, sitting on a lawn chair in her bathing suit, she appears to be a confident, extremely feminine fashion model type: not at all the sort of girl who would be interested in agriculture.

Then, she says, "I go by Jo," and she begins to list her 4-H and FFA activities, and suddenly, she metamorphosizes into a tomboy-type.

The 18-year-old daughter of Mr. and Mrs. Victor Peters, 1805 Russell Road, Lebanon, Jo participated in this year's FFA Princess contest at FFA State Days this week. An uncanny blend of feminine wiles and tomboyish traits, she is a stunning young woman.

Her list of success is long. Jo has the distinction of being the first girl to enter the agriculture program at Annville-Cleona High School from which she graduated in 1975. In her senior year, she was also the first girl to receive the Keystone Farmer degree from that school.

"I was really proud to get

it," she asserts, "because I was the first girl, and it was really all I was working toward."

Her projects were always with horses in FFA, and she had the same interest in 4-H. A member of the Lebanon Hoof and Horns club for four years, she was instrumental in starting the club along with several interested neighbors. For three of the four years she was a member she was also president of the organization.

During her time in FFA and 4-H, she accumulated over 125 ribbons, "mostly blues and reds," in horse shows. In her projects, however, she always received top honors and qualified for districts for the past three years.

At present, she is still actively involved in horsemanship. This year she took first place in State Horse Proficiency. Her specialty is in poles and barrels competition.

She also owns five horses,

and boards, shows, and trains for other people. She says this is her own business venture because, "I don't else at home rides."

GLEANER Combines

give you extra-bushel capacity.

One of the reasons for the extra harvesting capacity and efficiency of GLEANER Combines is the down-front cylinder. An exclusive design that cuts the distance your crop has to travel... only 15½ inches from the back of the header to the cylinder. And this reduces bunching, choking and uneven cylinder wear. All other combines have the cylinder set up high.

Other exclusive features center-line design for balanced weight distribution, low center of gravity, all-around visibility, two and three-stage separation puts more grain in the bin, safety

concave door automatically ejects rocks and other potentially damaging objects that enter the cylinder and concave area.

All this is just a part of what makes GLEANER Combines so great. Ask your Allis-Chalmers dealer for the rest.

my Jo

(continued from Page 60)

According to Jo, she first started training horses when she was 10 years old, and investing and building until she had as many as one time, which she took care of.

She has the number to five which she owns and sells for profit.

Of course, I always say to be sold, then I get fed and can't bear to with them. But, 13 at time taught me a lesson - just too many," she says.

She also does blacksmith work for herself and others. To learn this skill, she worked beside Bill Marshall of Hershey for about two months. Now she can trim hooves, reset shoes, and correct certain common hoof ailments.

"I'm sort of a handyman," she grins.

She is also a full time employee of Valley Animal Hospital, Palmyra R2. She feeds, waters, and generally takes care of the dogs and cats. She adopts them also she has 25 cats at their home which she jokingly refers to as a "refuge for homeless animals."

At Valley Animal hospital, she also assists in surgery.

Her duties mainly consist of taking X-rays, and setting up and taking care of the table. She prefers large animal surgery to "the little stuff" as she calls it.

When it comes to hobbies, she's true to form. At Annville-Cleona she was on the track team where she threw shotput, and ran the half-mile. She also was a long distance runner. In hockey, she played center halfback for three years.

Jo also likes to do needlework. Her favorite types are crewel and embroidery.

So far, the dominoes have fallen as expected. Now, for the one that stops the whole game - Jo's aspirations for

the future are to be a professional dancer, and to possibly live in Las Vegas some day, where her brother now resides.

This desire is not too unexpected, considering that she had modeled non-professionally on occasion and has seen and enjoyed city night life while visiting her brother.

Whether she chooses city or country life, Amy Jo's domino game will undoubtedly always fall in place. It's this unpredictability which all comes together in the end that gives her the charm she has.

Five girls in running for Dauphin dairy princess title

HARRISBURG - Five dairymen's daughters have entered the 1976 Dauphin County Dairy Princess Contest which will be held at 7:30 p.m., on Friday, June 25, at the Colonial Park Mall according to Melinda D. Waybright, Extension Agent 4-H.

Vying for the title are:

Donna Brandt, 17, daughter of Mr. and Mrs. Carl Brandt of Hershey. She is a student of Lower Dauphin High School and a member of the varsity tennis team, Future Secretaries of America, Business Club, and Class Council. The Brandts own 40 Holstein and Brown Swiss cows.

Joy Marie Byers, 17, daughter of Mr. and Mrs. Lloyd Byers of Middletown, is a recent graduate of Middletown High School. She was a member of the National Honor Society and assistant attendance clerk of Middletown High School. She has been selected as Rotary Student of the Month for March 76, and for the 1974-75 Edition of Who's Who Among American High School Students. The Byers own 60 Guernsey and Holstein cows.

Darlene Fetrow, 17, daughter of Mr. and Mrs. Leroy Fetrow, Palmyra, is a student at Lower Dauphin High School. She is an active member of the East Hanover Eager Beavers 4-H Club participating in clothing and food projects. The Fetrows own two Holstein cows.

Deborah L. Miller, 17, daughter of Mr. and Mrs. Fran Miller, of Halifax, is a student at Dauphin County Technical School. At school

she is a member of county chorus, Future Homemakers of America, Drama Club, Vocational Industrial Clubs of America, and careers in Health Club. She is an honor student, member of Girl Scouts, and has done volunteer work at the hospital. The Millers own 41 Holstein cows.

Theresa Watts, 17, daughter of Mr. and Mrs. Nelson Watts of Hummelstown, is a student at Lower Dauphin High School. She has been an active member of the Spanish Club. The Watts own 40 Guernsey cows.

Reigning Dairy Princess Marjorie Hoffer, daughter of Mr. and Mrs. Aaron Hoffer, Middletown, will crown the new princess.

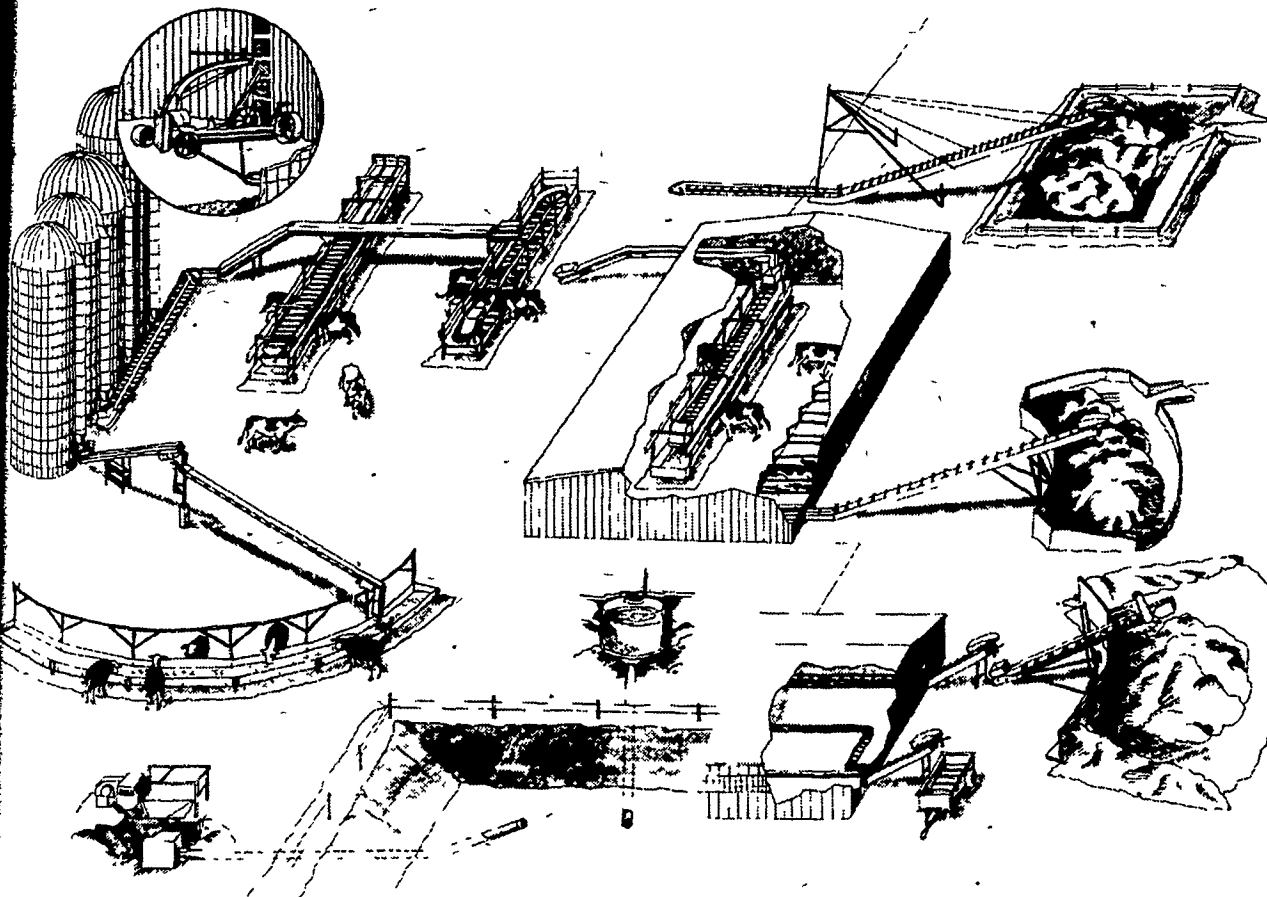

Ron Drake WHP radio personality will be the master of ceremonies for the contest.

A milk drinking contest will be held prior to the event at 7:00 p.m. County 4-H Clubs have challenged local FFA chapters and audience participation in the contest is invited. Prizes will be awarded.

ACA is working to unite farmers

By JOANNE SPAHR
VALLEY FORGE

"We're out to create a balance, really, between the farmer, the consumer, and men in agribusiness," said Wes Gross, a member of the Agriculture Council of America (ACA) at a mid-year meeting of its board of directors and advisory council held a week ago at Valley Forge.

Across section of agricultural interests was represented at the three-day forum including individual farmers, implement dealers, farm organizations, women in agriculture, and the media.

Everyone involved in ACA is striving to unite farmers across the nation and to have them "Stand Together," as their slogan states, in promoting clearer understanding between the farmer and the consumer.

"Every group has an organization - there's the dairy organizations, the wheat organizations, the soybean organizations - which are good for the farmer - but, we need to be united and to promote understanding between the farmer and the consumer," explained Jack Smith, a member of the ACA board of directors.

Eugene Glock, vice-president of the American Soybean Association and a member of ACA, carried this thought even further.

"We're all consumers - including the farmer. The beef producer has to buy corn for his animals, and the corn producer has to buy meat to live. So, we all have something in common."

With this in mind, the ACA is trying to connect the circuits of communication

(Continued on Page 631)

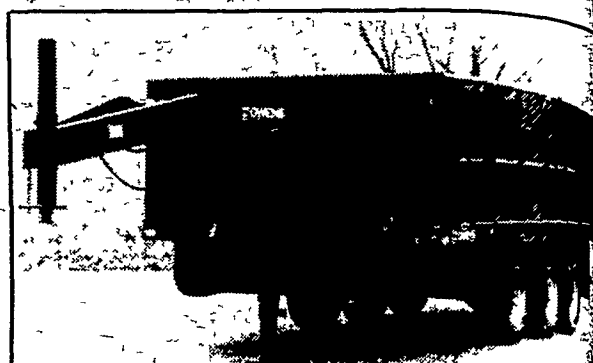

A panel of experts discusses a designated topic with local and national callers over the Agriculture Council of America's "Farm Line." Pictured above answering telephone calls in ACA's Washington, D.C., office are: (left, front to back) Robert W. Cox, administrative secretary, National FFA Alumni Association;

Allen Zeithamer, young farmer Alexandria, Minn.; state representative Willis Eken, (D-Minn.); (right, front to back) James Webster, chief clerk and press secretary, Senate Committee for Agriculture and Forestry, and Walter Jacoby, vice-president, programs, American Institute of Cooperation.

John Dierbeck, Jr. presents the new "Public Service for Agriculture" program during the Agriculture Council of America mid-year meeting recently.

There are approximately two and one-half times as much cattle in Argentina as there are people!

OWENS FARM TRAILERS

Owens helps carry the load with a complete line of fifth wheel and type trailers. Thousands of owners have discovered that Owens means durability, versatility and economy. So, whatever the need, whether hauling grain, livestock, lumber or any other load, Owens has the trailer to fit the job. Dealerships available.

We have a better way of getting zinc through to plants.

It's called NZN™ a patented combination of nitrogen and zinc in liquid form. In foliar application, NZN has proved about four times more effective than other zincs. Including the more expensive chelated zincs.

In addition, NZN supplies nitrogen. So besides getting more zinc into plant tissues faster than ever before, you're getting nitrogen in as well. And what doesn't get into the leaves, is absorbed through the soil into the roots.

So for getting maximum results from every pound of nutrient applied, NZN is by far the most efficient zinc you can buy. Test NZN against any other zinc. And you'll be convinced before the season is over, for getting zinc into plants, nothing comes close to NZN.

ACA

continued from Page 62]

the groups, mainly in the media. "Public program, "Public for Agriculture" to begin operation in June, was introduced at the meeting.

is an informational which will provide assistance to ACA members and the news. The members in the

organization will pool their resources, materials, and results, then, categorize all the information. In this way, there will be ready access to facts.

According to the most recent publication of ACA UPDATE, PSA is broken into five categories: reference sources; films and slide presentations; audio services; printed materials; and media service.

The program will be coordinated through a

special toll-free line into ACA's Washington office, personal visits, and written reports.

"If you need a speech, you call this number. Or, if you need a visual, you give us a call, and if it's fact you need, just pick up the phone," explained John J. Dierbeck, Jr. ACA advisory council member and public relations manager for International Harvester.

ACA has other programs to unite the urban dweller and farmer and to keep the lines of communication open.

One of these is the City-Farm Swap program, which consists of weekend visits by urban dwellers to farms and vice versa.

Another program is "Farm Line" which utilizes a WATS line to give experts and local people a chance to discuss opinions and philosophies on given topics.

"Farm Line" is in operation for one day a month at a specified time.

The group also has posters and billing inserts stating their slogan, "Stand Together. Let's tell America what farming means to this country," in bold white lettering on a black background. These will be displayed in implement dealerships around the county.

A 3 1/2-year-old organization which is non-profit, non-political, and non-legislative, ACA is made up of about 1000 individuals and 500 companies and organizations.

Broiler facts published

WASHINGTON, D.C. - If per capita broiler consumption in the fourth quarter of 1976 is at the same level as a year earlier, wholesale prices (nine-city delivered) would probably average about two cents per pound below last year's 45 cents, according to a U.S. Department of Agriculture (USDA) publication released in early June.

The report, "Broiler Marketing Facts - Fourth Quarter 1976," points to a stronger competition from larger supplies of red meats, as increases in pork more than offset the declines in other red meats. Partially offsetting this are expected higher disposable consumer income and rising employment.

Feed costs in the fourth quarter will be highly

dependent on the 1976 corn and soybean harvest both here and abroad. Record U.S. feed grain crops, mainly corn, are projected, while the soybean crop may be down as much as 10 per cent from last year. On balance, feed costs may be near a year ago. Other costs, including marketing and processing, will be higher in the fourth quarter of 1976 than a year earlier.

Copies of "Broiler Marketing Facts - Fourth Quarter 1976," developed by the Poultry Division of USDA's Agricultural Marketing Service and approved by the Outlook and Situation Board of USDA's Economic Research Service, are available from the Information Division, AMS, USDA, Washington, D.C. 20250.

N.J. picnic big treat

FLEMINGTON, N.J. - The Hunterdon County Board of Agriculture's annual Farmer's-Businessmen's Picnic will be held beginning at 6 p.m. on Thursday, July 22 at the Hunterdon County Democrat Office on Minneakoning Rd.

Highlights of the event will include a tour of the newspaper plant and a special appearance by Allen Grant, the newly elected president of the American

Farm Bureau Federation. His speech is expected to be highly interesting, according to the Hunterdon County Extension Agent. Grant is a farmer from Visalia, Calif.

Anyone wishing to get tickets for this affair is urged to do so through the county agent's office as soon as possible. Grant is a national figure and his remarks are expected to attract a sizable audience.

Hawk Mt. — a refreshing mini-vacation anytime

One of the many year round features of Hawk Mountain is its bird feeding stations which can be viewed from picture windows provided in the sanctuary headquarters.

By JUDY MITCHELL
Berks Co. Reporter

KEMPTON - The Hawk Mountain Sanctuary, located a few miles west of the village of Kempton, is a wildlife refuge established in 1934, which is privately maintained by the Hawk Mountain Sanctuary Association, a non-profit organization. During the months of September, October, and November visitors flock to the sanctuary to see the migrating hawks and eagles from its two lookout sites. However, visitors interested in natural scenery, wildlife, or plants

will find a spring or summer excursion an extremely rewarding experience.

Upon reaching Hawk Mountain, the visitor sees signs leading to the headquarters building which houses an impressive mobile display of migrating hawks, eagles and falcons. The purpose of the sanctuary is, however, to offer protection to the birds or prey, and one exhibit sign points out that all of the birds on display were killed by accident.

Outside the picture windows provided on one wall, are feeding stations in a quiet setting of trees and

fountains where a number of species of smaller birds can be observed before the visitor sets off for the trail which leads to the lookout sites.

The lookout trail, for the most part, offers an easy climb, but the rocky path demands a leisurely pace which encourages an appreciation of the cool quiet and the beauty of the mountain foliage and rock formations.

The South Lookout, the first reached from the trail, provides a magnificent patchwork view of the Eck-

ville area. A sign near the site identifies two large, odd-shaped, gray formations cut in the green fields as "rivers of rocks." According to geologists, one million years ago glaciers were only a few miles from the sanctuary, and a combination of the steep slope, water melting from the glaciers, and a slippery shale base caused rocks to slide and form these boulder fields.

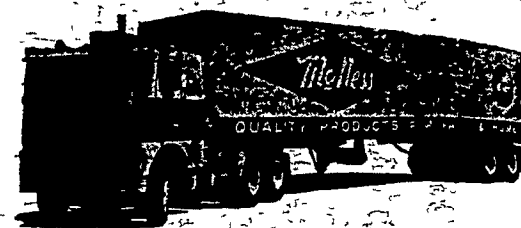

Beyond the South Lookout, markers direct the hardy hiker to the North Lookout which is located approximately three-quarters of a mile from the trail's beginning. The going becomes somewhat rougher as the trail advances upward, but the trip is well worth the effort. Just before the lookout itself, lies a beautiful sandy area where steep cliffs and massive trees create a cave-like effect. Signs explain that, according to geologists, the sand under foot was actually the sea floor when, 500 million years ago, most of eastern Pennsylvania was part of a vast inland sea that extended to Kansas.

The North Lookout is composed of marine-derived Tuscarora sandstone and occupies a position 1521 feet above sea level from which the slope plunges almost straight down to the Little Schuylkill River. From this vantage point there is a view 70 miles of eastern and valley lands including the

area of New Ringgold almost directly below.

For those wishing to witness nature's delights at Hawk Mountain Sanctuary,

sturdy footwear is recommended. Accommodations within the sanctuary are limited to rest rooms and [Continued on Page 66]

GO Zero Concord FROM TEAT TO TANK!

The ZERO CONCORD is the only system that provides stable milking vacuum at the teat end — in parlor or stanchion barn — with a low or high, short or long, pipeline — and without injecting air into the milker units to move the milk. Only with stable vacuum and no air injection can you hope to reduce leucocyte counts up to 65% — increase milk production as much as 20% — and prevent off flavor and rancid milk.

The safe, stable vacuum is made possible by a patented, scientific principle... TWIN-VACUUM... whereby one vacuum milks the cows, and a different vacuum moves the milk through a separate pipeline into the bulk tank. In addition — thanks to ZERO's patented SPATTER-SPRAY Automatic Washer and new, improved, high capacity, transparent milker unit — you have built in, "push-button" visible self-cleaning and sanitizing of the entire system — without disassembling. And there are many other advantages.

Come in, Write or Phone for Full Information!

Randy Ranck, son of Mr. and Mrs. Lester Ranck, Quarryville R2. Randy put his philosophy of serving others to a test on June 15, 16, and 17 when he aspired to selection as a state officer at the FFA convention at Penn State.

"Having been a delegate to several conventions and having held several local and county offices, I have seen how the officers and members and community cooperate and serve each other. I would like to be a part of this leadership which involves serving others," explains the Solanco senior. Randy has had a wide range of experiences in FFA, community projects, and church activities which have given him the opportunity to speak out for agriculture and rural youth.

The eighteen-year-old's FFA projects started in his freshmen year with one charolais steer. During his sophomore year, he raised two steers, sixteen hogs, and one acre of corn. He found that trying to show two steers at fair time was dif-

ficult, especially since he helped his father with custom silo filling at the same time.

"It's a very busy time of year," Randy commented. He sold the corn to his father at a fair market price and made a nice profit for his investment. When asked which project he liked most, Randy said the hogs gave the best financial return for the least work, but corn made the most profit over cost.

As a junior, Randy carried projects of one steer, one acre of corn and 15 hogs. This year Randy has two steers, one acre of corn and six hogs. For his project book he received a Gold Medal in the state level.

Randy says he was limited in his number of projects because of the farm set up. The facilities are for large-scale operations with pens to hold 100 or more animals.

"I had to use the corners and odd bits of space available," Randy remarked.

Along with a growing knowledge of his projects, Randy increased his activities in FFA over the last four years. As a sophomore he served as secretary and

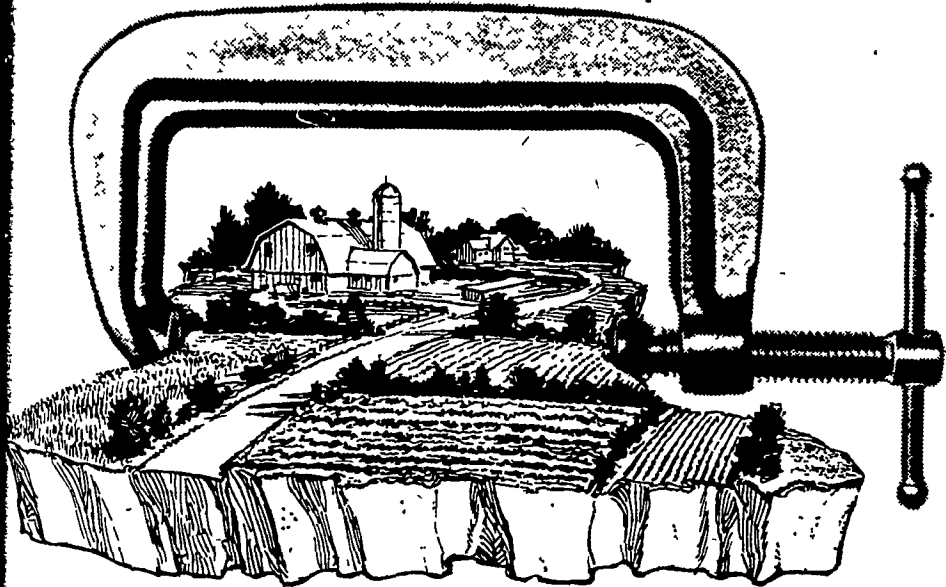

Randy Ranck, state FFA officer candidate from Solanco, has an acre of corn as one of his projects.

assistant treasurer for the Solanco chapter. In his junior year he represented Solanco at the county meetings and was a delegate to the Penn State convention, serving on the budget committee. This last experience prepared him to serve as the Lancaster county treasurer this year while also holding the office

MODEL 200 AUTOMATIC

The Automatic Model 200 Milker, a major development in the dairy industry, is the first milker that is controlled by the cow. When the cow is ready, the machine begins to milk and an indicator light goes on to tell the operator that it is milking. The Model 200 automatically stops milking when the cow is through. The indicator light will then go out telling the operator that the cow is milked out.

Farm price index revised

WASHINGTON, D.C. — USDA's Statistical Reporting Service has issued a revised monthly index of prices received and paid by farmers from 1965 to date. The reason: The re-evaluation of the weighting given to various commodities.

For example, under the old 1953-57 base weight period, beef cattle prices were weighted at 15.3 percent, (meaning they accounted for 15 percent of the index) wholesale milk prices, 12.6 percent, eggs, six percent, cotton, 8.4 percent, tobacco, 4.1 percent, wheat, 6.9 percent, hogs, 10.4 percent, soybeans, 3.1 percent.

Under the new, 1971-73 base weight period, corn, soybeans and beef cattle have been upgraded, while wheat, cotton, tobacco, hogs, milk and eggs have been all downgraded.

The new weightings: Wheat, 6.1 percent; corn, eight percent; tobacco, 2.4 percent; soybeans, 7.8 percent; beef cattle, 25.8 percent; hogs, 8.8 percent; wholesale milk, 11.1 percent.

In other words, the importance of such old standby commodities such as cotton and tobacco, has declined sharply in the over-all price structure... cotton declined nearly 2-3, tobacco, nearly 50 percent, eggs more than 40 percent.

At the same time, soybeans are 2 1/2 times more important as they were... corn's importance has increased 50 percent... cattle's importance has increased 60 percent (though

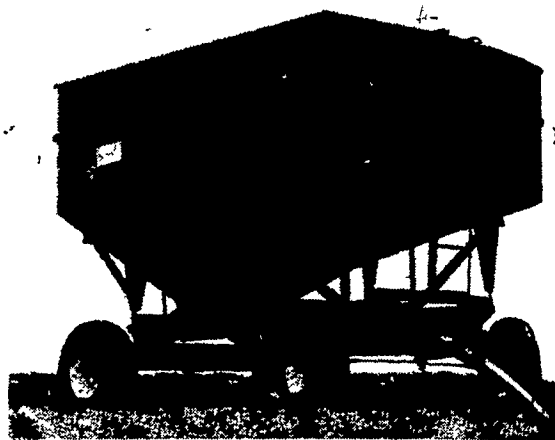

hog's has decreased 15 percent).

Single copies of "Index Numbers of Prices Received and Prices Paid by Farmers, January 1965 - April 1976, Revised," Pr 1-5 (76), is available on request from USDA, Washington, D.C.

The sanctuary is open from 8 a.m. until 5 p.m. daily, and approach roads are Pennsylvania Routes 895 to the west and 143 to the east and a rural road clearly marked with Hawk Mountain Sanctuary signs connecting the two state highways.

*You'll Never Know How Easy
Milking Can Be Until You...*

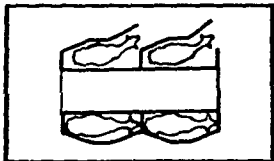

INSTALL ANY OF THESE

Universal
PIPELINE MILKING SYSTEMS

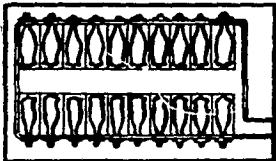

1 A NEW HERRINGBONE

Universal Stalls offer more protection to the operator and better cow control. One man can handle more milkers in a herringbone operation than in other parlor systems. Big advantage: faster operation for milking more cows with much less milking time required... maximum production per man hour. Feed boxes and dividers are stainless steel, remainder electro-zinc plated and galvanized.

2 SIDE-OPENING TANDEM

Gives ideal individual cow control. Maximum milk production per cow, easiest cow handling and automatic feeding. All Universal Stalls are electro-zinc plated stainless steel feed troughs available.

3 STANCHION BARN

... Eliminates miles of walking, tons of milk carrying drudgery. Farmer utilizes his present facilities with UNIVERSAL modernization to save time and work.

Rose Brandt is dairy princess

By JOANNE SPAHR
LEBANON, Pa. — The overflowing crowd of more than 200 was standing in the driveway when Rose Marie Brandt was crowned the 1976 Lebanon County Dairy Princess last Saturday night at Boscov's auditorium, Lebanon. The event culminated a threeday milk promotion held at the mall

featuring milk displays, a petting zoo, and an opportunity for shoppers to milk a real live cow.

Rose Marie, the eighteen-year-old daughter of Mr. and Mrs. Bernard Brandt of Fredericksburg R1 is a 1975 graduate of Northern Lebanon High School and is presently employed as an advertising sales representative for WAHT radio.

The dynamic brownette with the easy smile described her father's dairy operation as consisting of 68 acres with 30 Holsteins. She mentioned later that she recently took care of all 30 cows when her parents went on a vacation for a week.

Taking care of 30 cows is a big job for anyone, but Rose Marie has had preparation for the task. As a member of 4-H for 10 years, she has had nearly every office from songleader to president in the Norlebo Dairy Club. She's also been in dairy judging through 4-H and is a member of the Lebanon County Holstein association.

Rose Marie has won many blue ribbons in showmanship and went to districts for this. She has also won in type, a success that is very important in dairying.

A girl with many interests, she belonged to the Fredericksburg Community 4-H Club where she took clothing, food, interior design and vegetables.

Yet, Rose isn't totally farm and domestic oriented. She dreams the all-American dream - she wants to be president of the United States, and she may make it. She has already begun climbing the political ladder by working as a Democratic committee woman. She adds, however, that after her political successes, she wants to retire to a dairy farm with registered Holsteins.

To round out Rose Marie's bill of interests, she is an active member in Boscov's Teen Club and Mt. Zion Road Church of the Brethren Chancel Choir. She is also taking classes in retail at Harrisburg Area Community College.

First runner up in the Lebanon Dairy Princess contest was Carmelle Hernley of Lebanon R3. She is the daughter of Mr. and Mrs. Delmas-Hernley who own a 63 acre farm with a herd of 45 Holsteins.

Carmelle is a sociology and German major at

Rose Marie Brandt, this year's Lebanon County Dairy Princess, receives her tiara from last year's queen, Brenda Maulfair.

Susquehanna University where she is junior. Her future plans are to possibly go into a branch of the armed forces which utilizes her college education.

Her dairy activities include helping her father do

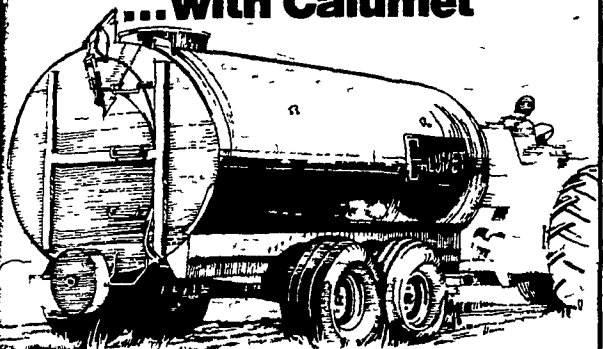

the milking by washing the tank, and recording ear tags and lactation periods. She was also in the Fredericksburg Community 4-H club for seven years and had two dairy projects during that time.

What's New

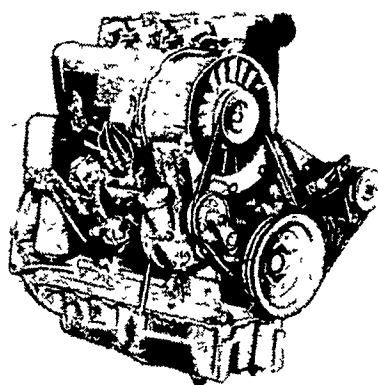

Motor Starter

A new rotary phase converter, Roto-Con Mark II, with an exclusive "start every time" feature, has been introduced by Ronk Electrical Industries, Inc., Nokomis, Ill.

With a unique new rotor design, the Roto-Con Mark II will start every time, even under the lowest line voltage or after a power outage. The rotary converter can actually start at a lower voltage than most normal motors can run on.

Other advantages of this new rotary phase converter are that it eliminates the need for auxiliary start capacitor banks or other equipment previously necessary on some rotary converters to assure proper starting of the rotary; requires no maintenance on the self-start feature; is completely automatic since it is built in as an integral part of the rotary base unit; eliminated "dead" spots which can result in burned out converters, and allows for a more compact control panel which reduces the overall size and weight of this new converter.

Ronk is offering a complete line of Roto-Con Mark II rotary converters with this new "start every time" feature for which a patent is pending.

SOYBEAN ROASTING ON YOUR FARM

For peak feeding value have your soybeans roasted. (To kill toxic enzymes in raw soybeans.)

1. Roasted soybean (not just cooked), increased digestibility by 15 percent.
2. Increased weight gain for beef & hogs.
3. Increased butterfat in milk & egg production.
4. Improved animal health, reduced vet bill.
5. Eliminates hauling to the mill & back to farm.
6. Feed your own grown grain. (Not exchanged with others)
7. Beans remain whole. Store for months without losing any feeding value.

New extension veterinarian named

Dr. Lawrence J. Hutchinson, a native of Chester county, has been appointed to The Pennsylvania State University's Cooperative Extension Service staff as associate professor of veterinary science extension, effective July 1.

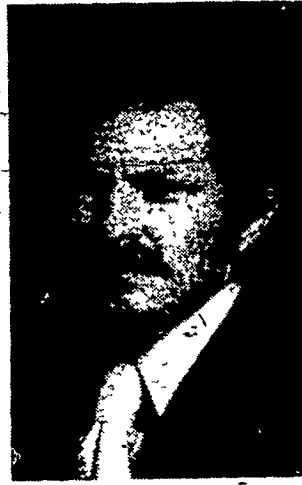

Dr. Thomas B. King, Penn

State associate dean for extension, points out that Dr. Hutchinson will work closely with county extension agents and practicing veterinarians in conducting educational animal health programs in the Commonwealth.

He succeeds Dr. Samuel B. Guss, professor of veterinary science ex-

tension, who recently retired.

Raised in West Chester, Dr. Hutchinson received a bachelor of science degree in pre-veterinary medicine in 1959 from Penn State and doctor of veterinary medicine degree from New York State Veterinary

Lawrence J. Hutchinson

College at Cornell University in 1962.

Since 1964 he has been a practicing veterinarian in Honey Brook, Pa. He also had private practices in Amsterdam, N.Y., and Vergennes, VTO. He is the father of five children.

History of dairying

Mention of milk and cattle is found in records of the very earliest civilizations. From the Old Testament comes reference to a "Land flowing with milk and honey." History tells us that in ancient days, cattle were so highly esteemed for their milk as a source of food that they were worshipped. Even today in India the cow is a sacred animal.

Nine years before the Pilgrims landed on Plymouth Rock, the first cows had made their stormy passage to the New World. The settlers learned early that they could not survive without milk. By 1850 our cow population had increased to 6 million.

There was a time when the only way of obtaining fresh milk was to have one's own cow. As the population in towns and cities grew, however, some farmers made dairying a business. Huckstering it up and down the streets they dipped the milk from open containers

into any vessel the housewife might have to hold it.

Around 1880 the factory system of processing and distributing dairy products was first possible. This was due to certain scientific achievements. First the centrifugal cream separator was invented. Then in 1890 Babcock found a method to show the amount of butterfat in milk. In 1893 Thatcher invented a satisfactory glass bottle. All of these im-

provements, coupled with Louis Pasteur's discovery of the process which bears his name — pasteurization — were the beginnings of our present modern dairy industry.

Today, through mechanical refrigeration, fast transportation, sanitary laws, research and careful handling, Americans have the finest milk supply in the world.

— From Dairy Council

two blowers
in one

Compare this blower to conventional blowers. The Gehl FB99 has staggered fan blades, six on each side of the rotor. They actually give you two blowers in one. The timed delivery of material from alternate paddles provides maximum use of available space in the nine inch pipe. Result is increased capacity. Alternate paddles provide a steadier flow of air and material. Pressure and velocity is maintained as material is blasted up the pipe. No gaps. No slowdowns. No more silo bottlenecks.

**Nutrena Controlled Release CLS —
so different, it's patented**

Your cattle will like Nutrena Controlled Release CLS and you'll like the benefits behind this new development in liquid supplements. The patented process controls the release of protein-building ammonia nitrogen in the rumen compared with a conventional urea-based liquid supplement. This improves the feeding efficiency of the urea. And, the slow-down

means an extra margin of safety from urea toxicity—that's important when self-feeding liquid supplement.

Nutrena Controlled Release CLS liquid supplement—a product of Cargill research. It's great for dairy herds as well as beef cattle on range, pasture, stalks, stubble or in the feedlot.

Dairy cooking contest held in Berkshire Mall

By JUDY MITCHELL
Berks Co. Reporter

READING - An estimated crowd of over 100 persons gathered near the center of the Berkshire Mall on Monday for the dairy product cooking contest, the first of a number of special events scheduled for the Dairy Week celebration sponsored by the Berks County Dairy Association.

Contest winners were announced on Monday evening at which time contest director Helene Dreisbach expressed pleasure in the number of people who attended the final judging held earlier in the day. The audience had an opportunity to sample a number of the entries, and Helene added that there had been so many requests for recipes that arrangements were made to reproduce them for distribution throughout the remainder of Dairy Week.

Berks County Dairy Princess Cathy Yanos presented the prizes which included \$10 to the grand prize winner and Reading Fair passes for the first place winners in each category.

JoHanne Martz of Dreherstown was named

grand champion of the cooking event on the merit of her Ham n' Cheese Chowder, which was also awarded first place in the soups category. (Recipe to follow.)

Winners in the remaining categories were:

Mrs. Paul Youse, Oley, was the winner in the beverage division with a Hawaiian Milk Punch. Mrs. Robert Frantz of Temple took first place in Appetizers with her Cheese Appetizers, followed by Mrs. Paul Youse who entered a Deviled Ham Dip. Phoebe Ruth won for Salads with a Pineapple Cheese Mold, and also placed first in the Casseroles division with her Chicken Breast Casserole. Mrs. George Malsbury of Rehersburg came in second in the same division with a Creamy Ham and Cheese casserole dish.

In the baking division, Kathy Tyson of Sinking Springs won the top spot for Pies with her Exotic Pie, with Mrs. Paul Zerke taking the second position with a Coconut Custard pie. Mrs. Robert Frantz of Temple had the number one Cake recipe with Sour Cream Spice Cupcakes, and Mrs. Barry

Afraid You're Going Deaf?

Chicago, Ill.—A free offer of special interest to those who hear but do not understand words has been announced by Bel-tone. A non-operating model of the smallest Bel-tone aid of its kind will be given absolutely free to anyone answering this advertisement.

Send for this non-operating model to see how tiny hearing help can be. It's yours to keep, free. The actual aid weighs less than a third of an ounce, and it's all at ear level, in one unit.

These models are free, so write for yours now. Thousands have already been mailed, so write today to Dept. 0000, Bel-tone Electronics Corp., 4201 W. Victoria St., Chicago, Illinois 60646.

Pensupreme receives new look

LANCASTER — On April 26 Pensupreme became PenSupreme as Penn Dairies, Inc., adopted a new logo and trademark emphasizing the word Supreme.

Transition to the new logo design identifying all PenSupreme products will take nearly two years as the logo is changed in advertising, on trucks and signs, and on PenSupreme Grocerettes and PenSupreme Shoppes.

A Lancaster-based company, Penn Dairies employs more than 900 workers at the dairy processing center at 1801 Hempstead Road, a bulk manufacturing plant at York, six milk and ice cream distribution branches, 38 PenSupreme Grocerettes and six PenSupreme Ice Cream Shoppes. PenSupreme products are marketed throughout the Middle Atlantic States from Massachusetts to North Carolina and west to Ohio.

Since the founding of the company in 1890 in Stevens, as the Garber-Reist Company, many names and logos have been used by the firm: Elmdale Creamery, Garber Creamery, Ideal Milk, Purity Ice Cream, Lancaster Sanitary Milk and York Sanitary Milk.

The name PenSupreme was born in the early thirties as the result of a contest among Penn Dairies office employees. From time to time since then, the company made minor changes in the logo design, and in the late sixties modernized the type face.

Last summer, the marketing division hired a Princeton market research team to conduct a detailed survey to learn exactly what the name meant to customers and potential customers.

Guy O. Heck, vice president - marketing, commented on the results of the survey, "The survey convinced us that all we needed was a facelift to eliminate our middle-age wrinkles. So we contracted with one of the outstanding design and marketing communication consultants, Young, Goldman, Young, Inc., of New York, to undertake the project.

"During the months of planning and designing, more than 100 different logos were considered. Previous Pensupreme logos emphasized the first syllable - the Pen - reflecting the

company name, Penn Dairies, and the location in Pennsylvania, which was our major marketing area.

"Because the Pensupreme world is growing and greater geographical distribution of

our products into state other than Pennsylvania is now a reality, and because of the positive response to the word Supreme by survey respondents, we wanted the new logo to be easily

recognizable and to say more about our products and our company."

To accompany the new style PenSupreme, the company has adopted a fanciful fruit and flower

design on packaging signs and advertising.

In mid-June milk cartons displaying the logo and fruit and flower design will move down the production line. Each type of milk package will be color-coded to the product it holds - blue for HVD, green for Sleek 2 percent, magenta for skim, and the chocolate package. The next major change

will be the tractor trucks. Dominating striking black and background will be the logo and a band of fruit and flower design turning the trucks into billboards.

Other changes will follow as signs and advertising Grocerettes and Shoppe stationery and business cards take on the new look.

WHY IM-PRUV-ALL SILAGE ?

TDN
PER ACRE

Silage is important because it can increase the productivity of every acre of farmland. The farmer who puts up silage decreases his field losses. The feed he produces is nutritionally superior to the alternative feeds he might have settled for in years past. Beef cattle fed silage produce more meat per acre. Dairy cows fed silage produce more milk per acre. Naturally, then, the farmer can expect more profit on the bottom line when he puts up silage. We know that research shows that silage is superior to alternative feeds in yielding Total Digestible Nutrients per acre. And every farmer knows that higher TDN per acre is just what he's working for.

Alampi to be lauded

FLEMINGTON, N.J. - Friends of Philip Alampi, New Jersey's Secretary of Agriculture, are planning a special dinner in his honor on Sunday, June 27 at the Cedar Garden Restaurant beginning at 5 p.m. The announcement was made by the Hunterdon County Extension Service Office, here. Reservations for the dinner are being taken by Mrs. Clifford Snyder and Mrs. Eugene Van Ness. Anyone interested should contact the Hunterdon County Extension Service Office. Price of the tickets is \$15.

Buy Your Im-Pruv-All Silage Compound NOW

IM-PRUV-ALL

FERMENTED FEEDS

IM-PRUV-ALL IS A SCIENTIFIC COMBINATION OF INGREDIENTS THAT AID NATURE IN ACHIEVING AN EFFICIENT, RAPID FERMENTATION OF FERMENTED FEEDS.

IM-PRUV-ALL HAS BEEN DESIGNED TO IMPROVE FERMENTABLE FEEDS. OVER ONE MILLION TONS OF VARIOUS SILAGES WERE FERMENTED WITH IM-PRUV-ALL DURING ITS DEVELOPMENT PERIOD.

The following specific IM PRUV-ALL formulas have been developed to afford maximum improvement of different fermented feeds

- | | |
|-----------------------|-----------------|
| #101 Corn and Sorghum | #H44 Haylage |
| #202 Legumes | #G55 Grain |
| #303 Grasses | #BT66 Beet Tops |
| | #DH77 Dry Hay |

In addition to improving standard silages such as corn, IM-PRUV-ALL makes it possible to direct cut and successfully ensile alfalfa, clover, sudan, oats, wheat, sudex, pasture grasses, beet tops, and others

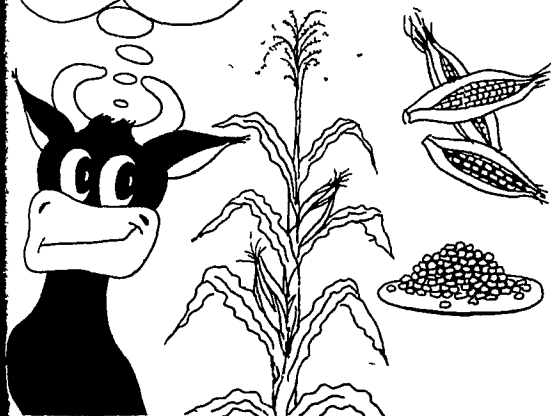

Tests by an independent laboratory have confirmed that IM-PRUV-ALL aids in achieving

1. Improved fermentation
2. Greater retention of plant juices and nutrients
3. Improvement in storability and digestibility
4. Reduced shrinkage

THE IM-PRUV-ALL PROGRAM MAY BE YOUR ANSWER

WHY
IM-PRUV-ALL
SILAGE ?
...TDN
per acre

Every acre of corn yields more Total Digestible Nutrients when fed as silage than when fed as yellow corn. Fewer acres feed more animals

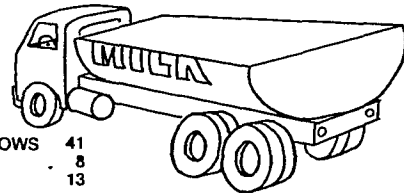

153
HEAD BEEF CATTLE PER 100
ACRES WITH NO FERMENTATION CONTROL

184
HEAD BEEF CATTLE PER 100
ACRES WITH **IM-PRUV-ALL**
FERMENTATION PRODUCTS

Since controlling time and heat in the ensiling process can result in more TDN, it is no surprise that more cattle can be fed from the same crop acreage. Studies have shown that the same 100 acres which can feed 153 beef cattle with regular silage can feed 184 beef cattle with silage to which our fermentation products have been added (based on in weight 450 lbs. out weight 750 lbs.)

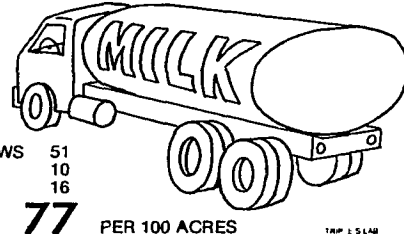

WITH NO FERMENTATION CONTROL

MILKING COWS	41	
DRY COWS	8	
HEIFERS	13	
TOTAL	62	PER 100 ACRES

WITH FERMENTATION CONTROL

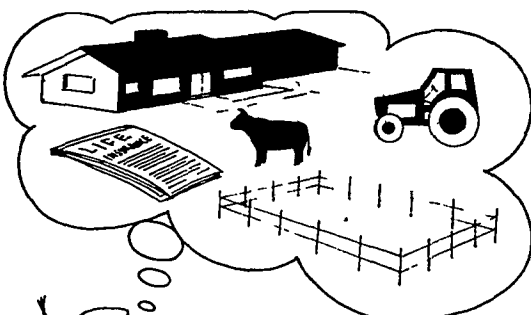

MILKING COWS	51	
DRY COWS	10	
HEIFERS	16	
TOTAL	77	PER 100 ACRES

Studies have shown that more dairy cows can be fed from the same acreage when our fermentation products are added to the silage. When regular silage from 100 acres feeds 62 dairy cows, fermentation controlled silage has been found to feed 77

CAN
IM-PRUV-ALL
SILAGE
MAKE YOU
MONEY ?

Since silage is superior to dry feeds in TDN per acre, the farmer can expect higher dollar yields from his silage. The increased TDN in silage means the farmer can feed more cattle with the same crop. He can produce more beef, more milk, and of course more dollars. But there are some dangers. Not all silage is the same. The farmer who wants to make sure that he makes more money with silage must make excellent silage. To insure consistent silage, he NEEDS our fermentation formulas

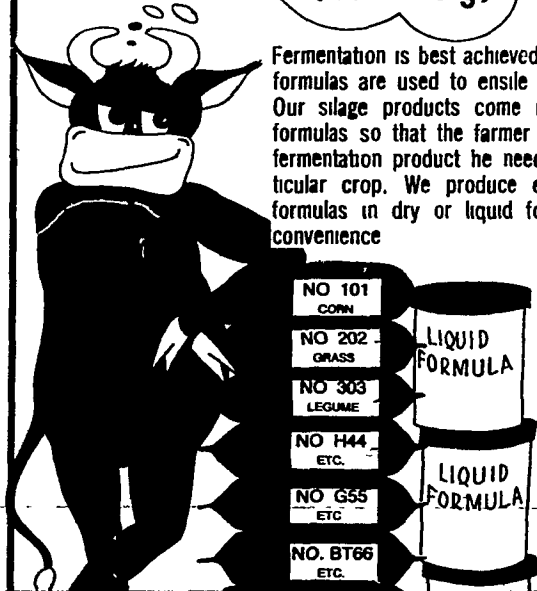

IT'S GOOD BUSINESS
TO INSURE YOUR HOME,
EQUIPMENT, LIFE, CROP,
STOCK, ETC.

WHY NOT INSURE
YOUR SATISFACTION ?

IM-PRUV-ALL

WHY **IM-PRUV-ALL** SILAGE ?
...They've got six
specific formulas !
(wet or dry)

Fermentation is best achieved when specific formulas are used to ensile specific crops. Our silage products come in six specific formulas so that the farmer can select the fermentation product he needs for his particular crop. We produce each of these formulas in dry or liquid form for added convenience

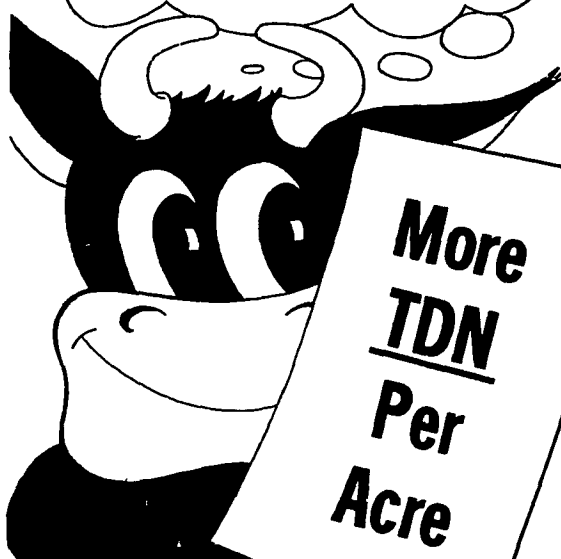

WHY
IM-PRUV-ALL
SILAGE ?

- A. simple
- B. safe
- C. convenient

Some silage products are difficult and even dangerous to use. Our products are simple, safe and convenient. They are manufactured under multi-national patents. One pound of product is used with each ton of silage material. They may be added in a variety of ways from hand sprinkling to controlled metering

WHY **IM-PRUV-ALL**
SILAGE ?

Because of the large amount of Im-Pruv-All 101 sold in this area, we can reduce the price to those of you who place your order and accept delivery before Aug. 15, 1976 on this large shipment.

McCoy discusses future

By DIETER KREIG

LANCASTER - "We aim to make this the most effective and efficient livestock market in the East," Bill McCoy declared when he took his first term of office as president of the Lancaster Stockyards, Inc., in 1972. The newly formed company had just been purchased from the bankrupt Penn Central Railroad Company at that time.

Last month McCoy was re-elected to his sixth term as president of the business he and the other executives guided to become one of the fastest growing livestock yards in the country.

Others re-elected as officers at the May 15 meeting were: James C. Dunlap and Robert S. Heilbron, vice presidents; and Robert W. Stauffer, secretary-treasurer. Rounding out the board of directors are John M. Hooper, Jr., who replaces his brother, Richard; Richard J. Blakinger, C. E. Burnett, Walter M. Dunlap Jr., Max Hempt, and Zane Kauffman.

McCoy noted in his president's report that 1975 was "another banner year." Income for fiscal 1975 was reported to be a record \$698,171.44 - representing a 25.31 per cent increase over the preceding fiscal year. "Livestock receipts increased in all categories with the exception of sheep," McCoy told the board meeting.

With sales volume increased so significantly, the Lancaster Stockyards, Inc., now ranks 24th in the nation in terms of receipts. The Yards also have the distinction of being third in per cent of increase over the preceding year.

Aside from significant

sales increases - notably in feeder pigs, calves and cattle - the Stockyards have received a new "physical look," McCoy reported.

A new hay barn was completed in March, allowing for additional storage space for approximately 200 tons of feed and bedding. Facilities for feeder pigs have been increased, giving the Yards a holding pen area big enough for 3000 feeders. Other projects being worked on now include a new ventilation system and a large animal holding pen. New facilities have been designed to make feeding, watering and manure handling easier. A manure storage area has also been added to the huge complex, located just north of Lancaster along Route 501.

Activity at the market has met with favorable response from farmers both near and far. It's not unusual at all for farmers to come in with truckloads of hogs and cattle from 150 to 200 miles away. Many of these producers have actually expressed a preference to market their cattle in Lancaster County rather than at auctions closer to their homes because of better prices and good contacts with cattle dealers for purchasing replacement feeders.

McCoy says that part of the reason for 1975 having been such a successful year is that "expanded services as well as several agribusiness forums which were held at the Stockyards." Examples of that were the beef grading seminar last Winter, and a more recent explanation of certification programs for cattle shipments to Canada.

The veteran cattle dealer is cautiously optimistic

The Lancaster Stockyards, Inc., purchased in 1972 from the bankrupt Penn Central Railroad, had receipts in fiscal 1975 which ranked 24th

largest in the country. Volume of sales rose faster here than in all but two markets in the nation.

about continued upward trends at the Stockyard. While cattle prices in particular are not what they were predicted to be, the volume of receipts has been fair. Nevertheless, McCoy does not believe the Yard will see the kind of increases in sales again this year, as it did last year.

Two of the marketing developments which are cutting into sales volume somewhat are direct sales to meat packers and meat retailing right off the farm. McCoy has reservations for

both of these marketing methods.

While acknowledging that cattlemen may in many instances be forced to go the retail route in search of improved profits, he's concerned about how much meat can actually be sold that way. "How many consumers would put up a freezer?" he asks. He also noted that it would be easy to move the better cuts, but not "the rest."

That situation is different outside of private homes. There cheaper cuts are

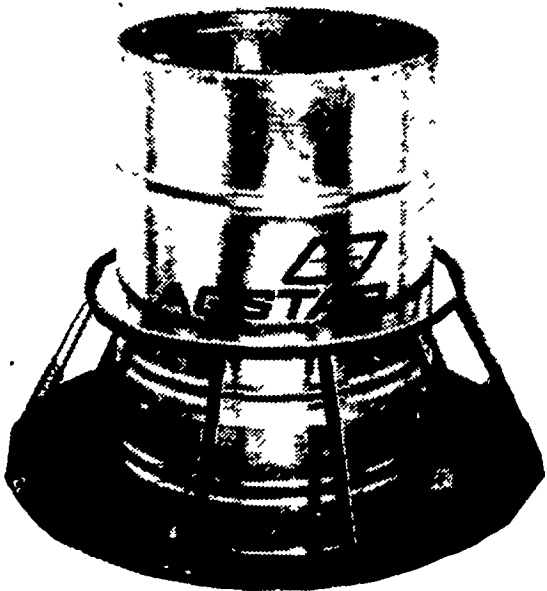

enjoying a time of big demand in comparison to choice cuts. The big reason for that is that the hamburger trade - particularly establishments like McDonalds and the others - is booming. Cattlemen do not have access to that market if they go the retail route.

On direct sales, McCoy says that farmers should jealously protect a competitive market. The competition will erode away if competitive bidding is taken away from the auctions. Furthermore, dealers at auctions are bonded, which

Save all of the quality that's in your hay crop

International 990 Mower-Conditioner

Get in and out of the field fast, and do a better job to boot. With the 990 you get clean cutting, and complete conditioning, whether your crop is heavy and tall, or thin and short. No machine you can buy offers you more in the way of quality construction, or ability to handle your needs.

- Choice of 7 or 9-foot widths; IH balanced head knife drive runs smooth, even at high speeds
- Big 44-inch reel runs at lower RPM to save leaves, treat crop gentler
- Controlled flotation platform cuts clean over uneven ground to save more crop
- Conditioner rolls adjust automatically to crop volume for uniform drying, open hydraulically to clear slugs
- Windrow placer attachment lets you put windrows in close-together pairs

No delay in being paid! Come along with your calves, see them slaughtered and bring your check home with you...

This is the original house of Frederick Leisser, Mabel Roth's ancestor who drove the Liberty Bell from Philadelphia to Allentown in 1777.

Ellis and Mabel Roth, descendants of Frederick Leisser, pose in their home. Mabel holds a volume of THE

HISTORY OF LEHIGH COUNTY, in which a picture of the farm is featured.

Ancestor on Bicentennial farm made history

By JUDY MITCHELL
Berks Co. Reporter
WANAMAKERS - Ellis and Mabel Roth run a 105-acre general farm operation located near Leaser Lake east outside of Wanamakers lower Lehigh County. They raise a number of ducks and steers, and together plant and harvest the crops, among them potatoes, hay, wheat and corn. Mabel is the seventh generation of her family known to have

lived and farmed the land, and on it she and her husband preserve, not only a 200 year-old family tradition of farming, but sites significant to the history of Lehigh County as well.

The Roth's live in a large stone and frame residence, the stone portion of which was built by Mabel's great-grandparents, Edwin and Carolina Oswald in 1849. A short distance to the north is the barn built in 1888, also by Edwin and Carolina, to replace the original barn which was destroyed by fire. But between and just west from the house and barn stands a small log house of indeterminate age, the home of Frederick Leisser, as it is pictured in The History of Lehigh County.

Although Mabel has been unable to uncover facts relating to her family's history beyond Frederick Leisser who lived on the farm at least as far back as 1776, the story of his distinguished journey in 1777 has been passed down from

generation to generation. It seems, as it was told to Mabel, that Frederick made frequent trips to Philadelphia to sell the apple-jack which he made

with the double fireplace which is still intact in the basement of his home. On the occasion of one such trip, his family began to wonder when he did not return at the

end of the two weeks it normally took to complete the errand. Frederick finally come home at the end of

Ancestor made history

[Continued from Page 73]

three weeks to explain the delay. It seems that when he arrived in Philadelphia, a search was being conducted for a worthy horse and wagon to carry the famed Liberty Bell from Philadelphia to be housed for a time in a church in Allentown. Frederick's

horse and wagon were "picked as the best," as Mabel relates it, and Frederick agreed to accept the honor. All went well until he reached Bethlehem where his wagon lost a wheel. The bell was removed to another wagon until the wheel could be repaired, after which it was returned to Frederick's wagon and the trip was

completed without further incident.

At the time when Frederick lived on the farm it was much larger than it is now, reportedly consisting of "several hundred acres," including what is now known as Leaser Lake. (As is often the case in century-old families, the spelling of the name was changed at some later date from Leisser to Leaser.) At the time, apple trees stood where she and Ellis now plant their crops.

Although Mabel can remember some of the orchards herself, her grandmother, Cordelia Sensinger, could recall when everything was in trees. She would tell stories, Mabel said, of how they used to drive to the top

of a nearby mountain and bring wagonloads of the ripened apples down the steep mountainside.

Because Frederick's descendants who have lived on the land for the past six generations have been mostly daughters who farmed it with their husbands, the farm's ownership has undergone a series of name changes. Before Ellis and Mabel Roth, there were Follweillers, Oswalds, Sensingers, and Steigerwalds. But Frederick Leisser's home and a stone which bears his name located in a small graveyard on the Roth property, serve as a reminder that 200 years ago it was the Leisser homestead.

What's New

Pop Corn Lovers Leaflet Available

A new, revised edition of "Jolly Time Recipes for Pop Corn Lovers" can be obtained by writing the American Pop Corn Co., Box, 178, Sioux City, Iowa, 51102.

The new 8-page gatefold leaflet contains traditional pop corn favorites such as baked caramel corn and molasses pop corn balls as well as new serving

suggestions for Oriental Pop Corn Party Chicken and no-cook pop corn confections. The free booklet also contains a 10 cent coupon for Jolly Time products.

YOU CAN'T BEAT THE SYSTEM

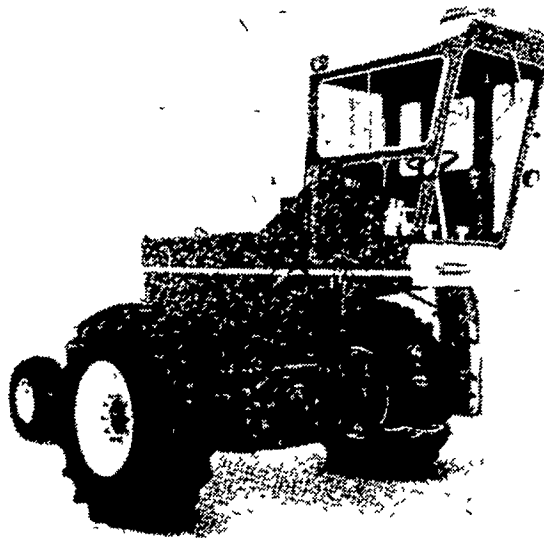

If you want to save money in equipment costs, you can't beat the system—Uni-System, that is.

With Uni, you have the capability of converting a single power source into a versatile farming system. The variety of harvesting units available can be interchanged to turn Uni into a combine that'll harvest 4 rows of corn, 6 rows of beans, as well as small grain; or a cornpicker that'll pick and husk 4 rows of corn, self-propelled (great for seed corn, too), or a cage-type corn sheller that delivers clean kernels, with less damage, or a rugged, big capacity forage harvester that'll chop corn or hay. You can even extend your investment in Uni by using it as a planter/tool carrier in the spring. That's interchangeability that just can't be beat!

It all starts with the Uni Power Units that are engineered and built tough, from the frame up. Designed in a way that makes Uni meet or beat any other self-propelled farm equipment on the market, when it comes to uniting power, versatility, safety, and convenience.

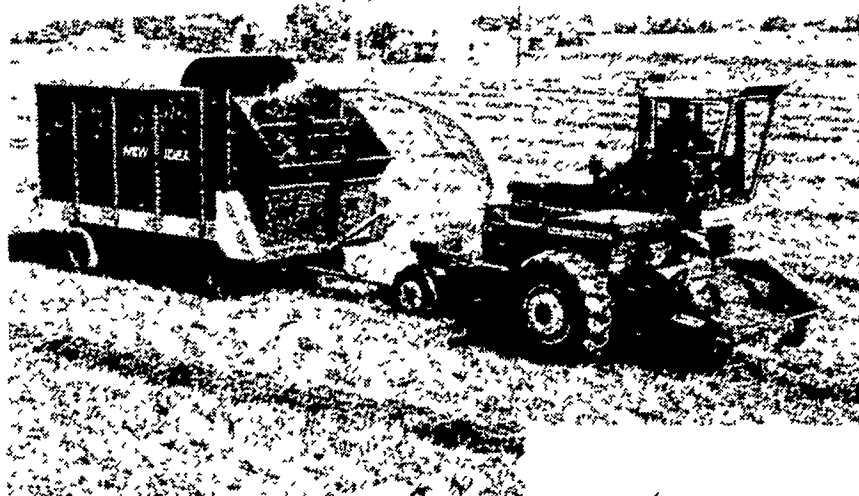

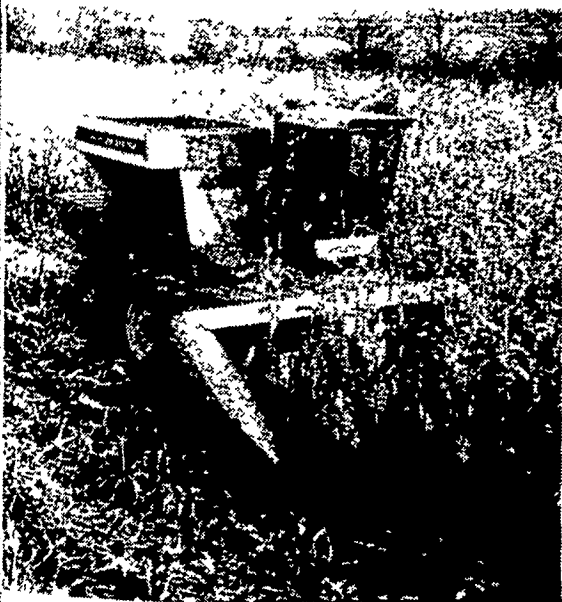

New Idea's whole idea with the Uni-System is to improve your performance by reducing your farm machinery costs. Think of it! Just *one* power source that can do so much of your work season after season—just one Power Unit, not several. Take a look at Uni and see how many jobs it can handle in your operation.

See, also, the extra strength that's built-in for long life and minimum maintenance. We designed Uni with you in mind—that's why we say, "You can't beat the system!"

Coldwater, Ohio 45828

where the whole idea means better performance

Bull summaries for Holsteins listed

When the USDA bull proofs for May came out recently, they showed that 105 Holstein bulls had a predicted difference in milk of 1000 or more pounds. LANCASTER FARMING lists those bulls, ranked in order of predicted difference in milk production, and others with 700 or more p. d. in milk output potential. It should be noted, however, that just because a bull is listed here does not mean that semen from him is available. Check with the bull stud at which a bull is located to find out whether the bull's semen is still for sale. The first column after a bull's name is the stud code number, as assigned by the National Association of Animal Breeders. They're identified as follows:

- 01 — Noba, Inc. Box 607, Tiffin, Ohio 44883
 03 — Eastern A.I. Cooperative, Box 518, Ithaca, N.Y. 14850
 07 — Select Sires, Inc., Box 126, Plain City, Ohio 43064
 09 — Sire Power, Inc., Box 555, Frederick, Md. 21701
 11 — Carnation Company, Genetics Division, Box 938, Hughson, Calif. 95326

BRAVO® for tomatoes

Controls eight tomato fungus diseases!

Deliciously healthy tomatoes. That's what you get for using Bravo 6F fungicide.

Flowable Bravo is the one fungicide that controls early blight, late blight, gray leaf mold, gray leaf spot, anthracnose, Rhizoctonia fruit rot, Botrytis gray mold, and black mold (California, only).

You'll see the difference in bigger tomato yields. You'll also like its convenient flowable form. Ask us for Bravo; we're your local Diamond Shamrock dealer.

Strapped?

In a rush-hour subway train, a gentleman bent over and asked the young lady standing next to him if he could find a strap for her. "I have a strap," she replied coldly. "Then would you mind letting go of my necktie," stated the commuter.

Tasted Great

When Jones became convinced he was a cannibal, his wife persuaded him to visit a psychiatrist. Returning home after his first visit, the husband was asked what a psychiatrist was like. "Delicious," he blurted.

What's New . . .

CHOPPER
is new addition to the Queen line of self-feeding forage harvesting machinery utilizes a 903 cu. in. 20 hp Cummins diesel engine to provide the power necessary for high-tonnage chopping — up to 1500 tons per day.
The Model 7800 also features a new, patented "Pro-Cut" cutting cylinder. The 32-inch wide Pro-Cut header has twenty-four

staggered chromium-carbide knives, each eleven inches wide. The knives are replaceable and ride on exclusive cupped knife mounts that create a powerful positive-force air flow to carry chopped material up the spout and into the forage truck. The Pro-Cut cutter assembly eliminates the need for a separate blower.

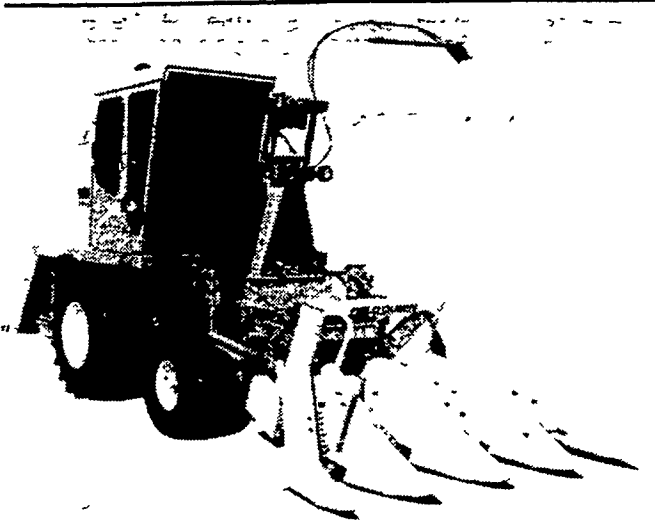

It's patented, hydraulically driven feed

rolls automatically control the speed of crop flow to the cutting cylinder. The reversible rolls feature relief valve protection.

The deluxe Command Post cab features air conditioning, all-tinted glass, adjustable steering-column and sound insulation . . . all standard. A heavy-duty spout gives 350-degree rotation to blow forage to either side or the rear of the machine. The hydrostatic

ground drive allows for more efficient production by allowing the operator to adjust ground speed to field conditions while maintaining the optimum engine and cutter speed.

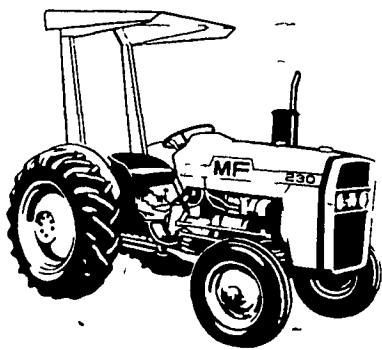

The Field Queen Model 7800 also offers the only four-row heads that carry the crop directly to the feed rolls. The two big four-row, low-profile corn headers (30 inch and 38 inch rows) also feature an advanced new rotary knife design. A seven-foot windrow pickup is also available. The headers are hydraulically driven and the same interchangeable hydraulic motor drives all three.

Cooking contest

[Continued from Page 69]

Richardson of Reading came in second with a Delicious Bundt Cake.

Jayne Malsbury was the first place winner in the Desserts category, followed by Phoebe Ruth with a Banana Split Dessert.

The grand champion recipe courtesy of JoHanne Mantz and the Berks County Dairy Association is as follows:

Ham n' Cheese Chowder

3 cups water
4 medium potatoes, pared and diced
1 cup sliced celery
1 cup pared, sliced carrots
½ cup diced onion
2 teaspoons salt
¼ teaspoon pepper
½ cup butter
½ cup all-purpose flour
1 quart milk
1 pound sharp cheddar cheese shredded
2 cups cubed, cooked ham
Bring water to boil in kettle. Add potatoes, celery, carrots, onion, salt and pepper. Simmer until vegetables are tender. Melt butter in saucepan. Blend in flour. Stir in milk gradually. Cook over medium heat, stirring constantly until mixture comes to a boil; boil one minute. Stir in cheese until melted. Add to vegetables and ham. Heat but do not boil.

NATIONAL PORK

Producers Council

Over the last few years, the image of pork and the producer has changed. Today, producers are proud of their product. And, through the NPPC, producers have proven to consumers that pork not only tastes good, but it's good for them, too.

The NPPC was formed and is funded and directed by producers. NPPC promotes pork to consumers in a vigorous year-round advertising campaign. The NPPC also funds research on key production problems identified by producer-members.

Our work promoting your product has just begun. We want to do more. We need your help. If you would like to join your fellow pork producers in supporting these worthwhile programs, contact:

National Pork Producers
4715 Grand Avenue
Des Moines, Iowa 50312
We will direct you to the proper state leaders. Remember, our job has just begun.

Randy Ranck

[Continued from Page 75]

of vice-president of the Solanco chapter.

Besides holding several offices, Randy has been on many FFA committees. As a senior he worked on the State Activities, Conduct of Meeting, Walk-A-Thon for the Solanco Fair Association, Citrus fruit sales, and Greenhand Initiation Committees.

In his junior year, Nov., 1975, Randy went to Kansas City to receive the "Building Our American Communities" award for the Solanco Chapter.

Among a long list of FFA activities which Randy entered are: livestock judging - four years; Pa. Summer Convention - two years; Pa. Winter Convention - three years; Parliamentary Procedure Team, which placed third in the state when he served as secretary for the team; Pa. Corn contest - three years; County Land Judging where he placed tenth as a sophomore; the International Land Judging Contest in Oklahoma in 1975; and the Public Speaking contest where he placed fifth in the county.

At the Lancaster County Cooperative Day in 1975 he was awarded the Pennsylvania Association of Farmer Cooperatives Award for his involvement in FFA activities and his mastery of the written test on cooperatives. As a result of his PAFC award, he attended the four-day Cooperative Institute at Shippensburg in July.

"There I met people from all over the state," Randy commented. "I was surprised to find we had so much in common socially and in FFA activities. I even met one boy who had exactly the same program I had."

Randy also carries the motto of "Living to Serve" to the community and his church in various activities. This year he spoke to the Quarryville Lions Club to explain the FFA program and its offerings to youth. For four nights, one night a week for one month, Randy was invited to attend the meetings.

"I really enjoyed the chance to explain the FFA program to primarily all businessmen," Randy said.

Various awards which Randy has received from the community and school are Rural Youth at the Solanco Fair, Rotary Student of the Month, and Spotlight in the school newspaper.

Tractor contest

RED LION - Mike Innerst, son of Mr. & Mrs. Ralph Innerst, recently won the Red Lion Area FFA Chapter's Tractor Driving Contest. FFA members from the chapter competed in two areas of competition, the two wheel obstacle course and the four wheel backing course. Placing second and third were Glenn Crowl and Mark Innerst. Mike will now compete in the County tractor driving contest which will be held in conjunction with the York Fair in September. The tractor was furnished by Airville Farm Supply and the four wheel and two wheel equipment by Roy Jackson.

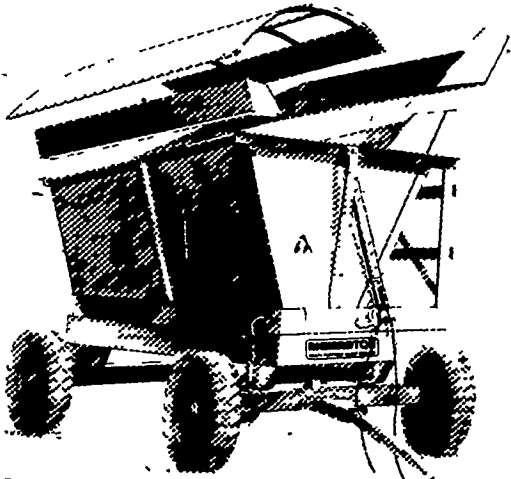

A great deal of Randy's spare time not taken up by FFA activities, projects, and chores is delegated to the youth activities of the Lancaster District and Mechanic Grove Mennonite Church. He is now serving as the president of the Mechanic Grove Mennonite Youth Group. As president,

he organized a Christmas carolling trip to Washington, D.C., the fall banquet, the slave auction, served on the church's centennial committee and helped to start the support of a foreign child through the Christian Children's fund.

After graduation, Randy plans to continue working on his father's farm which consists of 130 acres of corn and small grains raised to feed steers and hogs. At present there are 45 steers and 330 hogs on the farm.

You Can Do It . . .

Decrease parlor time and increase production with a Surge Prep Stall...

We'll give you a
look at an installation near you.

While most dairymen prep their cows, few realize just how important proper stimulation is to a cow's production.

That's why more and more American dairymen are moving up to Surge automatic stimulator-washer equipment. Surge prep stalls save valuable time and labor; improve the flow of cows through your parlor, and in most cases help increase production.

Call us today for a chance to go talk to some dairymen in your area that are currently using Surge prep stalls.

We make your cows
worth more.

BERK'S DHIA MONTHLY REPORT

The following is the Berks County DHIA report for the month of April, 1976. Only those herds with 1.5 pounds of butterfat per cow per day are listed. Leading that list was the Wernersville State Hospital Herd which produced an average of 2.23 pounds of butterfat per cow per day. Checking in with the highest individual production records for milk and butterfat were Bill Howerter's "Dodie" and Junge Farms' "Bessie." The milk champion produced 23,346 pounds with 761 of fat. "Bessie," a seven-year old, chalked up 21,499 pounds of milk and 979 of fat.

York Co. Home Economists

The York County Home Economists will sponsor a "Super Sewing Seminar" by Nancy Olson on June 23 at 9 a.m. to 3 p.m. at the Spring Grove Junior High School, Spring Grove, Pa. Seminar participants need not be experts, but they should have sewn a few garments. The seminar will focus on speed sewing and includes pattern fitting and adjustment, plus how to copy a design.

Hog cholera quarantines lifted

Federal and state hog cholera quarantines were lifted on recently from Hillsborough county, N.H., ending all such quarantines in the country for the first time since March 2, the U. S. Department of Agriculture (USDA) announced.

Officials of USDA's Animal and Plant Health Inspection Service (APHIS) said hog cholera surveillance will continue in the former outbreak areas of New England and N.J. The last remaining quarantines in R.I., N.J., and Mass. were lifted in April and May.

A highly infectious viral disease of swine, hog cholera was diagnosed in late February and early March in N.J., R.I., and Mass. The disease was found April 28 in New Hampshire. Hog cholera cannot be contracted by other animals or humans.

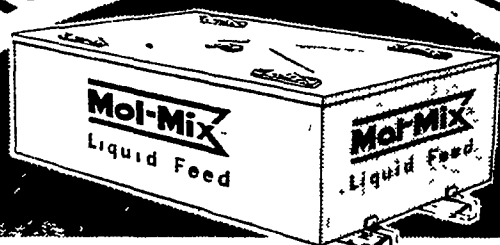

Wool pull scheduled

FLEMINGTON, N.J. - New Jersey wool producers will hold their annual wool pool on the weekend of June 25th, including that very afternoon and continuing through Sunday. The pool will close each day at 6 p.m. and open at 8 a.m. except for on the first day (Friday) when it opens at 1 p.m.

The pool is organized by the New Jersey Sheep and Cooperative Association and wool producers from the Garden State.

Diagnosis of the disease brought State - Federal eradication teams into action. It was necessary for them to destroy 51 herd, totalling about 20,000 swine, as the best means of preventing the disease from spreading. About \$2.4 million in federal indemnity funds has been paid to producers.

Stockyards

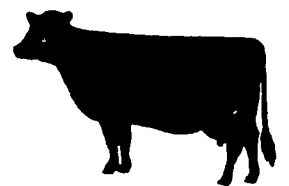

(Continued from Page 72)

means protection for the seller. At the Stockyards here in Lancaster there are nine brokerage firms which buy and sell cattle. Farmers pay for this service, but in return they get protection and efforts by the firms to get the best deals. "It's like an insurance policy," commented the Stockyards president. "You don't want to put all marbles in the hands of the buyers," he said. He also claimed that direct selling will kill the strength of the market, and that the conventional marketing method can have an "awful lot of leverage if we use it properly."

Demand for fresh meat has declined in some areas in the country, according to McCoy. Expressing hope that it won't happen here, he does acknowledge, however, that some boxed meat is coming in from the West. "If we lose the fresh meat industry here, we're in trouble," McCoy warned, adding "I don't think we'll lose it... boxed meat hasn't really gained acceptance... there's a strong ethnic population which demands fresh meat." Boxed meat is cheaper to ship, compared to live shipments or swinging carcasses, he explained. "Your bigger and better hotel establishments demand fresh meat. But some of the (food) chains have started to handle this

type (boxed meat) of product," he affirmed.

McCoy is justly proud of the history and more recent accomplishments of the Stockyards. At one time (about 30 to 40 years ago) there was more money going through these facilities than at all of the industry of Lancaster combined, he said. "It's the only business I know of where transactions are made with a handshake and a nod of the head," he said. Business is still carried out that way, although some changes have been made to protect the seller. A majority of changes have come through government regulations, some of which do not meet with McCoy's approval. He pointed out, for example, that more stringent inspection laws drove many of the smaller butchers out of business, resulting in fewer buyers and less competition. "We need packers and want 'em... and we wouldn't want to tie their hands either... what we need is less government intervention," he concluded.

A pagoda in Ceylon is built in a 500-square-foot, 7-inch-thick foundation of solid silver.

Fertilizer usage cut

WASHINGTON, D.C. - million tons, down four percent.
 U.S. fertilizer consumption, at 40.6 million tons during the fiscal year ended June 30, 1975, was down 10 percent from a year earlier. Dry bulk fertilizer use totaled 19.4 million tons, down 11 percent from a year earlier. Dry bagged fertilizer consumption totaled only 9 million tons, down 14 percent from a year earlier. Fluid fertilizer use totaled 12.2 million tons, down four percent.
 Illinois remained the leading fertilizer consumer, using 3.4 million tons, three percent less than a year earlier. Usage in Iowa, at 2.99 million tons, was up two percent. Texas' usage, at 2.2 million tons, was off 24 percent; California's consumption, at 2.47 million tons, was off three percent.

BEHLEN Pork Factory
 for controlled environment, greater pork profits

The first Behlen Pork Factory was erected in 1963 — The heavy gauge steel Farrowing House and Nursery pictured is the result of continuous Behlen Research in this field. This 26 wide unit holds two rows of farrowing stalls. Interior can be efficiently insulated and protected with a stainless steel wainscoting. Behlen-integrated components include stainless steel flooring, pens, partitions, ventilation system, bulk feed tanks.

Diagram shows Behlen Ventilation System — pushes clean air through the building leaving no odors or gases — See us about this new profit-way to raise hogs

Get the right mite protection...
PLICTRAN 50W

This is the way to control destructive plant-feeding mites in apple and pear orchards without seriously harming beneficial insects. PLICTRAN® 50W miteicide. It's highly effective against mites both those susceptible and resistant to other miteicides. Yet it favors mite-feeding mites. And it's easy on fruit and tree foliage. PLICTRAN® 50W the mighty miteicide from Dow. Two applications are usually adequate. Be sure to always read and follow all label directions and precautions.

Egg Board reviews committee reports

CHICAGO, Ill. - The Egg Board, meeting here June 4, took a step closer to beginning its program on behalf of the egg industry according to John P. Wallace, chairman.

Wallace announced that Louis B. Raffel has been named executive vice president and general manager of the Egg Board. Raffel was formerly vice president of public relations and advertising, Greyhound Corporation.

In other action, the Egg Board approved an agreement between the Egg Board and the American Egg Board enabling the Egg Board to utilize the staff, offices and assets of the American Egg Board effective July 1, 1976 or as soon thereafter as possible.

Housing Needed

Seventy-five million new housing units will be needed nationwide in the next 25 years.

READ LANCASTER FARMING FOR FULL MARKET REPORTS

subject to approval by the Secretary of Agriculture.

The Egg Board also heard reports from each of its standing committees. Highlights of the committee reports included:

Finance Committee Chairman Roland Coles presented a tentative budget for the programs for 1976 based on income that will be received when the check-off begins on August 1.

Producer Relations Committee Chairman Edward Houston urged an immediate communications program with producers including leaflets, trade press publicity, speakers' bureau and other activities to promote better understanding of the program.

The Planning Committee reports presented by Chairman Maurice Pickler made recommendations concerning the use of Egg Board funds for specific areas of promotion and research. The committee also suggested cooperation with consumer groups and a method of obtaining promotional ideas from the industry.

Earnest Brown Chairman of the research committee, recommended a guideline for research in the area of new product development, marketing methods and nutrition and health.

The Promotion and Advertising Committee report was presented by Chairman Donald Long. Included were resolutions recommending

adoption of the use of American Egg Board's proven and tested "Golden Opportunity" program, including the "Incredible Edible Egg" advertising theme. The committee also recommended cooperation with state and regional egg promotion programs. These resolutions were accepted and approved by the Board.

The Board additionally voted to establish a standing committee on export market development.

Wallace said that the rules and regulations for the Egg Promotion and Research Order were published in the Federal Register June 8 and collection of promotion funds will begin on August 1. Handlers will soon be receiving information on collection procedures.

"The Egg Board is enthusiastic about the way the programs are developing and looking forward to getting the programs under way", Wallace said.

Direct sales discussed

FLEMINGTON, N.J. - The Flemington Agricultural Market Directors are inviting all those interested in selling their home grown produce through the Farmer's Market to a general informational meeting, Tuesday, June 22nd at 8 p.m. at the Hunterdon County Extension Center. At that time they will discuss the market facilities and explain how the market will work and discuss many other possibilities and details that must be taken care of for such a market to be a success.

The auction directors are planning to open the market beginning Saturday, July 10th. It will be a weekend affair, Saturday and Sunday. It is an opportunity for farmers to sell their produce and for the public to buy farm fresh produce, direct from the producers.
